June 15, 1985 (Saturday)

tom for officials at 9⁰⁰ a.m. (didn't really get under way till almost 10...) - moderately well attended (ca 30 people?)

p.m.: drew last of D85-7-9 (Op 3H/8H.6) added 2-4th to D85-7-5 (Op 3F/8H.2) completed south 1/2 of Op 3F (access trench)

June 16, 1985 (Sunday)

Tom M. & I drew D85-7-10 (Op 6E, 8H 20) in a.m. object photo in p.m. (photo list = D85-6-25)

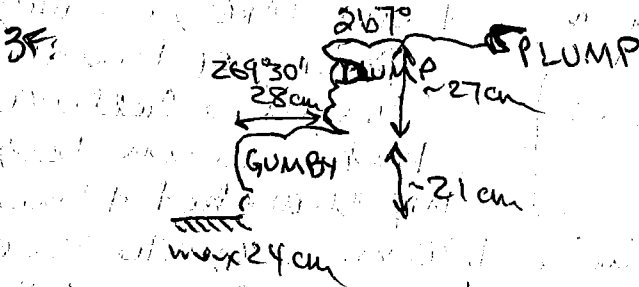

85-7-118
6/14

Brenda worked on plants till 9¹⁵ when she ran out of newspaper (her blotter paper was lost in the between season fluff)

she's washing again

3G: beginning backfilling

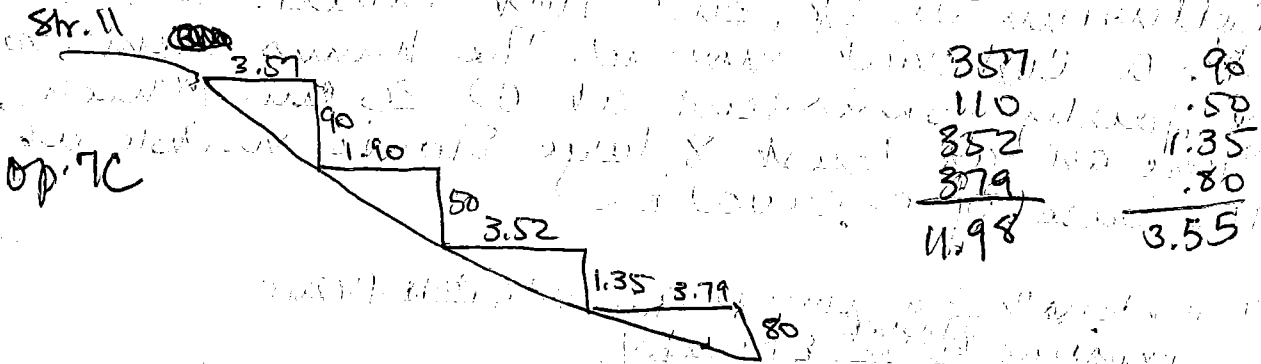

took photos 85-7-T/2 Op 3E, PONDER from @ south in west section (PSB 85-107)

3H: cut through to S wall of Str. 6 - 2nd adobe & an ash lens, plus sherds but no evidence of intact architecture

3D: Str. 10 N wall = 110° - standing water, ~~at base~~ Leopoldo bailing now

3F: backfilling west of the lone wall feature

6G:

1M.

2.30 m.

6-G- Soil seems to be the usual brown silt. More Stone & adobe @ 40 cm. below surface - No depth. 60cm. apparent Soil 15cm. under water changes.

There seems to be a lens of Stones + small Stones @ 4 cm. across and the lens is @ 20 cm. below the surface. Plaza level?? Very muddy. Humus layer ends @ 30 cm. below surface.

PSB85-7-144
6/13-14

took photos

(PSB85-102/104) 85-7-~~8~~ 1/6 stone courses of Str. 1 (news not taken in 1984)
(PSB85-105) 7/8 sherd washing

Op 3H worked on D85-7-9 all morning
workers dismissed at 1:30

Op 3G worked on D85-7-3 1:30

Tom & Marie worked on D85-26-25 Op 5L (Str. 19)
Pat & Ed completed D85- - Op

150 94° no sign of rain - high clouds only
3E wall of substructure (east side of POND) is 73-74 cm
thick and as high as from surface of pond to
base of plaster on section (← east facing of
WONDER)

took photos

(PSB85-106) 85-7-~~8~~ 9/10 Op 3E circular feature from above (E to right)
11/12 Op 3E x-section WONDER wall
& POND floor, w/ 1/2" plaster
visible at right; scale 50 cm vertical

3:00 pm gave a slideshow / talk for workmen
at ITAH house

lost my square trowel around lunchtime...

June 14, 1985 (Friday)

843 - 83° steamy & overcast

rained a lot here & in SB (SB from ca 5 pm to 10:30+)

major collapse in south face of 3E

more collapse in N & W sides of 3F base pit

standing water most places

3E: Margaux & Jaime clearing collapse (backfilling into 3G)

3F: Rene & (?) cutting through RUMP to PLUMP to see if
water is also a step (i.e., 2nd-4th)

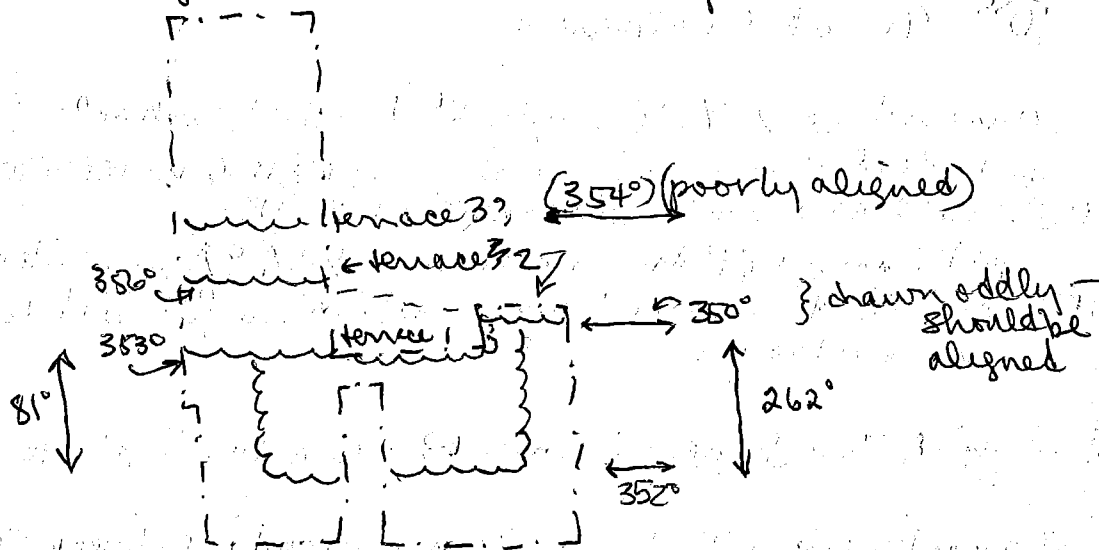

3H: Sergio cutting 6-2nd to seek any 6-3rd (E 1/2 of trench only)

P85-7-742
6/11

Izaguire & Rodriguez stopped by, let Brones
go / hired Leiva
gave us the name of a man in town who may have the
1791 Tenoca map (a copy)
"Prof Carlos Rivera vive casa de esquina frente a la casa
familiar Bueso Rodriguez a inmediaciones de los
suzgados - él tiene el mapa de Tenoca, 1791"

Sergio & Jorge sent to help Leopoldo clean for photos

took photos 85-7-Q 7/8 PSB85-93
(then backfilled) Op 11E, from SE, scale 50cm
85-7-Q 9/10 PSB85-94

rained out at 2⁴⁵

back filled today: 13A, 13C, 6B

Prof.

