Rapid Progress Is Being **Drafting**

Armistice Agreed Upon By Russia And Japan And Proclamation Of A Complete Suspension Of Hostilities Issued

Portsmouth, N.H., Sept. 1.—Through Mr. De Martens and Mr. Dennison, Baron De Rosen's room and explained that he and Baron Komura received instructions to arrange terms of an armistice. Baron Rosen immediately communicated with M. Witte, and it is probable that a meeting will be held during the day for the proclamation of a complete suspension of hostilities preliminary to the arrangement of the details by the two generals upon the battlefield.

Progress has been made in drafting of the treaty of peace. Baron Komura at M. Witte's request, will today probably fix a day for its signature. So readily and well is Mr. De Martens, with Mr. Demnison, performing his delicate and important task of drafting the treaty, that he was able to return from the navy yard to report to M. Witte the practical completion of 10 articles of the treaty. It is expected the treaty will in its entirety consist of 15 articles, exclusive of the preamble. Japan's original demands are said to have numbered 13. Only 12, however, were presented to the Russians, as President Roosevelt is credited with persuading the Japanese plenipotentiaries before the convening of the conference to withdraw one of the conditions, which he regarded as unjust. Whether this thirteenth demand dealt with the fortifications at Vladivostok can not be learned. Having waived three of the demands presented — the indemnity, the interned ships and the limitation of Russia's naval strength in the far east—the Japanese final conditions were nine. Several of these, however, will be divided in the treaty and grouped into at Portsmouth was practically assured two or more articles.

> WITTE'S BOAST. Bluffed the Jan Envoys by Holding

Out to the End. Portsmouth, N. H., Sept. 1.-In an interview here M. Witte, the Russian envoy, is reported as saying: "You see what one gains by standing firm. I had not the right to accept a compromise, and a rupture seemed likely to enlist the sympathies of all on the side of Japan. President Roosevelt appealed to my patriotism, humanity and good sense. Fortunately I succeeded in holding out to the end. The Japanese could not read in my face what was passing in my heart. From the outset I assumed such an indiffer ent tone that it eventually carried con viction. When the Japanese presented their written conditions I laid them aside without looking at them and spoke of something else. On leaving the room I intentionally forgot the conditions lying on the table. When one of the Japanese plenipotentiaries drew my attention to this, asking me if I did not wish to take away secret documents, which some one might read, I put the papers carelessly in my pocket. It was thus to the last minute of the negotiations."

THE CHICAGO PRINTERS ARE OUT ON STRIKE

Chicago, Sept. 1.—An acute stage in Moscow, published a two-column has been reached in a new labor war in Chicago. Nineteen of the larger Job printing houses of Chicago are without union compositors, the result of a series of strikes inaugurated by Typographical Union No. 16 against members of the Chicago Typothetae, the purpose of the strikes being to compel the typothetae as an organization to accede to demands for the "closed" shop and that eight hours constitute a day's work. Further strikes are expected in case other houses undertake to do work for concerns at which strikes have been begun as the result of the posting of notices of an intention to inaugurate open shop" and "nine hours" where, it is claimed, contrary conditions had been the rule. Among the establishments at which the latest strikes were inaugurated were Poole Brothers, M A. Donohue & Company and the Methodist Book Concern.

The liberal papers of Moscow made no attempt to conceal their joy at the conclusion of peace.

Import Strike Breakers.

Mount Sterling, Ky., Sept. 1.-Eighteen hundred Hungarian miners have been imported from Virginia to Beattyville, Lee county, to take the places of striking miners. The miners struck at the Richardson mine, and fears of a clash are rife. Much bitterness is held against the foreigners. It is said the men will be guarded in their work.

ALLIANCE

Between England and Japan as Outlined by the Treaty.

London, Sept. 1. - The new Anglo-Japanese treaty of alliance contains an important modification binding either power to come to the assistance of the other if attacked by one, instead, as in the old treaty, two powers. This caused inquietude in some quarters, where it is thought to add enormously to Great Britain's responsibility; but on the whole complete satisfaction is expressed as to the scope of the new treaty, as far as it is at present known. It is supposed that the new treaty establishes an unqualified defensive alliance between Great Britain and Japan, and it is believed it is not likely that India is included in the sphere of territory over which the treaty aims for the preservation of the status quo.

