Articles Of The Japanese Terms Are Agreed To

Recognize Japans' Special Position In regaining consciousness they found the boy dead. Korea And Each Of The Belligerents To Evacuate Manchuria---The Other Terms Agreed Upon

Japanese conditions of peace have been agreed to by M. Witte and Baron Rosen on behalf of Russia. Neither of the two articles to which M. Witte in his reply returned an absolute negative was reached. The crisis, therefore, is still to come. The three "articles" which were disposed of are in substance as follows:

First-Russia's recognition of Japanese "preponderating influence" and special position in Korea, which Russia henceforth agrees as outside of her sphere of influence, Japan binding herself to recognize the suzerainty of the reigning family, but with the right to give advice and assistance to improve the civil administration of the

Second-Mutual obligation to evacuate Manchuria, each to surrender all special privileges in that province, mutual obligation to respect the "territorial integrity" of China and to maintain the principle of equal opportunity for the commerce and industry of all nations in that province (open

In the discussion of the second arti-Russia won a victory. Baron Komura, so it is declared, wanted to limit the obligation to evacuate Manchuria and to surrender special privileges in the province to Russia, whereas M. Witte contended that the obligation for evacuation and the surrender of certain privileges should be mutual and that the evacuation of the troops should take place concurrently. M. Witte is aid to have contended defending not only the interests of ulations regarding the preservation of

the territorial integrity of China. There never was any question about he acceptance on the part of M. Witte of these "articles," the first two coverng in more emphatic form the contentions of Japan in the diplomatic struggle which preceded hostilities. The third is a natural consequence of the esult of war. The cession of the raiload, the building of which cost Russia an immense sum, estimated by omeatbetween \$100,000,000 and \$200. Portsmouth, N. H., Aug. 15 .- Three therefore, will arrange between themof the 12 articles which constitute the selves the method by which the former is to be remunerated, and through this financial operation Japan might have a very considerable portion of her claim for the "expenses of the war" liquidated. The railroad is ostensibly the property of the Russian-Chinese bank, although built by government money advanced through the bank, and since its completion operated, managed and policed by the Russian government.

Must Modify Terms.

St. Petersburg, Aug. 15.—Practically the only hope entertained in high Russian official quarters for a peace agreement at the conference at Portsmouth lies in the expectation that Japan will recede materially from her terms as published. Official and public sentiment regarding the possibilities of peace, outlined by an official who has constant and close relations with the highest authorities, is as follows: "The terms are regarded in their entirety as quite impossible of acceptance, and close scrutiny has not removed the very unfavorable impression their first reading has produced Third—The cession to China of the here. If they are not modified, especially in the matters of indemnity and territorial concessions, peace, it is thought, is impossible, and the contincle (covering the evacuation of Man- uance of the negotiations useless, churia) it is positively stated that Russia is honestly and sincerely desirous of securing an honorable and lasting peace, and to this end has sent her plenipotentiaries to Portsmouth. They did not journey thither merely to learn the Japanese demands, but they went in an earnest endeavor to do everything possible to terminate the war in a manner compatible with the dignity of a great nation."

His father and mother were knocked senseless, and upon

WORLD'S CROPS.

Harvest of 1905 on the Whole Will Be Satisfactory.

Washington, Aug. 15 .- The foreign crop report to the department of agriculture announces that "in the countries of the largest production the crops of the principal bread grains can not be called abundant, but on a general survey of the field it seems probable that the harvest of 1905 will not on the whole be a bad one." In Great Britain and Ireland the area under wheat is estimated at 1,800,000 ecres and the yield at 63,000,000 bushels, or 35 bushels to the acre, against an area last year of 1,400,000 acres and yield of 39,000,000 bushels, or less than 28 bushels per acre. The area under wheat in Manitoba and the northwest territories is fully 10 per cent larger than ever before. In Argentina there is a good crop outlook, and the area of winter grain appears to be much larger than last year. In Australia the outlook appears more promising than in 10 years. Despite unfavorable weather reports, the outlook in Germany last month seemed fair. In Russia the crop prospects remained generally satisfactory, the winter cereals promising nearly and

PHYSICIAN

At Millersburg

Millersburg, O., Aug. 15.-Dr. Otto Negelspach was electrocuted when he went to the stable to attend to his horse. When he reached the stable door he found a telephone wire in his road, it having broken and fallen. He took hold of it to throw it out of the way, when he fell, dying almost instantly. The telephone wire in falling crossed an electric light wire, which sent 1,100 volts through his body.

Tarantula Kills Ohio Pastor. Bellefontaine, O., Aug. 15 .- Rev.

Robert Grieve, once nominee of the Prohibition party for congress in this district and last year a candidate for the legislature, and who was well known throughout central Ohio, is reported dead in California, his death having been due to the bite of a tarantula. Rev. Grieve was the pastor of the Church of Christ at Fresno, Cal.

Husband's Deed.

