## Description/Sketch (with measurements):

Have reached a clay layer, and no artifacts have been found. The soil is very hard and compact. There seems to be a slight depression in the west part of the excavation unit, NW<sub>0</sub> which seems to follow the possible terrace of str. 07.

## Description/Sketch (with measurements):

This is the final lot  
in this unit +  
test pit.

Soil has become more sandy, but remains  
clayey, and therefore compact + hard to  
excavate. No artifacts found in this  
lot either. Have stopped here as the  
architecture of the building seems clear  
from profile of this sub/lop.
