Lot 4 30-40cm cont.

MORE POTTERY SHERDS. THE SOIL SEEMED TO
GET ROCKIER & HARDER TO DIG THROUGH. SOME
WORKED OBSIDIAN BLADE PARTS ⁽²⁾ BEGAN TO APPEAR AS
WELL.

Lot 5 40-50cm

MORE SHERDS ~ PIECES SEEMED LARGER
BARBARIC

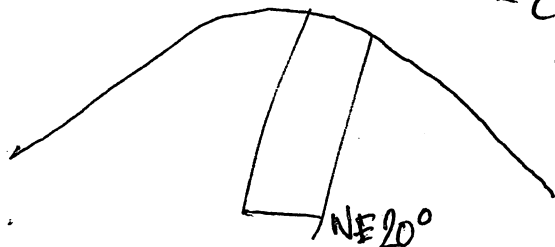

⑨ Lot 6 50-60cm

LARGER PIECES OF SHERDS; BARBARIC
& STARTED TO FIND SOME SHELL. JUAN
SUGGESTED TAKING IT DOWN TO 70cm UNTIL
WE HIT STERILE SOIL. JUST FOUND A PRETTY INTACT
BI-VALVE SHELL (ALMETHA), ALSO SOME BONE
Lot 7 60-70cm

1/31/96

Lot 7 - 0-10 2ND Meter (MEASURED SW)

Although we found a good # of cultural remains from 50-60cm in the first meter - Ed suggested moving to the 2nd meter to facilitate the workers. We may go back to the 1st m later. Sotorino told me that it was much harder to dig... I think for the tumble. Some rocks began to show... No cultural artifacts however. Need to go deeper to see if they are part of the structure - correction we found some (3) sherds

Lot 8 10-20cm

More sherds appear & some rocks - unsure as to what they are now. Obsidian blade flake

Lot 9 20cm-30cm -

Started digging 12 in into the structure - unsure as to whether we have hit any walls - Ed advised to continue working in this way until I saw recognizable walls. Ed guessed that the shell (possibly stendaus from the Caribbean) could have been as an operatory to the building.

Lot 9: IMMEDIATELY BEGAN SEEING MORE POTTERY
JUST IN THE FIRST 12 IN. A FEW OF THE STERDS
HAD DISTINCTIVE RED COLOR. ONE PIECE THAT CAME
UP HAD A HOLE IN IT... POSSIBLE CANDELARIO.
ABOUT 12 IN FURTHER IN WE FOUND A STONE W/ A
HOLE IN IT. THE STONES SEEM TO BE ALIGNED
IN SOME MANNER - ALTHOUGH IF THERE IS A WALL -
I CAN'T SEE IT. IT IS HARD FOR ME TO KNOW
WHETHER I SHOULD TAKE STONES OUT OR NOT. ALTHOUGH
THEY DON'T LOOK LIKE MUCH - AT THE SAME TIME IT
SEEMS THEY COULD BE SOMETHING - DECIDING TO GO
DOWN ANOTHER 10. AT LEAST 24 IN INTO THE MOUND -
TO SEE WHAT'S BENEATH THE ROCKS - WHETHER TUMBLE
OR NOT.

⑦ Lot 11: INTO THE 3RD M AND DOWN 10CM NEAR SW CORNER
NOT MUCH APPEARING OTHER THAN WHAT LOOKS
LIKE TO BE JUMBLE - A FEW STERDS - A PIECE
OF WHAT LOOKS LIKE WAS A CANDOLERO. ED
REMARKED THAT THIS PIECE COULD HAVE ALSO
HAD BEEN AN EAR SPOOL.

Lot 12: WE DECIDED TO TAKE EVERYTHING OUT (JUMBLE)
LEAVING 28 CM FROM THE RIGHT (E) SIDE IN
HOPES OF FINDING A POSSIBLE WALL ALIGNING
W/ FLAT LYING FLAT ROCKS FOUND IN THE 2ND M.
FEW STERDS. FOUND A ROCK W/ A BRIGHT RED
COLOR INSIDE. WHEN I MADE ~~IT~~ A PIECE INTO
POWDER - SEEMED LIKE IT COULD HAVE BEEN USED AS
A PAINT. LA ROCKS @ 10CM DOWN ^{ATHENA FEATURE} ALIGNED @ 20° NW

Lot 13: MOVING BACK INTO OUR 4TH M. SOME
LARGER DIAGONALLY ALIGNED ROCKS APPEARED
IN LOT 12 - SO WE ARE GOING BACK TO SEE IF
THERE ARE ANY MORE ALIGNED THE SAME
WAY BEFORE WE CHANGE THE ORIENTATION OF
THE TRENCH. ROCKY, ROCKY SOIL

