SUBSTANCE: Ceramic

OBJECT: Used sherd

CATALOG #: BH/12-2

MULTIPLES? no

DRAWN BY: 66

PASTE GROUP (for ceramics):

EXCAVATOR:

CATALOGED BY: 66

MAXIMUM-HGT/LENGTH: 6 cm

WIDTH: 4.1 cm

THICKNESS: 1.1 - .45 cm

VERBAL DESCRIPTION:

NOTE: this catalog sheet is *not* to be used for sherds that were deliberately shaped; this is for *opportunistically used* items only!

The shape of this object is approximately: triangular - square - rectangular - oval - tear-drop - other (describe):

The margin/edge was chipped to form the item: y - (n) (poss (4)?)

The margin/edge was deliberately ground to smooth it: y - n (originally, not for used sherd purpose)

The margin/edge is smoothed from use: y - n

There is other use wear visible: y - (n)

Trace the item on the reverse, both frontal view and profile, and show where there is use.

Describe the use: (1) Both int + ext edges are smoothed and rounded over as well as the margin
(2) "

The type-variety from which this was made is: PN

Comments:

X = fresh break (not chomp)
Y = "

(3) is a start and end original surface that ~~was~~ appears to have originally been ground smooth or cut smooth, but no signs of use wear across main edges or margin.

External surface is entirely unworked
(4) is flat, but rough and exhibits no differential wear.
