VERBAL DESCRIPTION:

NOTE: this catalog sheet is *not* to be used for sherds that were deliberately shaped; this is for *opportunistically used* items only!

The shape of this object is approximately: triangular - square - rectangular - oval - tear-drop - other (describe):

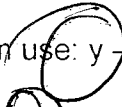

The margin/edge was chipped to form the item: y - n

The margin/edge was deliberately ground to smooth it: y - n

The margin/edge is smoothed from use: y - n

There is other use wear visible: y - n

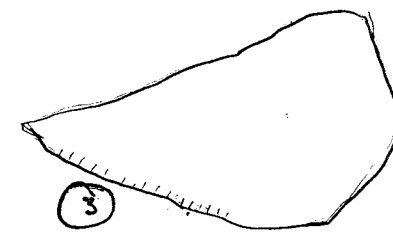

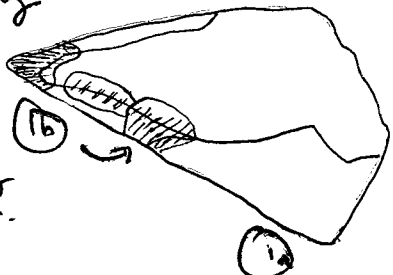

Trace the item on the reverse, both frontal view and profile, and show where there is use.

Describe the use: ①b small patch of differential wear, especially on the interior edge beginning where the "spall" - mark ends. ② the area around the interior side of the point is worn smooth to a point. ③ slight rounding of exterior edge w/ smoothing and rounding of margin.

(ext square)

The type-variety from which this was made is: PN

Comments:

①a large, spall-like chip, no signs of use

② + ①b are separated by a small bit of differentially rougher margin and chip edge.

③ does wrap around and become continuous w/ ③ in the margin.
