Part Group (lenses, figurines): Thickness 1.3 cm.

Handle width

Form (lenses):

Height 13.5 cm

Handle thickness

Width 1.3 cm.

Diameter

Full  
Verbal Description

This is a sort of round, more or less flat disk of melted red plastic.

Its color is like red chalcedony.

There is a slit hole in the middle. Cataloged

because it is weird to find such a big piece of melted plastic in an archaeological context.

one side just looks congealed.

The other is wrinkled, cracked, with unevenly distributed areas of glossy, darker surface.
