VERBAL DESCRIPTION:

NOTE: this catalog sheet is *not* to be used for sherds that were deliberately shaped; this is for *opportunistically used* items only!

The shape of this object is approximately: triangular - square - rectangular - oval - tear-drop - other (describe):

The margin/edge was chipped to form the item: y - ~~n~~

The margin/edge was deliberately ground to smooth it: ~~y - n~~ (scribble)

The margin/edge is smoothed from use: y - n

There is other use wear visible: y - n

Trace the item on the reverse, both frontal view and profile, and show where there is use. (ext)

Describe the use: X is dominantly exterior use, rounding the edge over and smoothing the margin while wrapping around to the int as well, but only slightly. Y - the interior of this point is worn flat and smooth at an angle w/ a rounded int. lip.

The type-variety from which this was made is: SCRN

Z, slightly convex surface where margin is very smooth from Comments: use, w/ slight marks on the softly rounded int/ext

(1) Chipped edges

Y is the most used portion then X in its concavity, at Z is only little use

(int)
