CATALOG FORM

DATE: 25 June 2004

LOT NUMBER: 2026I/05

SUBSTANCE: Stone

OBJECT: Metate

CATALOG #: 1

MULTIPLES? —

DRAWN BY: —

CATALOGED BY: 46

EXCAVATOR: —

SURFACE HGT/LENGTH: 27

WIDTH: 22

THICKNESS: 7.24

LEG(S) HGT/LENGTH: —

WIDTH: —

THICKNESS: —

REPEAT FOR MORE THAN ONE LEG:

VERBAL DESCRIPTION: This is a: whole — partial metate. It is a finished item — an unfinished item — can't tell.

It is: a working surface only — a working surface with 1-2-3-4 legs — a leg only.

For a working surface: The surface: does — does not show manufacturing marks — can't tell. If it does, they are (mark all that are appropriate): pecking — striations — grinding — smoothing — polishing.

There: is — is not a clear working surface — can't tell. If a working surface is visible, it is: smoothed only — shows both smoothing and use polish — shows use polish only.

The use area: does — does not extend to the side edge/edges
does — does not extend to the top and/or bottom edge(s) No use area

The area showing use measures: No use area

For the underside: It does — does not show manufacturing marks — can't tell. If it does, they are (mark all that are appropriate): pecking — striations — grinding — smoothing — polishing.

For the edge(s): The edge(s) between the upper and lower surfaces is/are: sharp (relatively) — rounded — flattened — battered and/or chipped — damaged in some other way.

Draw the profile of the edge and surface on the reverse of the page.

For the leg(s): The first leg is: complete — a distal/end portion — a proximal (near the underside) portion.

Other legs are:

On the opposite side of the page, draw/trace the cross section at the base, if it preserved; draw/trace the shape near the junction with the underside.

The leg(s) does — does not have manufacturing marks — can't tell. If they are present, they include: pecking — striations — grinding — smoothing — polishing.

If broken, the broken surface is: unaltered — worn — battered — chipped — can't tell.

Comments:

this is probably not a metate but a basalt cobble
that could have been shaped into a metate if they had wanted
