The shape of this object is approximately triangular – square – rectangular – oval – tear-drop – other (describe): longer side is curved

The margin/edge was chipped to form the item: y – n

The margin/edge was deliberately ground to smooth it: y – n

The margin/edge is smoothed from use: y – n

There is other use wear visible: y – n

Trace the item on the reverse, both frontal view and profile, and show where there is use.

Describe the use:

The type-variety from which this was made is ~~Q00~~ CAN

Comments:

- curved edge appears to be margin w/ most use wear on it
- the other two edges more defined minimal evidence of use wear
