VERBAL DESCRIPTION:

NOTE: this catalog sheet is *not* to be used for sherds that were deliberately shaped; this is for *opportunistically used* items only!

The shape of this object is approximately: triangular – square – rectangular – oval – tear-drop – other (describe):

*Rectangular*  
*Pa (curved chomp)*

The margin/edge was chipped to form the item: y – *n*

The margin/edge was deliberately ground to smooth it: *y* – n

The margin/edge is smoothed from use: *y* – n

There is other use wear visible: y – *n*

Trace the item on the reverse, both frontal view and profile, and show where there is use.

Describe the use: *③ forms an overhang that the interior edge can be clearly associated w/ use that becomes further pronounced at the corner w/ ②*

The type-variety from which this was made is: *④ Although uneven the use on the exterior, the interior edge is pretty smoothed by use, poss in a large (extending) PN scraping surface.*

Comments:

- ① is just a large chip out of the interior, probably an original break*
- ② is flattened, poss ground smooth in its concavity, but the edges display NO use.*
