Verbal Description:

Multi-chambered body with pectoral

This sample includes portions of three chambers, two are stops and one pectoral stop. Central big cone. The chambers appear to be the central spherical sandy chamber located within the torso, the lower chamber which would have opened into the tapered base and the rear chamber which would have opened into a pinched mouthpiece. There is no finished channel into the head area. Large example. Junction between S.E.C & outer skin is visible.