Celina, O., Aug. 15 .- Martin G. Miller, 38, committed suicide by taking carbolic acid. Mrs. Miller left her husband at Piqua and came here to stay with her mother, Mrs. Bierely. Miller followed and a quarrel was the outcome. Miller stepped just outside the door of Mrs. Bierely's home, drank the acid and fell in the house. He died five minutes afterward.

Comaged by Fire.

Philadelphia, Aug. 15.-Logan Hall, in which are located the Wharton school of finance and the anatomical and surgical department of the medical school of the University of Pennsylvania, was damaged by fire to the extent of \$40,000. The greatest logwas entailed by the breaking of microscopes and other delicate instruments the spring cereals above an average used in the demonstration of histology.

MANY NEW FEVER CASES REPORTED IN NEW ORLEANS

New Orleans, Aug. 15.-Yellow fever ernments, Count Periti de la Rocca

There has been reported a large number of new cases of the fever, the bulk of them, as heretofore, coming from below Canal street. That section is now very generally infected. Slow progress is made by the disease in what is known as the American portion of the city, and with few exceptions the cases there are isolated. The health authorities are still unable to assert whether the high water mark in the matter of daily aggregate cases has been reached, and they consider it too early to hazard a guess at the extent of the victory which they expect to win, but with a large proportion of the cases responding to good treatment they do not believe that there is any chance that the disease can approach the proportion of any serious epidemic of the past.

The relief work of the Italians is now in full swing. Interesting scenes are daily witnessed in the charity restaurant which the societies have opened in the heart of the old French quarter, and the restaurant is thronged at meal time with a motley crowd of men, women and children. Three meals are served daily, but arrangements are made to feed anywho come, whether it is during the regular meal time or not.

The campaign of prosecution of those who have not paid obedience to the anti-mosquito ordinance is to be participated in by the federal authorities, the city board of health, the police and the various ward committees. Sweeping orders have been issued by Inspector Whitaker to the police to prosecute all landlords and agents who fail to screen their cisterns. The result of the order was the making of a large number of affidavits by the police. In one of the uptown wards the citizens' committee swore out 80 affidavits for violations of the screening law, some of them against men of large wealth and prominence.

FRENCH CLAIMS

Against Venezuelan Government Allowed by the Referee.

Northfield, Vt., Aug. 15.-Claims aggregating more than \$650,000, held by the French government against Venezuela, have been allowed by Referee Frank Plumley of this place, to whom they had been referred for a decision. Mr. Plumley's decision was announced here to representatives of the two gov-

·Lipton Cup Races. Chicago, Aug. 15.—The first of the series of races for the Lipton cup was won by the Detroit yacht St. Claire, which led all the way and finished 4 minutes 15 seconds ahead of Mendota of the Milwaukes Yacht club. Quien Sabe of the Columbia Yacht club Chicago, was third, 13 minutes and 9 seconds behind Mendota, while the Hoosier, the other representative of the Columbia Yacht club, was last crossing the finishing line, 3 mirutes and 53 seconds behind Quien Sabe. The race was at 12 miles, twice over a triangular course.

Crew Lost.

North Sydney, N. S., Aug. 15.—A small schooner which was sailing along the coast off Lingan Head was struck by a severe squall and capsized. Before those on shore could make preparations for assistance the storm increased, and one by one the crew were seen to fall away from the bottom of their overturned craft. It is believed that all were lost. The steamer Caruna later left for the scene, and at a late hour had not re-

Ton of Snow as a Gift.

Denver, Aug. 15.—The unique gift of nearly a ton of pure snow to the visiting Eagles created considerable of a sensation at Grand lodge headquarters here. The presentation was made on behalf of the members of Local Aerie No. 30 of Denver. The snow was secured at Rollins Pass, on the "Moffat Road," the line being constructed to Salt Lake, and was found in large quantities at an elevation of 11,660 feet, 60 miles from Denver.

Periodic Pains.

Dr. Miles' Anti-Pain Pills are a most remarkable remedy for the relief of periodic pains, backache, nervous or sick headache, or any of the distressing aches and pains that cause women so much suffering. As pain is weakening, and

leaves the system in an exhausted condition, it is wrong to suffer a moment longer than necessary, and you should take the Anti-Pain Pills on first indication of an attack.

If taken as directed you may have entire confidence in their effectiveness, as well as in the fact that they will leave no disagreeable after-effects.

They contain no morphine, opium, chloral, cocaine or other dangerous drugs.

"For a long time I have suffered greatly with spells of backache, that seem almost more than I can endure. These attacks come on every month, and last two or three days. I have never been able to get anything that would give me much relief until I bebegan the use of Dr. Miles' Anti-Pain Pils, and they always relieve me in a short time. My sister, who suffers the same way, has used them with the same results." MRS. PARK.

Curious Land, Curious People.

