VERBAL DESCRIPTION:

NOTE: this catalog sheet is *not* to be used for sherds that were deliberately shaped; this is for *opportunistically used* items only!

The shape of this object is approximately: triangular – square – rectangular – oval – tear-drop – other (describe):

The margin/edge was chipped to form the item: y – n

The margin/edge was deliberately ground to smooth: y – n

The margin/edge is smoothed from use: y – n

There is other use wear visible: y – n

Trace the item on the reverse, both frontal view and profile, and show where there is use.

Describe the use: x, smoothed absolutely flat at an angle w/ slight, but almost angular rounding into the exterior surface

The type-variety from which this was made is: PN

Comments:

① = ground deliberately to smooth
x, the interior displays no use on the edge.

* both sides of x appear to be made from chipping, so the angle surface was prob. chipped

② this smoothly rounded margin was delib. ground flat, not-use.
