

In the News

Now that the coal miners are back to work, the one legacy of the coal strike that remains is the excessively high cost to consumers of electrical power purchased to replace power from coal. Hotly disputed now by the Ohio congress and various consumer advocate groups is the fact that utilities can pass the purchased power cost on to consumers without waiting for a general rate increase permit to cover their own increased costs.

On the eve of leaving on a goodwill tour to parts of South America and Africa, President Carter Monday revealed his urban program to aid the country's cities in distress. Its goal is to do more in the cities with what the government has already given and proposed, including job programs, public works, and grants. Many feel the program faces a tough fight in Congress. Carter has asked Congress to increase substantially its budget deficit.