DISPLEASED ARE JAPANESE WITH TERMS OF PEACE

The kind of reception that awaits definite news will depend entirely upon the nature of the terms. It is generally feared that extensive concessions have been made by Japan. It has been generally expected by the public that there would be a rupture at Portsmouth in view of what was termed Russia's obduracy in refusing the payment of indemnity.

The Jiji says: "An agreement ar-

rived at without a rupture can only mean that great concessions have been made by our plenipotentiaries. A peace concluded upon such terms can never satisfy the nation."

The Mainichi says: "We are disappointed. We only hoped that there would be a suspension of the peace conference. It is impossible under the circumstance to conclude an honorable peace. The fruits of our arms have been lost by weak diplomacy. Japan victorious in the field has been defeated in the conference chamber."

The Nichinichi says: "We feel surprised, and wonder that peace could have been concluded when everything Russia accept the vital demands of our terms. In the absence of official confirmation of the terms it is impossible tions are that nothing will insure

Alleged Election Frauds.

Philadelphia, Sept. 1.—Peter J. Wagner, assessor of the Thirty-seventh division of the Twentieth ward, was held in \$1,500 bail, and Lewis J. Buck, William G. Turner and Lawrence Farrell, election officers of the division, were each held in \$1,000 bail, charged with conspiring to make false returns of the February election. John H. Fullmer, Republican leader of the division, was arrested in the hearing room and held in \$500 bail, charged with intimidating a witness and obstructing justice. The Twentieth ward is in the fashionable section of the city. Testimony was offered to show that men who had been dead for years were voted, and that persons who had not lived in the division for years were placed on the assessor's list and their names voted.

Like Finding Money

Finding health is like finding money—so think those who are sick. When you have a cough, cold, sore throat, or chest irritation, better act promptly like W. C. Barber, of Sandy Level, Va. He says: "I had a terrible chest trouble, caused by smoke and coal dust on my lungs; but, after finding no relief in other remedies, I was cured by Dr. King's New Discovery for Consumption, Coughs and Colds." Why Conger Pesigned.

City of Mexico, Sept. i .- It is reported here that mr. Conger resigned his position as American ambassador to this country when asked to go to China and take measures to stop the boycott, the ambassador regarding the Chinese as more or less within their rights in retaliating against American treatment of members of their race on landing in the United States.

> Greenville, O., Sept. 1.-In sight of 25,000 persons Professor John Baldwin, 37, was blown to atoms here by the explosion of six sticks of dynamite while 1,500 feet in the air. His wife and three children were among the

spectators who witnessed the tragedy. Baldwin has been giving daily exhibitions at the county fair here. He would ascend several thousand feet in the air and explode dynamite at intervals. Thursday afternoon he mounted 1,500 feet in the air. Every eye among the thousands of spectators below watched him until he became almost a mere speck. Suddenly a great cloud of smoke appeared. It hid the airship from view, the spectators supposed, as the balloon had vanished completely from sight. In another moment the sound of the explosion reached the straining ears of the watchers, but the airship did not again appear.

For a moment the crowd waited expectantly, thinking that a view of the aeronaut would be obtained through a rift in the smoke. Then a groan of horror rose from the multitude. The airship had vanished.

Searchers immediately began looking for fragments of the wrecked airship. A half mile away they found pieces of silk cloth from which the balloon was made and splinters of the basket-like framework on which the aeronaut had been perched. Scattered about a 20-acre field were found fragments of Baldwin's body. The distance at which the remnants of the airship fell was so great that the crowds had not seen the fragments

MAY BE CANCEROUS.

When a wart, mole or pimple shows any sign of tenderness it is a warning that bad blood is behind it. Often these places are on the face, hands, legs or other part of the body for years, and give no sign to cause uneasiness, and then with a little rough handling, a slight cut or bruise will develop into a sore that re-fuses to heal, and the sufferer finds himself afflicted with a cancerous ulcer.

