Specials (describe; cont. on reverse) * There is noticeable mica in the paste, but not nearly enough for it to be TRM.

Comments G-C; LS. PM body sherd VLS, curvatures are 51 cm or greater; A-6 rims LBB, burnished moderately well on int, but striations not totally covered, and a post-burnishing irregular fabric the size of my index finger, with no pits, or pits, striated in sets of parallel lines, on diagonals with peaks roughly 0.2-0.4 cm apart, and a depression uneven in width and depth. * There is a range of variation in body sherd inclusions, with

Comments G-CJ MS
 PNg: 1 jar body HSI. PN rims well-finished.
 SJ: A-2-c jar on its way to being a potstand. SJg: fr indentations very slight/shallow. SJ: A-2-c jar has lip-shoulder handle. COYON: shard is from a cylinder. Used shard might have been an SCRNg, has HSE, on potstands, clay is fine and micaceous, like CANg.

Comments ME; MS to SS
 PN: large inclusions scattered lightly, a bit more brown to orange-brown than usual. CHUL: rim worn on lip; PIT_g: thin burnt interior deposit 2 jars.
 MANG: bowl lips worn; X-7-u fine quality, looks like it should have resist. GFM_{pd} impression on bowl/ridge not applied full area wide suggests TRTT = 12
