Last year we did a splendidSoda business. Our patrons seemed to be so impressed with the deliciousness of our Soda that many of them got into the habit of coming here regularly, both alone and with their friends. We anticipate even more of this "habit" this season, because our Soda is better than ever before-not purer, for it was absolutely pure last year-but more delicious and appetising.

A Russian Bear Story. Here is an odd hunting tale from Russia: A certain count was out for bears and, tracking a dam and cubs, shot one of the latter, had it slung into his sleigh and drove for home, about fifty miles distant. Immediately after his arrival his gamekeeper announced that a huge bear had scaled the wall of the park. The count went out and shot it-the dam of the cub which he had killed and brought home! The faithful creature had followed her dead offspring those fifty miles at the same pace as relays of post horses and arrived in time to share the fate of her cub and to have a monument erected

where she fell.

THE YEAR'S OBITUARY ROLL

Political Affairs, Miscellaneous, Sporting and Personal Items-Loss of Life and Property by Accidents, Shipwrecks, Storms and Conflagrations-A Chronological Review.

Like its immediate predecessor, the year 1905 is notable as a period to date from in the history of the war between Russia and Japan. The year opened with the fall of Port Arthur after a prolonged and stubborn contest in which 150,000 men took part and the casualties totaled 70,000 (estimated). The Russian land forces were signally defeated at Mukden in March, and in May the Russian Baltic fleet was practically annihilated in the strait of Korea by the Japanese fleet under Admiral Togo. On the initiative of President Received negotiations for a peace conference were begun in June, and sessions were opened in Portsmouth, N. H, in August which ended in the conciusion of a treaty of peace signed by the emperor of Russia and the emperor of Japan Oct. 14. Hostilitles in this war continued approximately one year and four months, and the estimated cost of the conflict is over \$3,000,000,-606. The total battle casualties are placed at over 400,000.

During the year the internal troubles of Russia reached an acute stage and resulted in the granting of civic privileges which in their entirety amount to a social and political revolution and the effacement of the autocracy.

· Among the political events of the year were the dissolution of the union ander one crown of Sweden and Norway and the establishment of the independent kingdom of Norway with Prince Charles of Denma': on the throne. Venezuela became involved in disputes with the United States and France over concessions to the subjects of those two countries, and the European powers, with the exception of Germany, united in a demonstration to bring Turkey to terms in the matter of Macedonia.

The obituary list of the year includes Joseph Jefferson, Fitz-Hugh Lee, Mary Mapes Dodge, Mary A. Livermore and John Hay, in America, and George Macdonald and Sir Henry Irving, in

Four crops made new high records for the year in this country as to value—corn, hay, wheat and rice—although amount of production the corn crop to the only one of the four that exceeds previous yields. In every crop the general level of production was high and that of prices still higher.

The Prospects Good For Prosperity In 1906

But The Preeminent Necessity For Successful Year In Conservatism In Labor Matters And **Financial Affairs**

The Banner is in receipt of the year's review by Bradstreet's comercial agency, which, in part, is as Nineteen hundred and five was a

ear of almost boundless activity in trade, industry and speculation. It was a period of rich rewards to agri- City culture, though not of uniformly record yields; of abundance of employment for labor and of very few serious strikes; of building and constructive activity in all lines; of enormously e. larged bank clearings totals, and of striking small failure damage, considering the immense business done and the unprecedented number engaged therein. That it was, on the whole, a year of heavily increased public purchasing power seems certain, in view of the fact that commodity prices were maintained at record high levels. It was a year of peace in national affairs, and the country certainly has no cause to regret the efforts of highest officer to bring peace to warring The scores were very low. sister nations. While spared the social unrest visible in some foreign nations, it may be said with some comfort that it was a period of moral awakehing likely to be productive of much good to the nation, because of the pitiless arraignments of dishenest financial and political practices in the court of public opinion.

The multitude of records broken shows that new guideposts have, ndeed, been set up. The revival which began in the last half of 1904, ar from spending its force, as was ften predicted in the early part of 05, grew as the year advanced ru, there was a period of hesitaon-a breathing spell, as it werethe spring of the year, but this was a pause to get a clearer view of ss world to take new bear ings. Thenceforth the commercial, financial and industrial movement surged forward, weather drawbacks perity was irresistible.

The business outlook for 1906 is sized up by Bradstreet's as follow: If satisfaction with the past and confidence in the future are at all reliable guides, 1906 is likely to equal, if indeed it does not surpass, the year drawing to a close. The volume of orders booked ahead exceeds any previo s year in the country's history, and high prices as yet of all kinds are heavily sold ahead, as are also shoes, cotton and woolen cemetery. goods, lumber, hardware, and a diad of other products. It would seem as if the preeminent necessity in 1906 should be conservatism, particularly in labor matters and in financial affairs generally.
