VERBAL DESCRIPTION:

NOTE: this catalog sheet is *not* to be used for sherds that were deliberately shaped; this is for *opportunistically used* items only!

The shape of the object is approximately: triangular – square – rectangular – oval – tear-drop – other (describe): The shape of the object is approximately *hacha* (hand axe) ~~shape~~.

The margin/edge was chipped to form the item: y – n *can't tell*

The margin/edge was deliberately ground to smooth it: y – n

The margin/edge is smoothed from use: y – n *can't tell*

There is other use wear visible: y – n

Trace the item on the reverse, both frontal view and profile, and show where there is use.

Describe the use:

The type-variety from which this was made is: ~~CAN~~ CAN

Comments:

The object has ~~pot~~ unusual potential use areas, specifically because its unclear where they are. It is evident ~~chipping~~ the sherd has been worked. It looks like a pestal/hacha shape suggesting possible use in a similar fashion. The straight edge isn't smoothed over & pretty even in thickness.