Abqdo

Miguel Rodriguez & Miguel Izaguirre Fallos came to investigate the break in at Mario's ex-house last Thursday - came over to our house ~~6/10~~ 6/10 evening night to discuss that:

- 1) Juan Briones is being let go (we'll hire him for these last 2 weeks)
- 2) Pedro Leiba will be the new guardian (day & night for L175/month + right to sell avocados from the property)
- 3) IHAH will put ^{barbed} wire across river side of property & cyclone fence along road side
- 4) IHAH will ask the road crews to improve the access across the ditch
- 5) Izaguirre gave Nancy Black ~~a~~ a letter of introduction to Comayagua archives & confirmed there's a good deal there (esp on Tencoa?)
- 6) Izaguirre knows of a 1791 map of Tencoa which he will try to locate here (or if not here, definitely in Tegucigalpa, for John/Nancy/Julie)
- 7) Rodriguez asked us to check ("authenticate") a collection here belonging to a Diputado del Congreso

P85-7-138

6/10

Recurring exco:

need to show

shift cut has orientations; uncut has not

13B?

5M Humus/H. brn/colluvium

5L consider cutting thru summit

7H need orientations on earlier

7C need orientations

plan pt 5 - stakes on str 17 E in Grp III plaza have been shot in - str 17 plan pt 5, none others have been done for Group III

7H stake shot + final features

op 11 self stake is on summit of str 12's N platform

Op 6 B - Soil amend, found ca. 0.56-0.70m w of the SW corner, extends ca. 0.10m n. of the S section, ca. 0.35 m below ground surface at this point, S. side of the trench. Found while cleaning.

8C - southern platform/outlet - cut blocks

Tom & Megan drew Op 8B (D85-26-23)

Megan ill - home on bus call am.

Tom & Marie drew Op 11E (D85-~~26-23~~)

37-1)

~~3E: Margarita & James's son cut thru bajareque layer
3E/42 termination of this lot
3E/44 beginning to cut below 3E/42~~

30/21: Seracino & beginning : a.70 below top of LUCY to take HALL
EOP earth matrix to level of LUCY

June 7, 1985 (Friday)

8³⁰ 9⁰ - hazy w/ a few clouds

Back at work again after nearly 2 weeks absence to attend my mother's funeral and begin to settle affairs

Ed & Pat conducted excavations at Ovalojunto in my absence

None in Group I, but see their notes for: (27 subops)

from Ed's of cards

- 5K Str 17 west
- 5L* Str 19 east & axial

cards
* = need data on final plan dimensions

on 7/14/85
in park
w/ Pam

p) broke into Mario's former house (upstairs, ok house) last night - removed wire panes, red - little there to steal but tried to take

P85-7-134

5/23

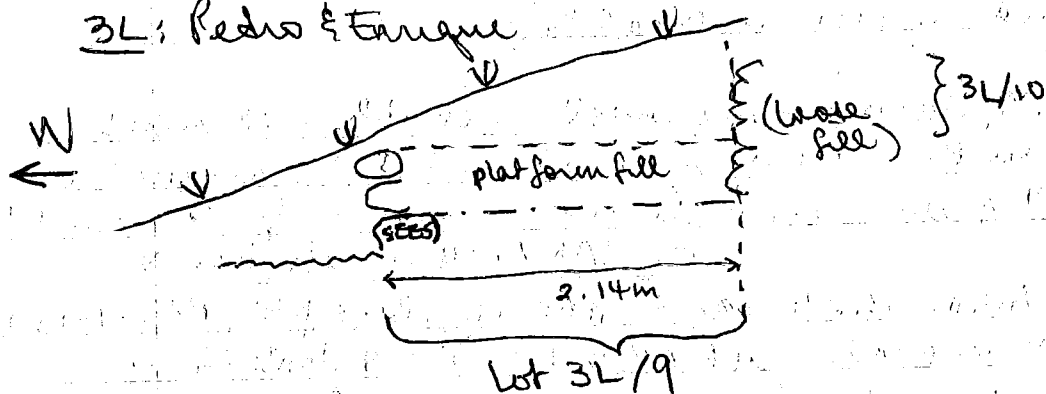

3F: René & Sergio extending 3F/28 farther southward, as I don't want to cut down at RMP till I can take a 2 1/4" record photo (Pat & Ed have the camera this morning)

3H: Ulises & Efrain removing fill block that begins 16 cm N & 66 cm below marked stone in section (Raigo #6) (← not certain of identification here - but will draw section today so can check)

3H/17 material from this cut - ^{down} to level to which 3H/16 was taken yesterday

STR 6 - see P85-7-123, 85-41-16 for relevant plans

3L: Pedro & Enrique

3L/10 cutting east from yesterday's stopping point (at 2.14 m east of SEES toe) but only that upper part inferred to be above SEES' terrace top

3Ø: continuing to remove to 2b to level of 3 - see P85-7-132 sketch plan

3Ø/20: still in this lot

★ Hiring 4 more men for Monday: (to advise current workers at noon)
Cristobal Sahillon
Juan Pablo Paz Piñeda
Julio Cesar Monterroso
Marco Tulio Piñeda

3E/102 7 bags of bajareque thus far - deposit ~ 15 cm thick with ash lens beneath - some bajareque flatsided, some with pole impressions - str collapse

5/22

3G cutting under BLUE, southward - so far (to S side of BLUE) the PARK "cap" seems consistent to overlie earth fill - thank heaven!

3G/38 this lot - ~~is~~ = 3G/35 contextually (PARK) without admixture of earth-fill materials contained in 3G/37

3E:

3E/40 reached 1.65 m below surface & I stopped them (no need - at least now - to reach plaster floor)

3E/41 cutting through plaster topped deposit in south end of original excavation, south of MAX/TAX - ends about at limit of original excavation - gravelled about 20 cm thick

3φ has reached 1.95 m below NE corner - silty matrix (not clayey) with some colluvial-like inclusions, but not basal colluvium yet - but should be near according to elevation

2¹⁰ 100°

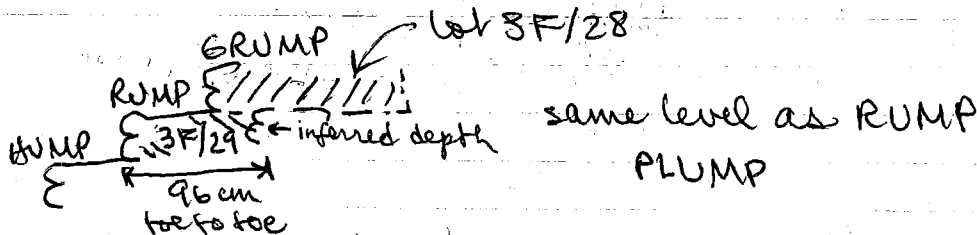

3L: seems to be a more plasterly (?) floor abutting W side of SEES (as vs. gravel/pebble piso seen in 3B) - am avoiding cleaning it now till we get an influx of trowels and can do it carefully - SEES seems to be a low terrace, at least 50 cm wide (E/W) so far - still clearing eastward toward DVD - ^{later} NO, there is a wall, at least (& probably only) 3 courses high, now fallen but visible in basal course +

3F: worked on D85-7-5 (section, Str. 2) till 3¹⁵ (ca 40 mins)

3¹⁵ - 99° & breezy

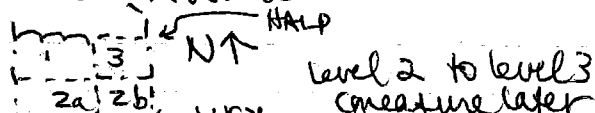

3F:

3F/29

3A/16 cutting through R#8 ~~to~~ northward

3φ/20: cutting just ab from

5/22

Pedro & Enrique

32: cutting through tumble west of DUD:

- downward to seek alley floor
- eastward to seek wall line

34/9 materials from tumble removal

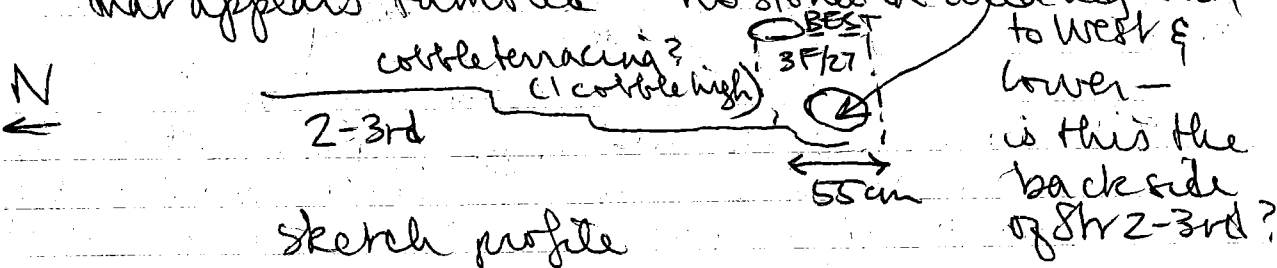

30: Jeracimo & ? cutting down north of (in front of) LINUS to seek colluvial layer here

30/18 materials from this cut

3E/39

3E: removing 3E/39 suggests ^{sloping} all lens was a deposit followed by collapse (?) of bajareque (wall & roof?) and suggests BANANA is a wall base rather than a platform edge (or perhaps re-used subsequently as the latter)

3F: at base of 3F/27 (as defined on P85-7-129) have encountered large bouldery stone (ca 40 cm diam) that appears tumbled - no stones in area adjacent to west & lower - is this the back side of str 2-3rd?

sketch profile

3H/16 cutting thru Razo #8 to seek earlier str on this side

→ 3H/15 yielded sherds & 1 thick obs blade

↖ & at base, some stones tumbled (from 6-2nd?)