About three years ago a blister came on the right side of my nose. It grew speedily in spite of all efforts to heal it up; the pain was not very severe at first, but increased when the sore began to inflame and discharge matter. At times the place would scab over and appear to be getting well, but the scab would drop off, leaving a red, angry looking ulcer. I had almost despaired of ever curing it, when my attention was called to S.B.S., and after taking a few bottles the sore began to gradually grow smaller, the discharge stopped and I was cured.

All but about 600 of the cars have been delivered and the balance will In Which Delegates Are Expressing be in service within the next few

It is likely that nearly as many more cars will be ordered for delivery in 1906. The various car manufacturing companies have been requested to submit bids for the construction of 8000 large freight cars. Some will be of the box variety, but the most will be of the gondola kind. While so me will be constructed of steel all will have steel frames. To fill this order it will require the expenditure of \$8,400,000 at least.

In many instances the new cars are to take the place of the small sizes whice are now in use. It has been deemed advisable to get rid of the 30,000 to 40,000 pound capacity Pennsylvania membership as being cars and substitute in their place opposed to the new rates. He asked cars with a carrying capacity of that the rates be rescinded first and 100,000 pounds. In a number of instances the new cars will replace vacant numbers.

The cost of large freight cars varies. The refrigerator cars cost about \$1550 while the ordinary freight cars, which have steel underframes, will average about \$1050 each. It is understood that the plans for the new car's have been prepared and as soon as the different car companies make a bid the matter will be taken up by President Cassatt.

Big Meeting Being Held Put-In-Bay

Their Views And Trying To Oppose The Plan Of Increasing Rates

Put-in-Bay, O., Aug. 31.-William Wilhelm, representing the protesting delegates of Pennsylvania, addressed the open meeting of the Royal Arcanum today with an appeal for the rescinding of the rates adopted at Atlantic City, urging that the mutual fraternal features of the order be maintained. He referred to the new rate system as a "cold blooded policy." He characterized the appointing of a medical examiner and the agreement to pay a stated sum, as the beginning of commercialism, and illustrated how the step rate proposition would drive out young men. He said if the rate as prior to May, 1905 were continued with necessary increasing number of assessments it would mean the death of the Royal Arcanum. In conclusion Mr. Landis stated he was paid by the supreme regent to appear here and speak.

Judge Mission Norris contended that the supreme council had the power to change the laws governing the management of the order, but not the ratio of rates; no sahe man would enter an order that gave its to name a fraternal order that had lived as long as the Royal Arcanum on a table of rates such as the supreme council had named.

"In a certain church in Colorado Springs." said an Oregon clergyman there used to be a queer old, crusty character, a Scot who was noted for his profound knowledge of the Scriptures. I lectured in that church one evening, and after the lecture the Scot and I and some few others fell into

"I was urged to put the old man's Scriptural knowledge to the test. I was urged to question him and to let him question me. He would get the better of me-that, every one said, was certain-but I had my doubts and, turning to the Scot, said confidently: 'I will try you, my friend, with the grand, leading, insurmountable ques-

tion, How long did Adam remain in a state of innocence? The Scot answered:

"'Till he got a wife.' "Then, with a grim chuckle, he went

"'But can you tell me, sir, how long he remained after?"

Ringer and Wind.

Making a ringer in the pitching of quoits must have been a part of the training which made the English longbowmen so terrible in siege that by gauging the distance and taking the lay of the wind they could send up a deadly volley at the exact angle to drop their arrows with destructive force into the heart of a beleaguered city. Getting the lay of the wind is the first thing to be learned in the noble art of pitching horseshoes. If the wind be contrary, the nicest calculations as to everything else will be in vain. It is only a supreme master of the game, a dazzling genius in its mathematics, who can play against the wind-that is to say, one who, if the wind be from the east, can, by throwing at exactly that degree of an oblique angle needed to make it meet the wind full at the point opposite the goal, may hope to have it carried to the right spot.—St. Louis Globe-Demo-

Native servants in India have the generally desirable, though sometimes inconvenient, virtue of the Chinesedoing exactly as they are told. The trouble is that they seldom use judg-

Lord Roberts during a campaign in India had ordered his man to prepare his bath at a certain hour. One day a flerce engagement was going on, but the servant made his way through a storm of bullets and appeared at his commander's side.

