Standing Figure

This is a new design. The figurine depicts a sturdy figure with an elaborate costume. The figurine includes ~~the~~ lower body with ^{indented} a hand with a thumb + four fingers delineated. The arm supports an incised (feathered) wristlet or possibly a feather sleeve. The bottom margin of the wristlet is separated from the rest of it by a groove. The hand itself is indented, held close to the body, and facing outward/forward. The figure's waist is wrapped by a hand which is represented by ^{wide} raised bands which sit diagonally across the figure's waist. These bands appear to be tied so that two fringed ends hang down between the figure's legs. The bottom tassel has dots on the fringe (possibly feathers or beads). The figure also wears "feathered" leggings. Lines of incision set off by horizontal (over)

Grooves. The face, while fragmented, appears to have been a small oval
medallion. The backs of the protruding areas (like the head) are flat &
smoothed. The back of the figure may have been finished. The
junction between the decorated front face & the smoothed rear areas
have been smoothed and flattened. Intense is fire-colored & rough
