VERBAL DESCRIPTION:

Paste int. burnt

Paste ext. 10g.R. 3/1

Fragment of a scored censer lid which includes a portion of the rim. The paste interior is badly burned and the scored surface is also charred—but the unscored surface is not burnt. Hardness of its surface is smooth on the unburned, unscored side and there are a few abrasions which run parallel to the rim. The scored surface is very rough and jagged, and there are blobs of clay protruding from the surface that have not been smoothed. The incisions that run from the lower left to the upper right were made after those that run from the upper left to the lower right. The incisions are fairly deep at the left margin and then become shallower as they approach the rim. There is no decorative modeling, paint, or slip. No handle scars.
