If present, broken edges are apparently unaltered:  y  n. If altered, describe:

see comments

The stone is (name, if possible, or describe): dark bluish green to black → darker when polished

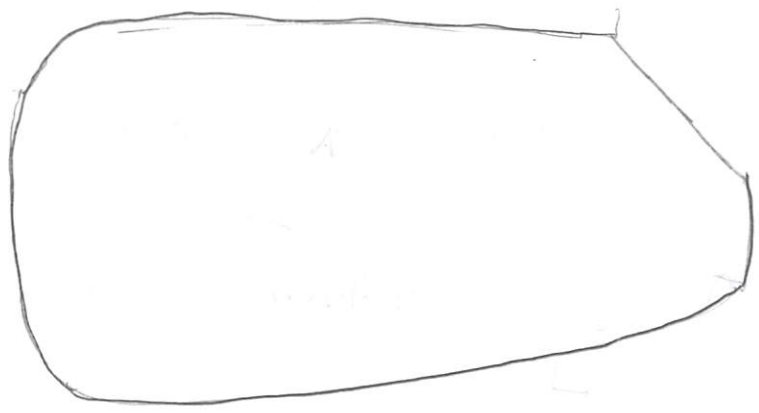

Please draw both a profile and broad-side drawing, to scale, on the reverse of this sheet.

### Comments:

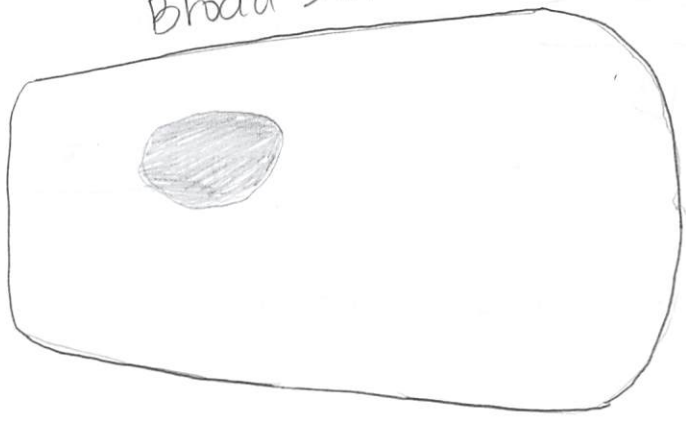

Broad side one has gouges and one large depression that measures 2.0cm in diameter and appears to be pecked in. Broad side 2 was either broken and repaired or the rock contained original flaws that had to be repaired by

Cutting one of the corners off .
