What is it? ladle censer frag. w/ attached strap handle to joiner

Measurements (of pieces; of parts such as feet, openings, projections, etc.)

joiner diameter = 1.2 cm
height = 2.4 cm

Condition (eroded; uneroded; burnt—where? how much?; etc.): Relatively uneroded

no clear burning.

Use wear, marking: —

Manufacturing marks or other info about how it was made: Interior shows fine striations mostly running circumferentially. Some temper was dragged out, scratching the surface. Strap handle is very lumpy and irregular. One edge looks ^{cut} overlapped clay, visible on bowl base. Exterior also striated. The pillar of clay between the 2 parts of the handle pinches in just below the midpoint. It is rough, almost faceted—very crude.

Other interesting, useful info:

~~strap handle ladle censer.~~

Compared to New V. censers, this is poorly finished.
