VERBAL DESCRIPTION:

NOTE: this catalog sheet is *not* to be used for sherds that were deliberately shaped; this is for *opportunistically used* items only!

The shape of this object is approximately: triangular – square – rectangular – oval – tear-drop – other (describe):

? (missing piece) → triangular / Rectangular
chomp?

The margin/edge was chipped to form the item: y - n

The margin/edge was deliberately ground to smooth it: y - n

The margin/edge is smoothed from use: y - n

There is other use wear visible: y - n

Trace the item on the reverse, both frontal view and profile, and show where there is use.

Describe the use:

X - corner of ① + ② is differently worn ②
than the delib smoothing of ②. The margin
is used to a diff angle over the ext.
edge, only extends 1/2 way down
margin, no evidence a interior.

Z - very started, heavy
use had smoothed and
rounded the int edge.
There are also slight marks
marks on
EXT.

The type-variety from which this was made is:

MAP

Comments:

① Carefully Chipped / Angular break, no smoothing
or grinding, rough, w/ ①a little temper peg.

② Delib ground, flat + smooth margin w/
crisp shaping edges. No USE.

y = fresh break / Chomp

* Z continues into y (messy area). w/o y
I can't say whether this was an object of
opportunity or NOT.