 ROCK FROM THE NW TO SEE IF IT POSSIBLY LINES
 WITH ATHENA FEATURE FROM 128D. SOME
 SHEPDS. I THINK THE WORKERS LOST MY BRUSH.
 SOME LG. FLAT FACED ROCKS APPEARED THAT
 COULD POSSIBLY ALIGN W/ ATHENA FEATURE. IF SO -
 THERE LOOKS LIKE THERE IS A HOLE INTO THE WALL
 FROM 50 CM FROM THE E SIDE OF THE TRENCH.
 SHEPDS & BAJA. PIECE OF WORKED OBSIDIAN
 NOW ITS POSSIBLE THAT THERE IS NO HOLE -
 BUT BEHIND THE "HOLE" CONTINUES THE ATHENA
 FEATURE. I THINK WE'LL HAVE TO TAKE OUT THE
 ROCK I ORIGINALLY THOUGHT WAS THE FEATURE
 TO SEE IF THE ROCKS BEHIND THE HOLE CONTINUE
 IN A STRAIGHT LINE. PIECE OF ODDLY DEFORMED

- ② Lot 08 cont: 0-30cm BAS Meter 3 - working in from the 2nd M. ISIS feature was revealed - some more sherds? BASA came out - but in smaller frag. Now we'll continue to work into ^{last} 1/4 of 3rd M - eventually moving into 4th M. Still in 3rd - piece of molded clay. ISIS feature now very prominent w/ a distinctive back. @ 55cm in width - again 30cm BAS. ~ some more interesting sherds - brighter colors - one w/ another piece of clay excised on the top.

Lot 09: up to Meter 4 ~ going to take it again to 30cm BAS - seeing as that seems to be where we have been finding everything.

P-96-98-11

2/04/96

Lot 9 cont: At the SW corner of Meter 4 a large cracked slab ^{GAEA} appeared @ 13 cm BGS. ED noted such slabs at other sites often marked entrances to rooms. Some sherds have come up ~ but in decreasing frequency as we reach the top of the mound.

⑨ Lot 10: Meter 5 @ ~ 20 cm BGS: few sherds & BAJA - ruled tumble.

2/12/96

Monday morning foggy, misty, humid. Some people came & disturbed the site this weekend. I guess it was kids just fooling around. None of our stuff was messed up too much ~ although stakes were knocked out of the ground. Continuing with Lot 10

⑨ Lot 10 cont: Sherds & BAJA ~ what's new? Obsidian 0-30 SW corner, 0-60 in NW corner. A DORINHO WALL, DIANA feature appeared aligning well with GAEA feature

| NAME     | DESCRIPTION                                                                                                                                                                                                                                                                                                                                                                                                                     |
|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CANALOT  | BASICALLY TWO LARGE BOULDERS RELATIVELY ALIGNED. FURTHER EXCAVATION WOULD NEED TO BE DONE IN ORDER TO SEE WHETHER THEY ARE TUMBLE, OR REPRESENT A CORNER OF A DIFFERENT STRUCTURE OR A PART OF STRUCTURE 7, AS DOES THE ANAION FEATURE. ASSOCIATED WITH ANAION, IN THAT THEY LIE SO CLOSE TOGETHER, HOWEVER CONSTRUCTION IS COMPLETELY DIFFERENT WITH THE USE OF MUCH LARGER ROCKS.                                             |
| OZ       | LARGE BASAL WALL, NOT WELL PRESERVED HERE, BUT PREVALENCE OF LARGE AMOUNT OF LARGE AND MEDIUM SIZED RIVER COBBLES INDICATES THAT THIS WAS AN IMPORTANT STRUCTURAL WALL. THIS FEATURE REACHES DOWN MUCH DEEPER THAN ANAION AND CANALOT, INDICATING EARLIER CONSTRUCTION. THIS FEATURE IS ALSO IRREGULARLY THICK. THE WALL IS POSSIBLE THREE IRREGULAR COURSES THICK, AND THERE IS NO PATTERN FORMED BY THE ROCKS IN EACH COURSE. |
| ATLANTIS | REMAINS OF A SUMMIT WALL OR DOORWAY, ONLY ROCKS ONE COURSE THICK, INCLUDING ONE POSSIBLY CUT STONE, DIAMOND SHAPE BLOCK. AN INTERESTING POINT OF NOTE IS A SOIL CHANGE FROM TO THE EAST OF THIS FEATURE, AND TO THE WEST (AN AREA BETWEEN ATLANTIS AND OZ). BETWEEN THESE TWO WALLS, SOIL IS NOTICEABLY VERY GRAVELY SANDY CONSISTENCY.                                                                                         |
