VERBAL DESCRIPTION:

NOTE: this catalog sheet is *not* to be used for sherds that were deliberately shaped; this is for *opportunistically used* items only!

The shape of this object is approximately: triangular – square – rectangular – oval – tear-drop – other (describe):

The margin/edge was chipped to form the item: y – n

The margin/edge was deliberately ground to smooth it: y – n

The margin/edge is smoothed from use: y – n

There is other use wear visible: y – n

Trace the item on the reverse, both frontal view and profile, and show where there is use.

Describe the use: shape is very regular, there is not a lot of use wear: only on exterior ~~edge~~ side of edges and very little smoothing on side 2. Shape looks intentional and since there is very little use wear, this sherd looks like worked instead of used.

The type-variety from which this was made is: PN

Comments:

Possibly use wear could be attributed to natural wear or bad preservation.
