VERBAL DESCRIPTION:

NOTE: this catalog sheet is *not* to be used for sherds that were deliberately shaped; this is for *opportunistically used* items only!

The shape of this object is approximately: triangular - square - rectangular - oval - tear-drop - other (describe):

The margin/edge was chipped to form the item: y - n

The margin/edge was deliberately ground to smooth it: y - n

The margin/edge is smoothed from use: y - n unsure

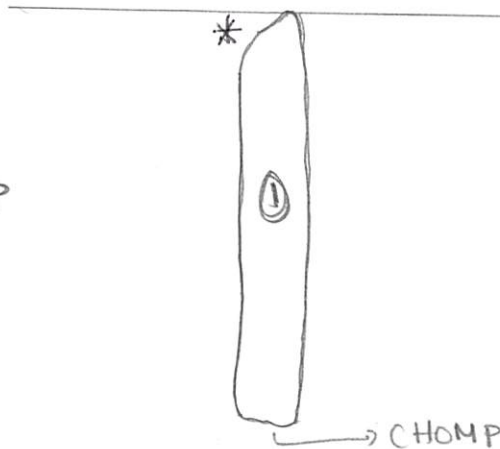

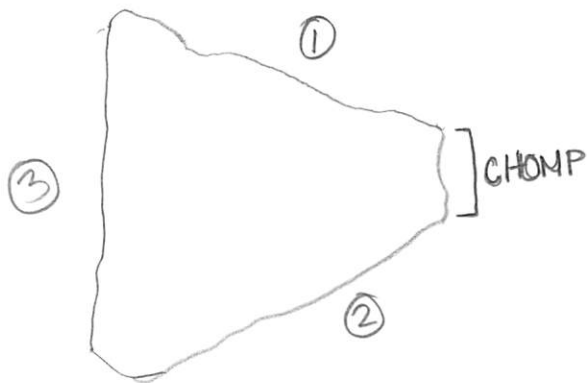

There is other use wear visible: y - n

Trace the item on the reverse, both frontal view and profile, and show where there is use.

Describe the use: There is very little use wear ~~on entire~~ across entire sherd. Point btw. sides 2 & 3 is shaped @ an angle and can be seen in the profile drawing. This part looks most worn. ~~The rest~~ Side 2 is also slightly more smooth than the rest which is slightly smoothed / rounded @ edges.

The type-variety from which this was made is: PN

Comments:

The rest which is slightly smoothed / rounded @ edges.
