VERBAL DESCRIPTION:

NOTE: this catalog sheet is *not* to be used for sherds that were deliberately shaped; this is for *opportunistically used* items only!

The shape of this object is approximately: triangular – square – rectangular – oval – tear-drop (other) (describe): rim sherd w/ side curved in slight arc, curved side has use wear

The margin/edge was chipped to form the item: (y) - n

The margin/edge was deliberately ground to smooth it: y (n)

The margin/edge is smoothed from use: (y) - n only slightly

There is other use wear visible: y (n)

Trace the item on the reverse, both frontal view and profile, and show where there is use.

Describe the use: fits hand well w/ rim (photo) part in palm, side opposite of rim has use wear: looks like it was chipped first for shape and then used but only light use wear, especially present on interior edge, use wear

The type-variety from which this was made is: SJ

Comments:

• there are some orange splotches on exterior and darkened areas on interior striations near rim on exterior

other edges could have been smoothed a little but not likely used