Near Cape Horn, in the island of Tierra del Fuego, live the most curious people in all South America. It rains or snows or sieets nearly every day, and yet they look on their country as the finest in the world. They wear hardly any clothing and seem not to feel cold. Because he saw fires on the shore the explorer Magellan, the first European that rounded the Horn, called the island "the Land of Fire," which is almost the worst name he could have chosen. Their huts are made of bent boughs and covered with grass and give only the poorest shelter. The folk are vain, too, wearing necklaces of the teeth of fishes or seals and painting patterns on their bodies. Among them some colors have a novel meaning. White is the sign of war and red of peace. They are great mimics and will imitate voice and gesture per-

Bamboo Fascination.

The secret of the charm of bamboos is so subtle and elusive as to defy analysis. Bamboos are really grasses on a large scale-a tropical scale-yet they do not impress us as being coarse -in fact, they are slenderness personified-and they seem to fit well into a northern landscape. Their decorative character is so clearly recognized that they are often grown in large pots or tubs for porch and greenhouse decoration-even the hardy species. Bamboos are generally thought to look best on the bank of a stream or among rocks on a hillside, but they are also becoming favorites for the hardy border, and they are often used most effectively in cities at the base of public buildings-for example, at the national capitol.-Country Life In America.

Preserved In Water.

Water is a wonderful preservative of the human body. There exists an entry in the parish register of St. Andrew's, Newcastle, England, bearing upon the point: "April 24, 1695, wear buried James Archer and his son Stephen, who in the moneth of May, 1658, wear drowned in a coal pit in the Gallaflat by the breaking in of water from an old waste. The bodys were found intire after they had lien in the water thirty-six years and eleven months."

A Clew to Happiness.

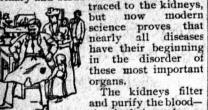

If it be my lot to crawl, I will craw contentedly; if to fly, I will fly with alacrity, but as long as I can possibly avoid it I will never be unhappy. If with a pleasant wife, three children and many friends who wish me well I cannot be happy I am a very silly, foolish fellow, and what becomes of me is of very little consequence.-From Letter by Sydney Smith!

Often The Kidneys Are Weakened by Over-Work. Unhealthy Kidneys Make Impure Blood.

It used to be considered that only urinary and bladder troubles were to be traced to the kidneys,

that is their work. Therefore, when your kidneys are weak or out of order, you can understand how quickly your entire body is affected and how every organ seems to fail to do its

If you are sick or "feel badly," begin taking the great kidney remedy, Dr. Kilmer's Swamp-Root, because as soon as your kidneys are well they will help all the other organs to health. A trial will convince anyone.

If you are sick you can make no mistake by first doctoring your kidneys. The mild and the extraordinary effect of Dr. Kilmer's Swamp-Root, the great kidney remedy, is soon realized. It stands the highest for its wonderful cures of the most distressing cases, and is sold

The Best Building Ground.

The most healthy ground on which to build a residence is one composed of clean gravel free from clay and effete organic matter and having a porous substratum. The advantages of such a soil are free ventilation and drainage and a low level of ground water, all essential qualities for a dry and salubrious situation. A soil composed of permeable sandstone and chalk formation is also good. Rocky and stony situations are usually healthy. Sandy soils may be considered salubrious provided they are clear and pure and not water bound by an Impermeable foundation. Clay and alluvial soils are generally unhealthy.

You cannot rightly train one to an air and manner except by making him the kind of man of whom that air is the natural expression. Nature forever puts a premium on reality. What is done for effect is seen to be done for effect; what is done for love is felt to be done for love. A man inspires affection and honor because he was not lying in wait for these. ENGLISH SOCIETY WOMEN.

Caustic Comment on Their Love of Drugs and Liquor,

A prominent London journal prints work for a native, his charge was five the following indictment of the habits generation back it was among the lower classes we found intemperance rife, and then it was the beer of the people which supplied the means; today we find intemperance rampant from the highest to the lowest, the vehicle being alcohol, impure and simple, vile concoctions labeled indifferently brandy, whisky, gin. Our wearied, jaded votaries of pleasure seek temporary recuperation from these impure sources; then, when their day is done, they resort to their sulphonal, trional, morphia or what not in the vain hope of a night's good rest. Another most appalling fact that we have to face is the rapid increase in the number of women among the inebriate ranks.

"What is the daily life history of a woman in society? Too jaded by selfish indulgences, after a night of morbid sleep born of some favorite drug she rises to face a day's racing with concomitant betting. Her breakfast inadequate, probably supplemented by brandy or whisky and soda; luncheon indigestible, savory but unhealthful bonnes bouches, liberal potations of champagne or, more likely, recourse to familiar brandy or whisky peg; a rush home, further pandering to a morbid appetite, more champagne, later perhaps a dance or many hours devoted to inevitable bridge, again brandy or whisky and soda, then bed, with sulphonal, trional, morphia or some equally noxious drug.

"What wonder that there is no time, no disposition, for domestic duties, no care for the family life that erst was the backbone of England! Physical and moral degeneration is the inevitable result."