↖ 40-70 cm below SE corner of excavation

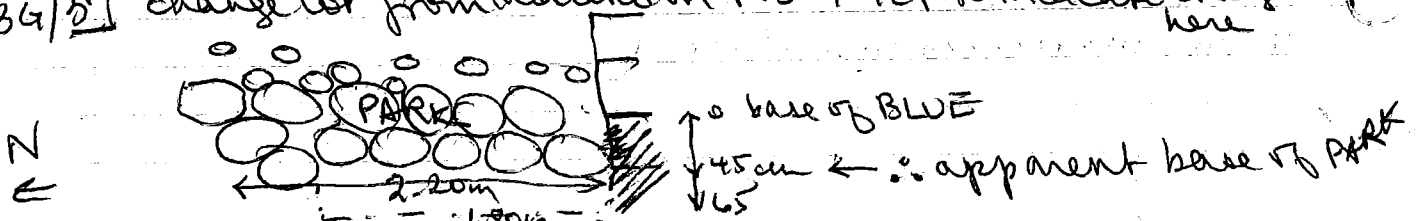

↖ 50 cm below top of R. #8

approx section size

34/9: revealed basal wall line - BLOCKS (as in 3B in 1983) is this from 1-1st? - call this SEES wall - continuing to remove tumble over & east of SEES

3G

34/37 change lot from indicated on P85-7-129 to indicate change here

FOS-7-128

4/25-5/24

April 25 - May 3 (Thursday - Friday)
left for New Orleans - personal

May 3 - 5 (Friday - Sunday)
San Pedro Sula

no workmen
employed at
Gualojquite
4/27-5/19

May 6 (Monday)

Reviewed excavations - no substantial rain had fallen in period of absence, and no apparent vandalism, only 2-3 stones had fallen (accompanied by a few others) ^{the Japanese team working at La Tichada}
Ricardo Aguirre visited - students & Foncho & Julie & Sylvia went on to Comayagua - Ed & I stayed to talk with Ricardo, showed him the lab & the Gualojquite excavations - he seemed pleased with the state of progress - also toured Lopez house, which he would like to convert into a local museum - we urged him to hire Pedro Leiva as watchman if/when he could, as Don Pedro knows the house & grounds and seems more industrious and reliable & locally trusted than Juan Briones

May 7 (Tuesday)

Ed, Celeba & I drove to Comayagua (via Taulabe) and toured Yarumela (such as it is) while the rest of the staff (having seen Yarumela in the morning) went on to Tenampa.
Everyone joined up again in Tegucigalpa

