VERBAL DESCRIPTION:

NOTE: this catalog sheet is *not* to be used for sherds that were deliberately shaped; this is for *opportunistically used* items only!

The shape of this object is approximately: triangular - square - rectangular - oval - tear-drop - other (describe):

The margin/edge was chipped to form the item: y - n (1)

The margin/edge was deliberately ground to smooth it: y - n

The margin/edge is smoothed from use: y - n

There is other use wear visible: y - n

Trace the item on the reverse, both frontal view and profile, and show where there is use.

Describe the use: (1) only the interior edge is differentially smoothed, the margin and exterior edge are rough and exhibit no evidence of use wear
(2) The point here displays a high degree of use wear, this is the most wear on the entire piece.

The type-variety from which this was made is: PN

Comments:

(1) is ~~not~~ used ~~that way~~, but the edge was deliberately chipped in this ~~round~~ manner w/ the overhang.

(3) + (4) are flat, but rough margins w/ cusp int + ext edges \Rightarrow no use.
