REMARKS/DESCRIPTIONS: Jicaros have burnt interiors. About 1/3 of Sicaro Jar rims are worn on neck-body break. Magdalenas are eroded, paint largely gone. Miravalles incision is just barely visible, and not as precise as that from other areas. Monte Grande very eroded, many attributions based on paste alone; pastes also on the cradle side. Maroncho incision is really eroded and hard to see. It is not as precise as elsewhere. Paste junky, lots of large temper.