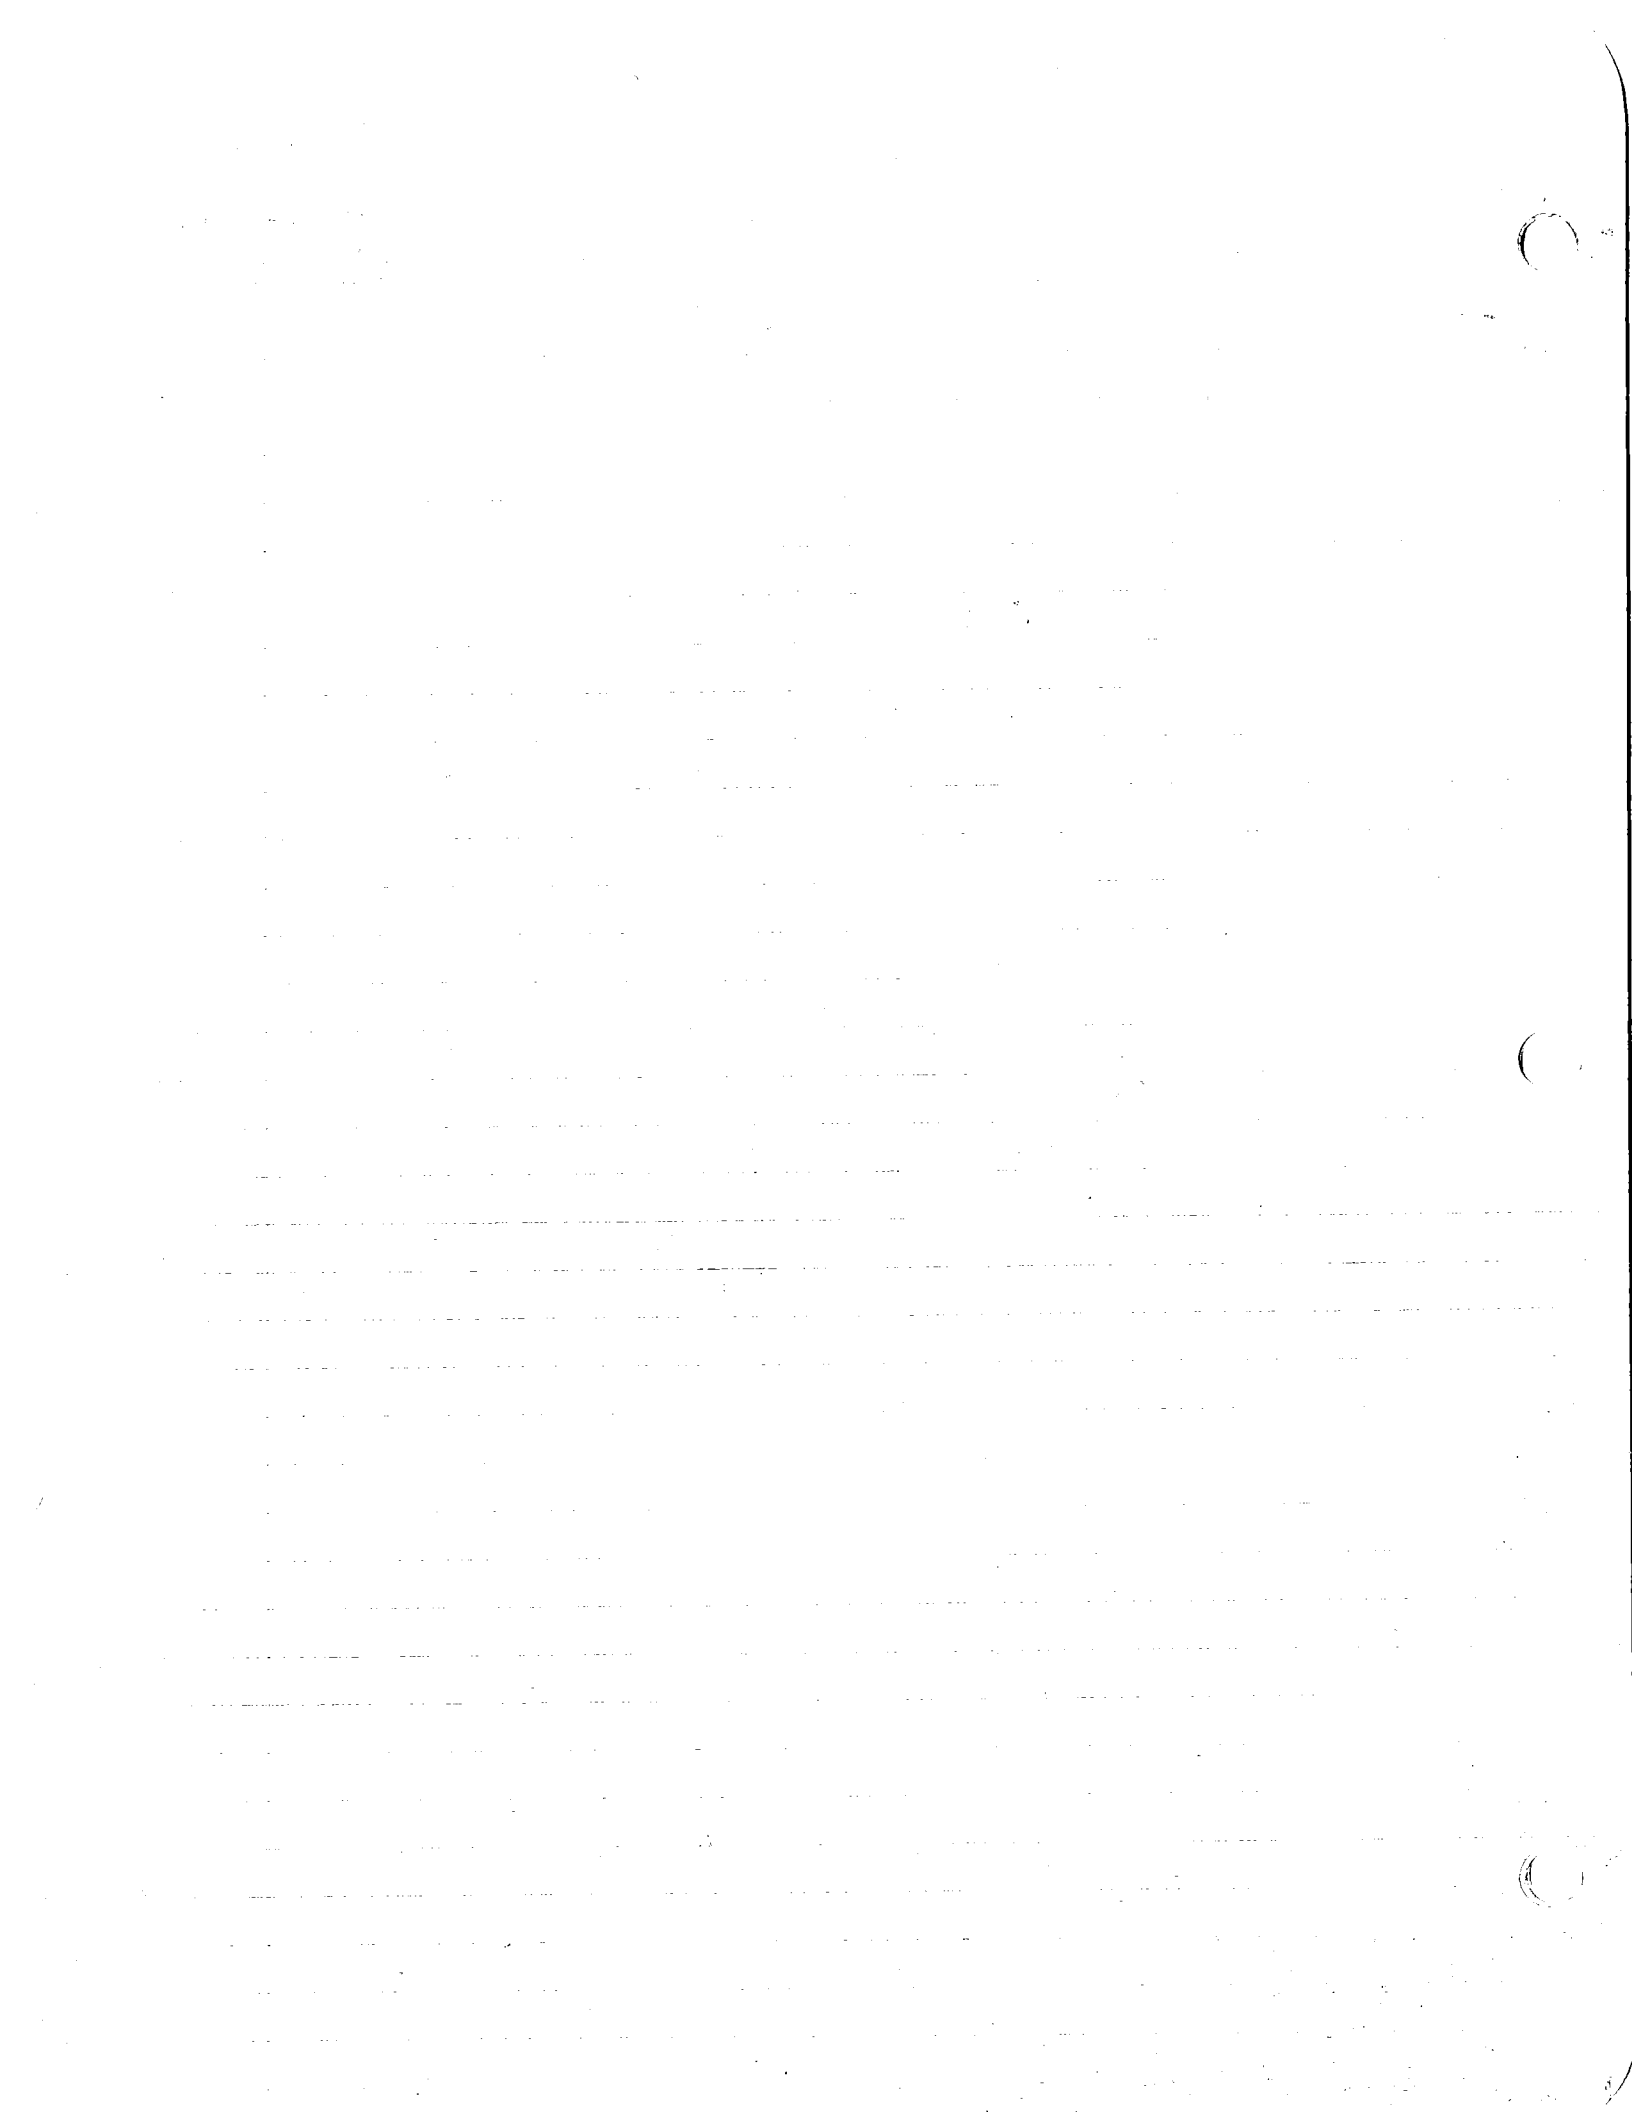

May 8 - 10 (Wed - Friday)

Ran errands, worked on preliminary short informe, which was turned in on 5/10
Julie acquired Catastro maps (1:10,000 scale) for our area
Migration arrangements taken care of (took till 5/13 for Foncho to complete)
I left for the U.S. 5/10

May 10 - 19 (Friday - Sunday)
Harvard interview trip

May 20 - 21 (Monday Tuesday)

Departure (from Tegucigalpa) arrival & baggage retrieval - reached SB

(see P85-7-125)

