DIAMETER:

VERBAL DESCRIPTION: This is an intact - broken mano.

If broken, it is an end medial section.

The 1st finished end - broken end is chipped (as a manufacturing process) - pecked - not ground down at all - ground only on the highest parts - moderately ground - ground smooth - chipped (as in broken) - battered/crushed - used as a pestle or pounder.

The junction of the finished end with the side is sharp - rounded.

The 1st finished end broken end has a round - oval - square - rectangular - other (describe) cross-section. D-shaped.

The end measures 6.88 cm by 4.49 cm.

The 2nd finished end - broken end is chipped (as a manufacturing process) - pecked - not ground down at all - ground only on the highest parts - moderately ground - ground smooth - chipped (as in broken) - battered/crushed - used as a pestle or pounder.

The junction of the 2nd end with the side is sharp - rounded.

The 2nd finished - broken end has a round - oval - square - rectangular - other (describe) cross-section. D-shaped.

The end measures 6.89 cm by 4.70 cm.

In general, the side of the mano is lightly ground on the highest parts - moderately ground - smooth - glossy - slick.

If the surface is heavily used, slick, and/or glossy, the shine does does not continue to the edge.

There are are not facets or flattened planes present on the sides.

If present, no 1 - more than 2 facet(s) is clearly the working/most used facet.

There is is not a lengthwise curvature.

The material used to make this mano is vesicular basalt - volcanic tuff - limestone - granite - other (describe).

If basalt, the item is very - moderately - lightly porous.

Drawn - not drawn.
