PROYECTO VALLE DE CACAULAPA  
CATALOG FORM

DATE: 5/28/04

LOT NUMBER: ~~24200~~ 20200/043

SUBSTANCE: Stone

OBJECT: Mano

CATALOG #: 24200/043 -1 MULTIPLES? - DRAWN BY: CATALOGED BY:

EXCAVATOR: DIAMETER (only if item is basically circular; take average):

HGT/LENGTH: 5.6cm WIDTH: 6.9cm THICKNESS: 2.7cm

VERBAL DESCRIPTION:

This is a whole partial mano. If a partial mano, it is an end a midsection.

The material is: vesicular basalt - other (describe or name) -

can't tell -- rounded

In cross-section, this item is: round - oval - square - rectangular - multi-sided. If multi-sided, how many?:

How many working surfaces/areas are visible: 1

The working surfaces/areas are: smoothed only - show use-related polish - can't tell.

The working surfaces/areas extend: completely - partially across the item as preserved.

The working surfaces measure (do each separately): 5.6 x 6.9cm

The end-to-end shape of this mano is: equal in width throughout - smaller on the end(s) than in the middle. If it is larger in the center, give the dimensions or diameters: can't tell

Minimum:

Maximum:

If an end is preserved, the end shows: pecking-grinding-striations-a smooth surface-a polished surface - can't tell.

The sides show (mark all that are appropriate): pecking - grinding - striations - smoothed areas - polished areas

If the item is broken, the broken end: is sharp - is somewhat sharp, but appears eroded-has been battered or chipped.

If the end seems to be battered or chipped, this seems to be the result of: accident/depositional conditions - deliberate use - cannot tell.

Item is: not drawn - drawn (where?)

Comments: Broken at both ends & down the middle. Though heavily polished on its working surface, the vesicles are large and densely spaced.