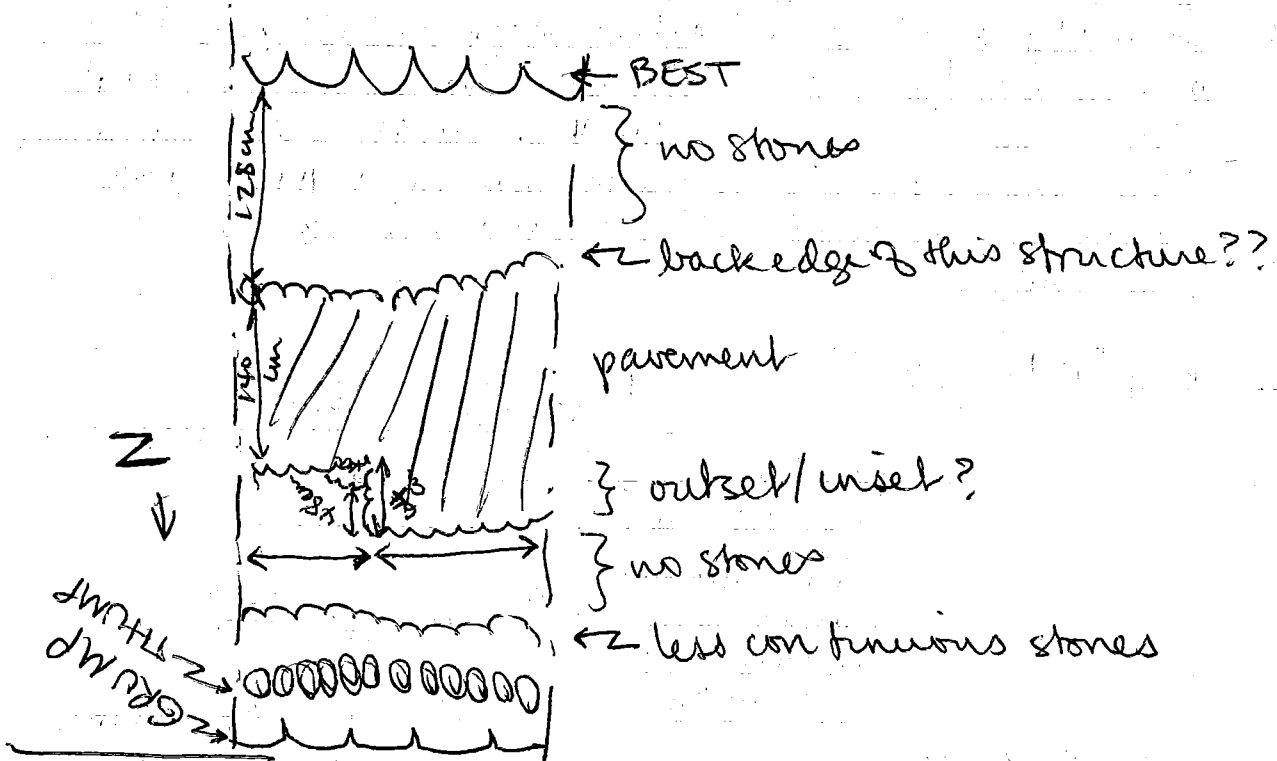

P85-7-122

4/23

39: 258 cm north of north face of BLUE, in lot 39/35, change in soil to fine silty brown matrix FUSCHIA

3F:

took photos 85-7-Ø 3/4

Blue river at bend, looking west - to show how low it gets & show cobble beds

P85-7-120
4/23

April 23, 1985 (Tuesday)

75° 81° very muggy & the sky is hazy from burning - still blue but altogether very April like

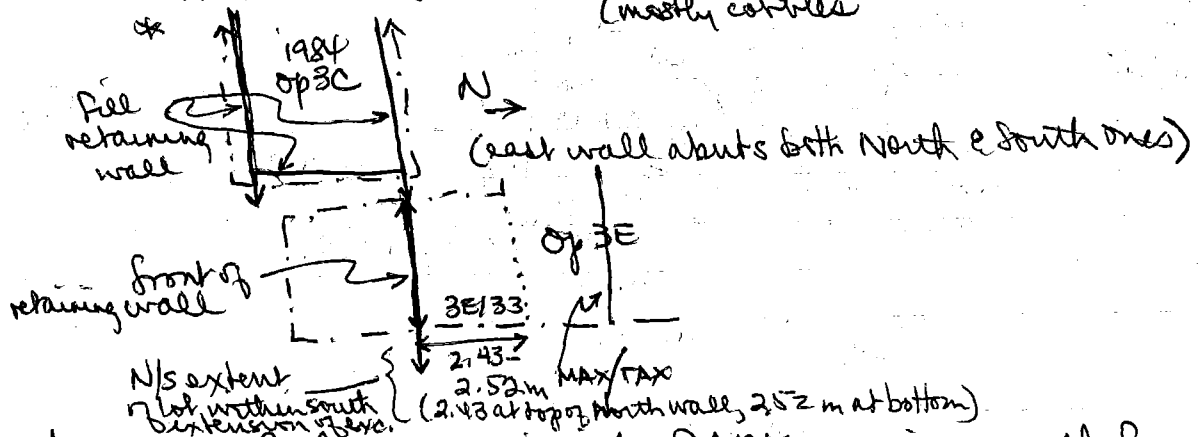

Folly & Valerie both here today
Plumbing in Galeras was finally fixed yesterday

3E: Margarito & Jaime Jr. travelling interface area between TEND & BANANA to reveal extent of plaster material & clarify relation of the 2 features

3E/32: materials from this cleaning

Lupe & J Jorge cutting through ~15 cm (77-93 cm below surface) down to level even with main part of trench

3E/33: separating material behind north retaining wall (mostly earth matrix) from that south of same (mostly cobbles) ↑ from 1984 exc*

3G: Moreno & Rufino cutting into PARK, moving north from BLUE
3G/35 still in this lot (defined P85-7-114)

3F: Sergio & Rene removing/travelling final cap linking cobbles behind RUMP/GRUMP to them
3F/24P: still in this lot

3H: Alicia & Efrain still cleaning stones
3H/13 still in this lot

3L: Pedro & Enrique clearing down to base of DUD
3L/7: still in this lot

P85-7-118

4/22

15⁰⁰ m. 94°

3E: have cut back to the 3F/23 area with no further step up, so RUMP/GRUMP appears to represent summit - now to remove final 5-10 cm cap they left, to seek back wall for summit of this version

3F/24 shell in this lot

re: 3E/28 → BANANA wall is flecked with specks of white - plaster? matrix

took photos 85-7-Ø 1/2

Op 3E BANANA wall, north face, scale 50cm

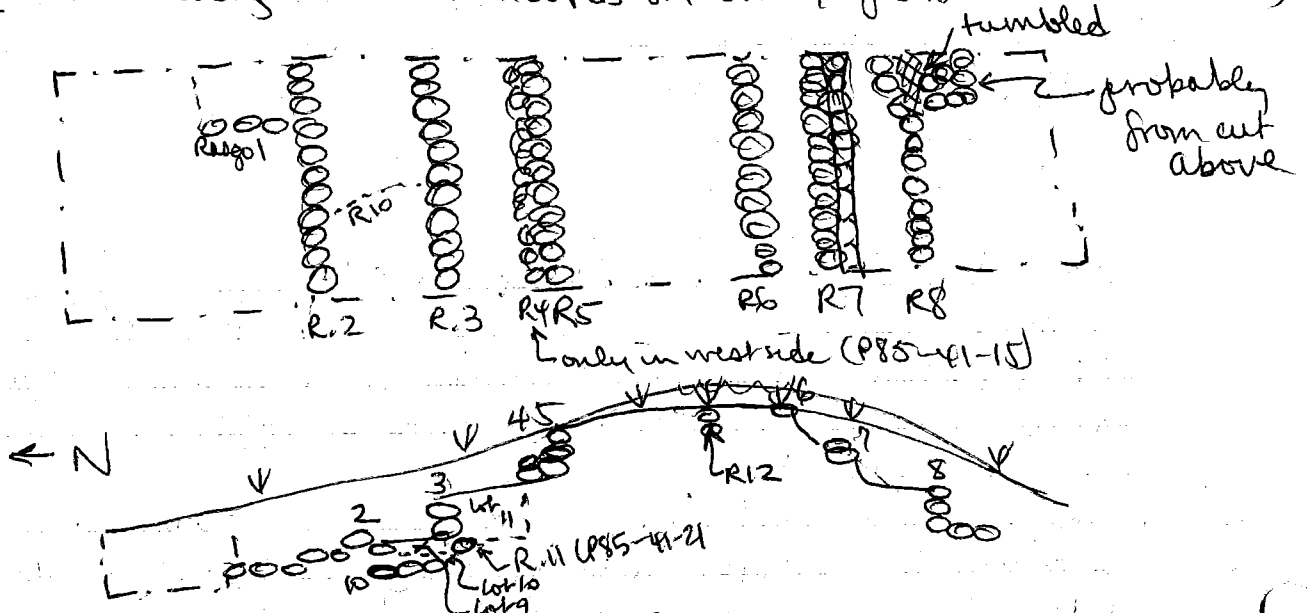

3L: partial collapse of north (section...) side of trench, west of MILKY - cleaning that now