"your bath is "Sahib," said he,

Even a better story comes from an unknown soldier who was awakened one morning by feeling the servant of a brother officer pulling at his foot. "Sahib," whispered the man, "sa-

hib, what am I to do? My master told me to wake him at half past 6, but he did not go to bed till 7."

Bathers Who Sleep Floating. "To fall asleep floating on the waves is not an impossibility," said an Atlantic City life guard. "On the sun warmed billows on an August afternoon I once floated off to sleep, and when I awoke I was nearly half a mile out at sea. I know a Camden man who often takes a floating nap off

"A good many people can't float even though they can swim. They can't a little-it should resemble a very broad V-and all the muscles should be loose, relaxed. It is easy to float. I have taught many children of six and seven years to do it."-Philadelphia Bulletin.

Branding Criminals.

Until the end of the eighteenth century the prisoners' dock in most important English law courts was furnished with an iron upright and collar fixed in front of the person who was being tried. If a conviction followed and the judge elected to include a decree of branding in the sentence that portion of it was carried out upon the spot. The criminal's hand was put through the collar, which was effectually screwed round the wrist and, the necessary branding irons having been previously heated in the courthouse fire, was forthwith marked upon the thumb with the letters which the judge directed to be burned upon it.

One Way to Win Sleep. A writer in a medical journal suggests a new way of juggling with insomnia. His sleep inducer is a chain of magic words so associated in sound or meaning that each suggests the next subsequent-for instance: Ice, slippery; smooth, rough; ruffian, tramp, etc. When sleep is cov recite the list mentally. This is said to be a sure cure. It keeps the mind from rambling from subject to subject, as the mind tends to do in sleeplessness.

The Undesirable Simple Life. Cheese and a cottage complicate life if your digestion is weak and your desire urban. So poverty is a less simple state than the possession of an income, because you are forced, if not into envy, the chief deficiency from simplicity, into struggle with unessential details, with the effort to get hold of something which is of no matter.-London Outlook.

Wonderful Scenic Trip Acres Rocky Mountains to Oregon Exposition

In certian respects the excursions to the Lewis and Clark Centennial Exposition, Portland, Oregon, via C. A. & C. railway beginning May 23d and continuing through the summer, offer advantages never before presented to Exposition visitors. The trip to the Oregon Exposition, in addition to the attractiveness of the extensive exhibits, includes the journey through the scenic wonderland of the Rock Mountains and the Cascade Range, and what American has not looked forward from the days of the geography class in school to the time when those great sights should be seen in reality? The time was never so favorable as now. The trip may he made less expensively than ever. For only a slight difference in fare tourists may extend their trip to San Francisco and Los Angeles. The return trip may be made over a different route, enabling travelers to view much more of the West. For full particulars, fares, dates of special excursions to Portland on account of Conventions, through time and passenger service apply to ticket agents of C., A. & C. Ry.

CATS AND DOGS.

The Enmity That Exists Between Them and the Reason of It. Why does the dog hate the cat? Scientists have been investigating the enmity between these animals, and they believe that the instinctive hatred which certain beasts feel for each other is due to inheritance from ancient state and preyed on each other.

The enmity between cats and dogs seems to be due more to hatred on the part of the dog than of the cat. The because dogs chase her, while the dog hates the cat because she is a cat.

the trail of a cat anywhere near his

Now this enmity is not to be exand of all animals they are the two which should be the most friendly. But the reverse is the case. One nat-

is one, much like a domestic cat in many ways, which hunts dogs by preference. This big cat is the leopard. The domestic cat and her larger rela-

tive, the wildcat, have never harmed the race of dogs, but their great spec kled cousin is and always has been the most ferocious of dog murderers, and the cat must pay for it.

Authorities agree that there is no animal that the leopard would rather eat than the dog. As a result there are many villages in the districts in which leopards are plentiful where nobody can keep a dog. The great cats will not hesitate to break into the houses to seize their favorite dish.

But, says the doubter, the modern dog certainly could not have known leopards in many thousands of years, He has been a domestic pet in regions where there have been no leopards since man first appeared. That is true, says Dr. Zell. But he

points to the fact that dogs have a 25 cts for the round trip, account habit of turning around several times Ohio State Fair. Tickets will be before they lie down.
