PROYECTO VALLE DE CACAULAPA
CATALOG FORM

DATE: 6/29/09

LOT NUMBER: 202 Gm/057

SUBSTANCE: Stone

OBJECT: Mano

CATALOG #: 202 Gm/057-1 MULTIPLES? — DRAWN BY: 1 CATALOGED BY: 1

EXCAVATOR: DIAMETER (only if item is basically circular; take average): 7.4cm

HGT/LENGTH: 14.9cm WIDTH: THICKNESS:

VERBAL DESCRIPTION:

This is a whole—~~partial~~ mano. If a partial mano, it is an ~~end~~—a midsection.

The material is: vesicular basalt—other (describe or name)—

In cross-section, this item is: round—oval—square—rectangular—multi-sided. If multi-sided, how many?:

How many working surfaces/areas are visible: 1

The working surfaces/areas are: smoothed only—show use-related polish—can't tell.

The working surfaces/areas extend: completely—partially across the item as preserved.

The working surfaces measure (do each separately): 7.4 x 14.9—covers ca. 2/3 of the surface

The end-to-end shape of this mano is: equal in width throughout—smaller on the end(s) than in the middle. If it is larger in the center, give the dimensions or diameters:

Minimum: 5.7 x 5.7cm

Maximum: 7.4 x 7.4cm

If an end is preserved, the end shows: pecking—grinding—striations—a smooth surface—a polished surface—can't tell.

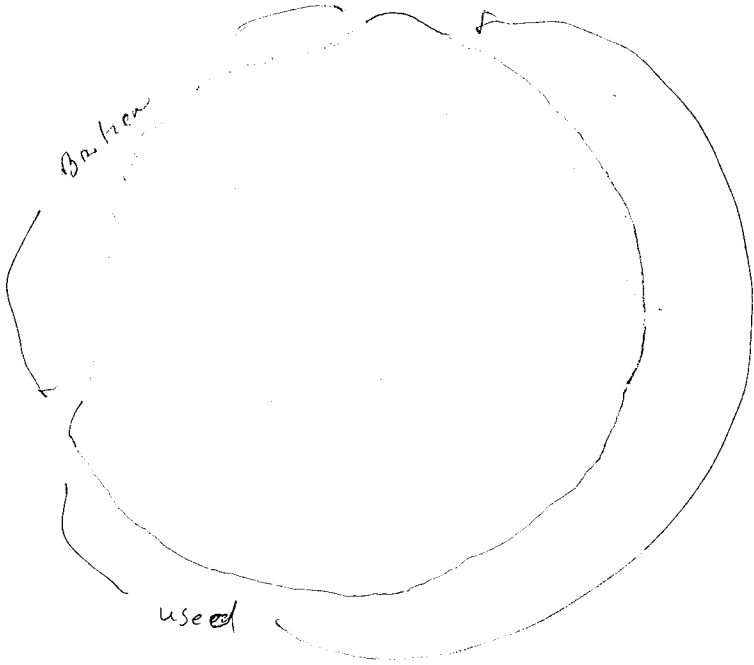

The sides show (mark all that are appropriate): pecking—grinding—striations—smoothed areas—polished areas.

If the item is broken, the broken end: is sharp—is somewhat sharp, but appears eroded—has been battered or chipped.

If the end seems to be battered or chipped, this seems to be the result of: accident/depositional conditions—deliberate use—cannot tell.

Item is: not drawn—drawn (where?) Back.

Comments: About 1/3 of the piece has large chips taken off it, disrupting the continuous extent of the usual surface, as though battered ^{by impact} at some use.

Cross-section