15⁰⁰ 94° & windy (breezy with gusts)

3E: Jaime Jr & Cristobal removing BANANA wall

3E/30 materials in matrix of BANANA wall
shells, Bone

3H Rereading Foncho's notes on Str 6 / Op 3H (cf P85-7-64)

P85-7-11b

4/22

April 22, 1985 (Monday)

75° 81° high overcast cloud cover - humid, air full of water, but no rain - type clouds (cumulus)

no rain over the weekend so no trench collapse from that but VANDALISM did occur

Vandals: - Op 3E: hole dug in base of 3E (162.80 - 163.00 m. elevation; 1.03 m. N/S x 60 cm wide E/W on west side of trench)

looks to be just cobble fill

- Op 3G: removed/disrupted stones of north face of BLUE, ca 70 cm from west side of trench (essentially area to right of meter stick in 85-7-N11/12), top to bottom - looks to be just wall fill announced there'd be a 3 week hiatus in Gualiquito work (4/20)

no one but workmen here with me today

(for Jaime)

3E: Jaime Jr & Cristobal (for Margarita) continuing down through fill behind BANANA wall - beginning at 162.92 m elev at north side of BANANA & 163.00 m between 23 & 24 m south in overall trench

3E/28: material from this fill

3E ~~3E~~ J Forge (? in for Lufe) continuing down in (fill) beginning 60 cm below surface (today's beginning point)

3E/29: material from this matrix

3G: Moreno & J Victor removing west half of BLUE wall

3G/30: materials from removal of BLUE wall

3F: Sergio & Rene removing stones that underlay WAND, to reveal more of features that may be associated with GRUMP/RUMP (P85-7-114)

3F/24: still in this lot

3L: Enrique & Pedro continuing down in front (west) of MAX, to seek next terrace level down

3L/7: still in this lot

3H: Ulises & Efraim removing Rasgo #12 & Rasgo #6

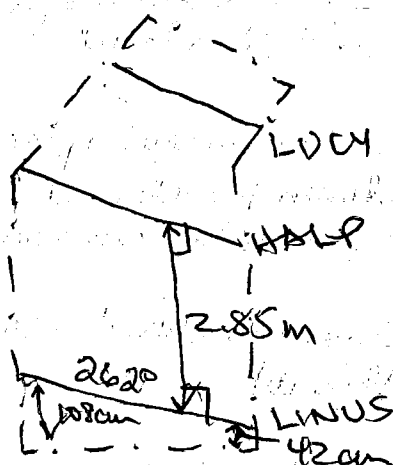

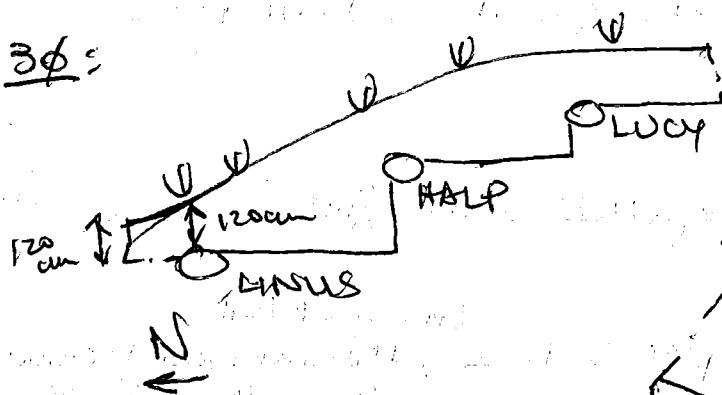

3H/13: materials recovered in this lot

P85-7-114
4/19

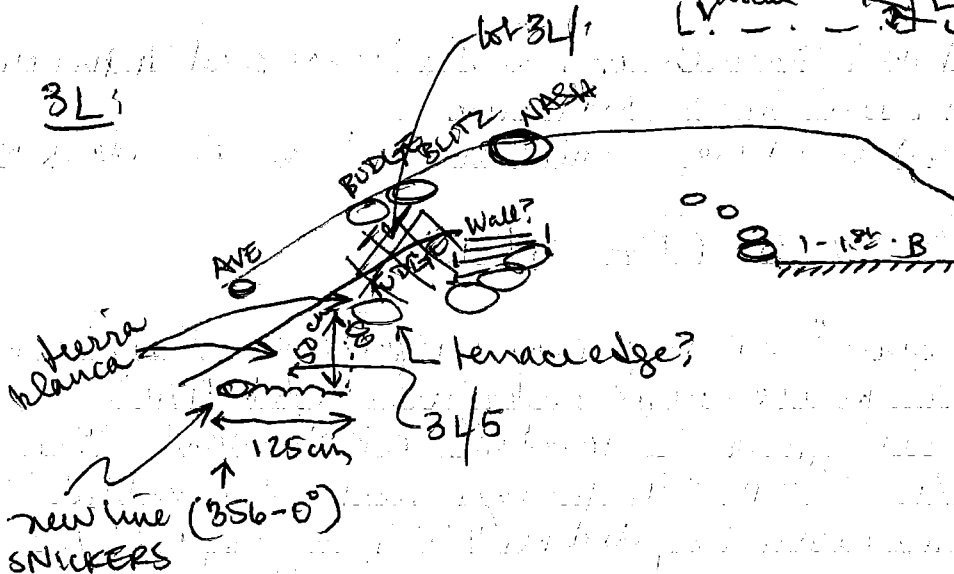

- seems to be

3G: BLUE north side, fully exposed, to max ht of 1.20m
3G/35: cutting thru fill of PARIK, which abuts base of BLUE

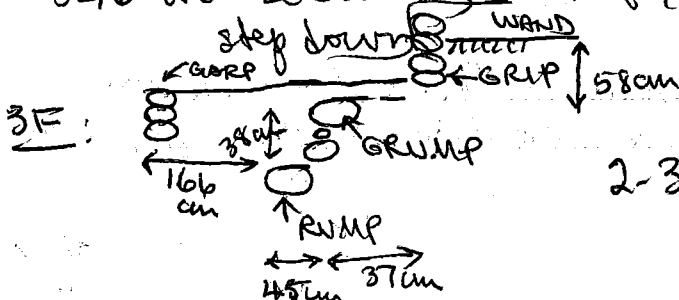

3G/34: Some of this may properly belong in 3G/35 but better to mix this way than the alternative looks like ulua & other polychromes here

3L:

3L/6 will be cleaning west of & down from SNICKERS to seek next

2-3rd?

