KENYON COLLEGE, GAMBIER, OHIO, JUNE 19, 1946

Announce Kenyon To Go Co-Ed In Fall

Hint 'Red' Paper To Be Investigated By Rank Committee

The raising tide of opinion against what appear to be subversive activities on Kenyon's campus has brought about a movement to investigate the suspected parties and the "red" paper PS in particular. As a result of the genuine concern on the part of patriotic students and faculty, the matter has been carefully examined, and according to an unauthoritative source, some possible action on the part of the Rank Committee for Investigating 'De' Activities, is likely.

It is no secret on the campus that the subversive group is being directly controlled by Moscow. One of the prominent editors is known to receive regular mail from the Soviet Embassy and it is reported that the article mentioned in code and includes information directly from the Kremlin. The purpose of the investigation anti-fascist and those suspected of harboring such is expected to send an investigator to look into the local situation. Republican congressmen from the district are in agreement with the Committee. All patriotic students will have the opportunity to sign the petition of the subversive group if they feel themselves in possession of information which would serve as evidence, to be of value, must include definite proof of "pre-war treason." The Committee is anxious to prepare a case against all suspects in advance of the war (with Russia). Those submitting effective evidence will be subpoenaed to go to Washington to testify on all expenses paid by the Rank Committee.

By way of information, the Committee lists the following categories of "pre-war treason" as set up by the Rank Committee. All those who oppose the following by words, thought or action, are suspected of "pre-war treason.":

1. The building up of a stockpile of atom bombs.
2. The collaboration of a larger army than ever before in our history and a larger navy than all the rest of the world's navies combined.
3. Intention of compulsory military training in a time of peace.
4. Allowing officers of the navy to talk openly of attacking Russia before she has a chance to recover from the war and perhaps learn to make her own atomic bomb.
5. Carrying SCOOP

Although the "Collegian" has maintained a strong hands-off policy with regard to the rival paper PS, we feel that this Scoop will interest our readers and those of "PS" too. We have learned on unauthoritative authority that "PS" will suspend publication for GOOD after this Term. We make no predictions and hazard no guesses but we wonder if it could be because of the investigation being pressed by the Rank Committee for Investigation of Anti-Fascists?

Kenyon Prof. Upsets Theory Of Evolution

Per nearly seventy-years, the branch of science as Biology, has been existing under the protective wing of the Wallaceian, partialist, Charles Darwin. This man developed and presented to prosperity a patented theory for deducing the most amazing facts about our purported ancestors from a few bones and bits of hair. This theory, labeled "Evolution" by an enthusiastic Latin student, is an information-old age question: Which came first, the chicken or the egg? And calmly "Crank" Man's feet steps back across the States of Time with such irreproachable arguments as an occupant jet extracted from the soil of Java or a whitened thigh bone taken from the morsels of Egg. In seventy-five years "Evolution" has been questioned often, shaken never. However, last week on a large truck farm outside the peaceful town of Growers Mill, New Jersey, evidence was unearthed that deals the theory of Evolution a mortal blow.

While gathering data for an forthcoming paper on the internal pressure of the pea, the eminent biologist, Lorenzo Q. Carroll (rhymes with barrel) was presented with a full set of twenty of the labourers on the farm. Professor Carroll, puzzled by the gift, sought an explanation from the worker, Fulton Q. Thomas, informing the professor that he had been engaged in digging a new well for irrigation purposes and that the teeth had even worked with the dirt.

Long an opponent of both Darwin and Lamarck, Dr. Carroll immediately saw the possibilities of such a discovery. He could prove that these

"Collegian" To Go On Subscription Basis Next Fall

The College in keeping with the example set by other campus publications will receive no more than three subscriptions in the Fall Term. The decision to go back to the old order of things is made possible by the return of the student body to its normal complement, and the larger interest being shown by the student body in the things the "Collegian" stands for (and a still greater interest on the part of students in the purposes for which the assembly was established) 5. To indicate to a reasonably sufficient number of students will subscribe to the "Collegian" to make further grants by the student assembly unnecessary.

The entire student body will now be taxed to the point that nearly everyone at Kenyon has been working since VJ Day, striving to get back to the good old days and re-establish the financial standing of the student body as an educational institution. This, no doubt, occurred.

Ex-Service Women To Be Housed in New Harcourt Units

The Administration announced this week the completion of plans to make Kenyon a co-educational institution beginning in the fall term. This startling departure from Kenyon's traditional policy is a result of current considerations and expectations. For many years, Administration officials have been considering the question of providing accommodations for veterans among the general trend of other educational institutions.

The Administration will make available to eligible veterans up to 40 per cent of the total student body which will mean about 200 girls at the completion of the program. Only ex-service women will be accepted since one of the basic compelling reasons for this radical departure from tradition is the providing of the same opportunities to veterans -- of both sexes. The girls will be housed temporarily in the units on Harcourt Place but as soon as sufficient number arrives they will move into Leonard and the occupants of Leonard will take up residence in the Harcourt barracks. The Leonard men seem willing and anxious to make this change -- and who wouldn't in exchange for 200 girls on the campus. During their stay on Harcourt the girls will take their meals at Denley Hall instead of Peirce -- lucky girls.

The influx of girls is expected to last late August and the new Dean of Women, Miss Kath-leen Windsor, will be here to welcome them (see other articles on new appointments to the staff). Miss Windsor, who is a graduate of Vassar, will do her best to make the transition as pleasant as possible for all students. She is a natural leader and already has a reputation for being efficient and competent. She has also been able to organize a staff of assistants, and she seems to have a clear idea of what she wants to do. She is an excellent choice for the job.
EAGLE IN YOUR EGG

Gentle reader, if by now you have not suspected a red herring in your heard, then serve us not disillusion you do not want believe anywhere. Because we anticipate a great peak and cry of indignation against the perpetrators of this harsly act we gleefully acknowledge the full responsability for this "Lampoon" isue of the Collegian!

For those who find bedimmed pleasure in being horrified at the thought of such, we restfully comply by announcng that this issue of the Collegian has been the well-chronographed and "radi- cal... fellow travelers..." community, and just plain insidious students who infect the dark dungeons of the editorial room of that inconsequential revolutionary chronicle, P.S.

Per Spexter, that is.

Frankly gentlemen, we have chosen The Collegian, printed entirely from the receipts of ad sales and contributions, and had a hell of a good time finishing our journalistic careers by writing an entire pa per for our esteemed contemporaries, most of which is purely potboiler.

The staff of PS wishes you all a good vacation and hopes for next year's good news.

FRASEN!EN: Be sure to take Dr. H. A. HALL'S HISTORY COURSE

Fragmentary and Sporadic Notebooks acceptable. No "Pink" or "Red" theories taught or tolerated. Course begins Fall Term 1946.

X-CHANGES

GREENVILLE, PA. (P.)

On looking at the various phases of Green Acres College's celebration of her one hundredth anniversary, one cannot overlook her traditions. Green Acres was born in the pioneering tradition of America, and still retains some traditions as old as the school itself. Proud indeed, is the Green Acres graduate who looks back on his school's historic student record, and realizes that this is his heritage.

One of the oldest and most beautiful traditions is the semestery "Beep Night." This is a purely spontaneous affair. When a few students feel the realities of experimental journalism.