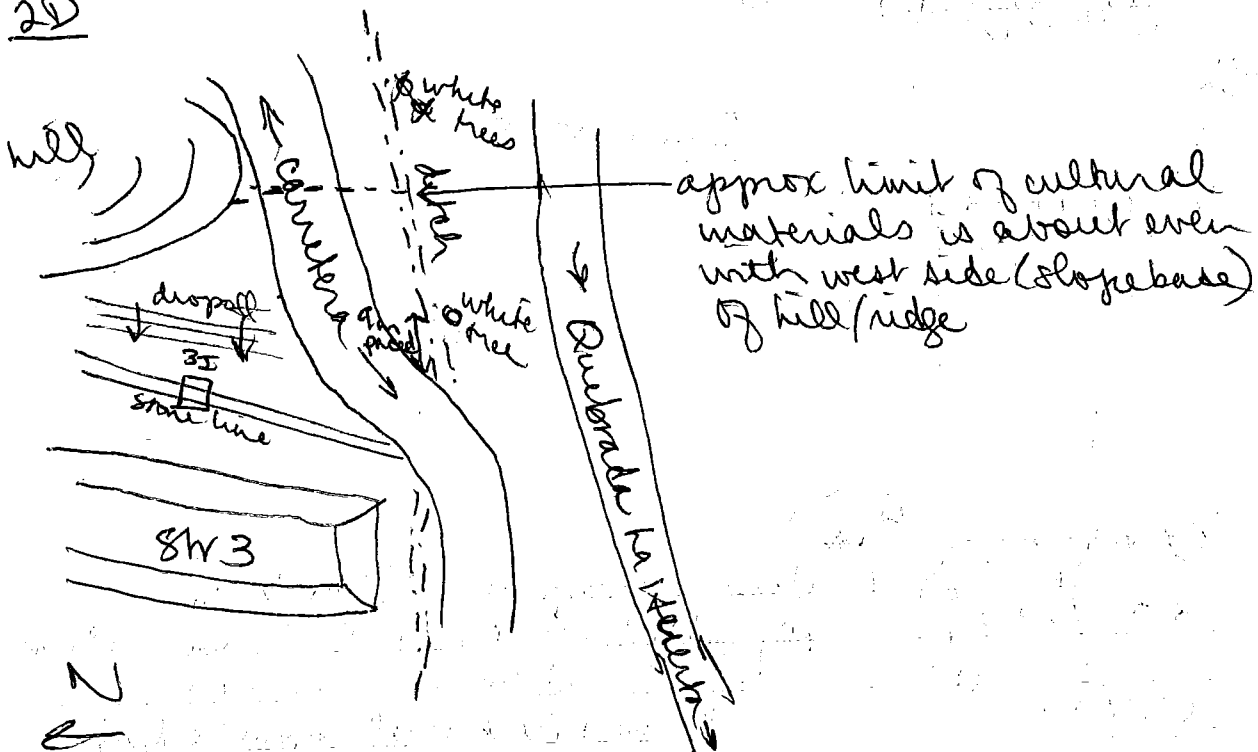

P85-7-112

4/18 -
4/19

3L/4: materials from tierra blanca described on P85-7-109 ()
● some put into 3L/3 maybe from west of western line (FUDGE)
that's below BUDGE

3F/245 cutting from GARP south, removing GARP fill
back to position of GRIP

2D

April 19, 1985 (Friday)

75° - 82° muggy & ^{very} overcast - rain heavily again in early morning hours, and was still raining in Galeras when people left to come to breakfast

No one with me (besides workmen) now.
Foley & others (Valerie, Rick, Tom, Dan, Tom) off to Copan
Sylvia helping Julie recover the rest of the burial they found yesterday

Foncho at lab house with Tulio, to await albañil and/or other repairers for the broken pipe

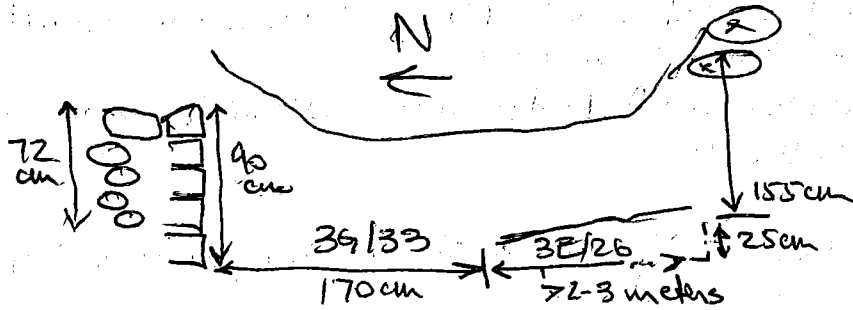

P85-7-110
4/18

block of matrix behind
BEST rubble

3F: removal of 3F/21 has revealed line of stones that are probably (a low (basal?) course of CREST (call them BEST) - to clean with trowels now, to define this, go down south of BEST to seek next terrace level (or whatever) behind it

3F/22: will be that cut, when they do it again horrible slippery heavy mud (also some collapse between GRIP & GAPP (both sides of trench))

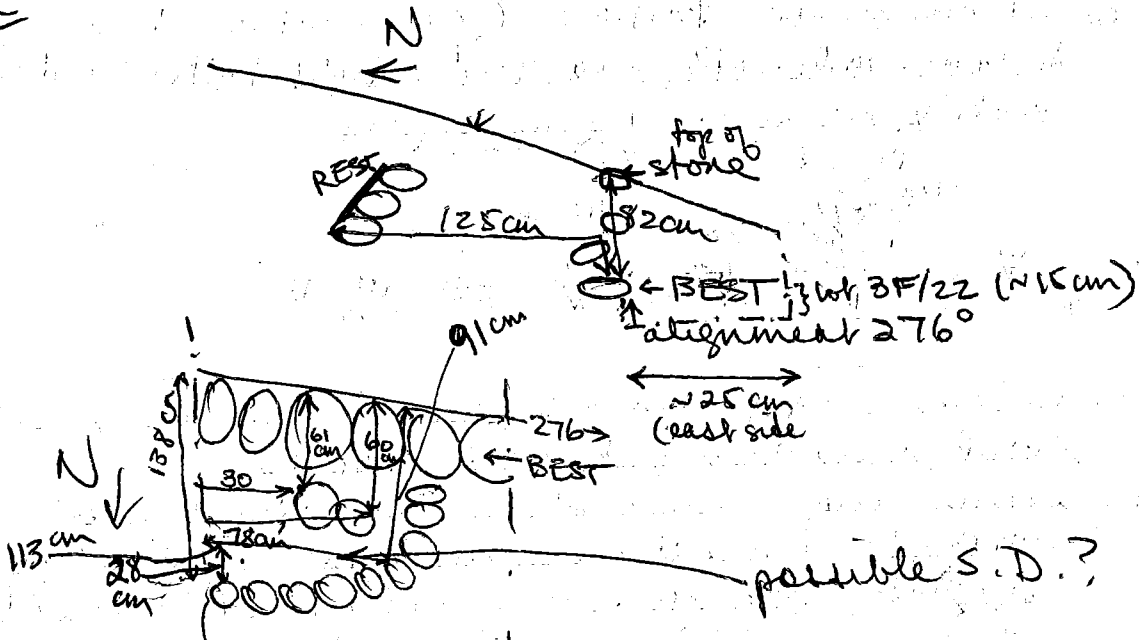

3E/36

3E/26 from 170m south of BLUE to under stone shown (marked on P85-7-3 top is at 164.62 m)

3E/27 in 4.5 m extension from beginning of cobbles (continuation of debris line seen in P85-7-3 farther north) (~25 cm below surface)

3F

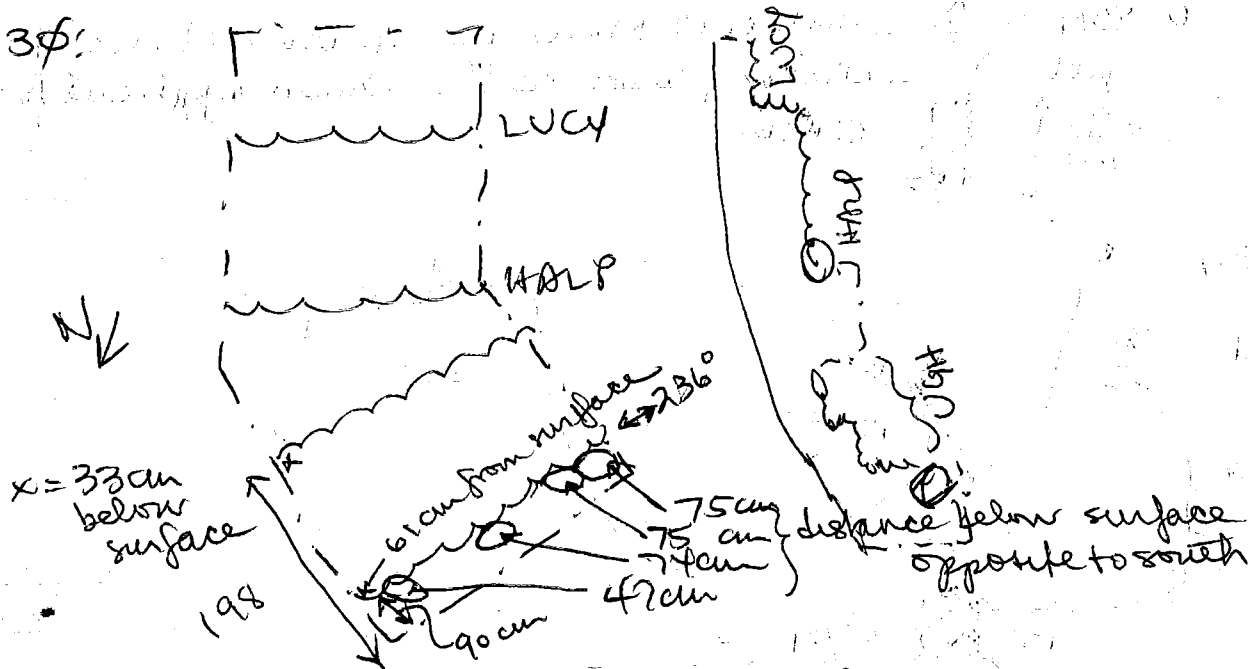

P85-7-108

4/17

2D/2 includes the red or orange plate, in it put white plumbat-like in used sherds there

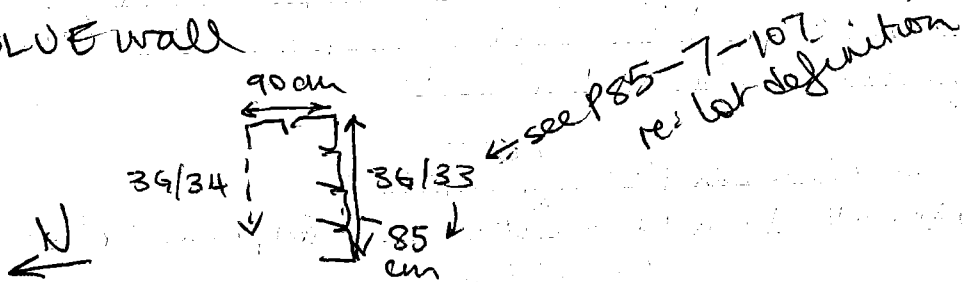

3φ:

3φ/11; cutting through UGH to level of large stones seeking intact features

3L; have reached east side of BLITZ, without encountering any wall or other features to level at top of BUDGE

3G: BLUE wall

April 18, 1985 (Thursday)

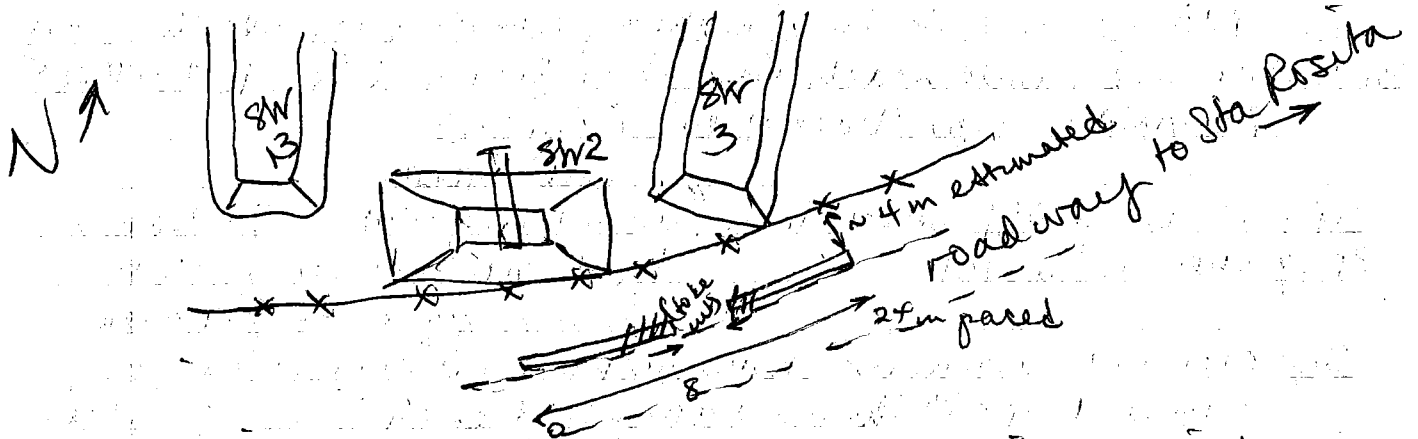

755 80°

a real, heavy downpour about 2³⁰ this morning - woke us up in SB & Galeras - standing water & messy mud at Guafoguito - derrumb/collapse of east side of base pit in 3F (8r 2) - must leave as is for now, till it dries

P85-7-106

4/17

Foncho alerted me, on my return from Galeras, that a drainage ditch (just outside the site fence to south) was turning up sherds & jute & ashly soil
ditch is ca 50 cm deep (45-50 cm measured) & ca 35 cm across

jar sherd; 2 lg presses scored center lid, animal bone (deer?), large red on orange dish rim
? midden for 8hrs 2/3 (seems so)

2D/1

— 2D (top) is materials from these excavations

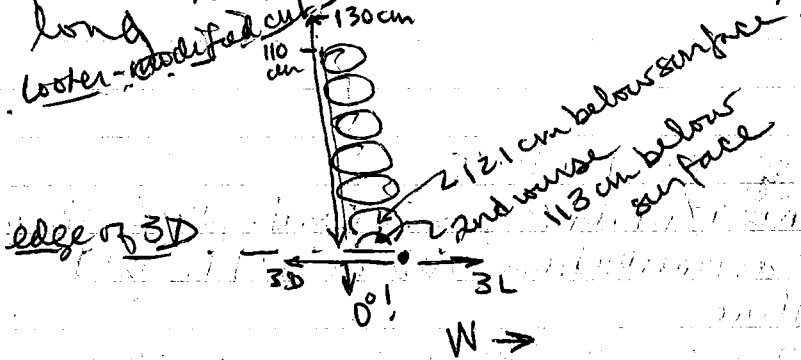

2D/2

materials closer to 8hr 2

} probably meaningless distinction

(cf. Benyo-la Ceiba / Cayon & Hayden & Cannon re: trash of individual houses/households)

3L: found stone line - 1 cobble wide, preserved 6 cobbles long
water-modified cut 130 cm

now cutting through NASH & down to level of BUDGE (i.e., through BLITZ too) - fill of 1-1st - A

3L/3: materials from this cut

seeking eventually to reach east wall/platform edge for 1-1st - B

P85-7-104

4/16 - 4/17

2 visitors ca 3⁰⁰ - both Honduran, who = unknown
(thought one might be Mario Lopez & tho' he started
off with the same question as ML had 2 years
ago [¿han encontrado algo?] he didn't look
familiar)

3L: cutting down east of NAS4

3L/2 reopened this lot - shreds & adobe but nearly down
to level of step up at west end of Op 3D (Str 1-1st-B)
but no evidence of yet

30p

30p/9 has produced 5+ bags today
have cleaned off stones that seem to show lines (ca
20 cm below surface) parallel with original orientation
of excavation, but these are skewed & way too high to
pertain to HARPE & Lucy (assuming they're even
"real")

April 17, 1985 (Wednesday)

10³⁰ - 85° in Galeras

^{the weights}
Last evening a shower bag broke a pipe in Galeras house
main bathroom - required repair (exam Tues eve / repair
Wednesday)

Also I had to go to bank again. Foncho to do migracion renewals
Folly & Sylvia stayed with Valerie to do labwork while
Foncho & I ran errands and Daisy & her albanil
worked on repairs

workmen at Gudijocuito asked to

- 1) move 3E back dirt at south end for french expansion
- 2) clear on hill east of soccer field, for map points
- 3) backfill 3N

D85-7-102

4/16

110° - 88°

3L: shell cleaning at north end

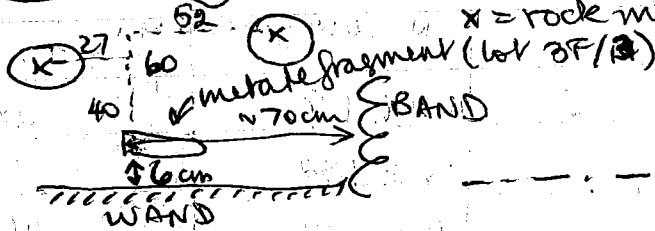

3G: added basal pit, to D85-7-3 - Polly measuring, me drawing

- TOP
- 3L: BLITZ 174°
 - BUDGE 179°
 - AVE 171°
 - HERTZ 171°
 - WRECK 9°
 - HEAP 12°
 - RENT 1°

progressively less convincing

LEASE 110° (x) n2/3 down

3F
3F/13

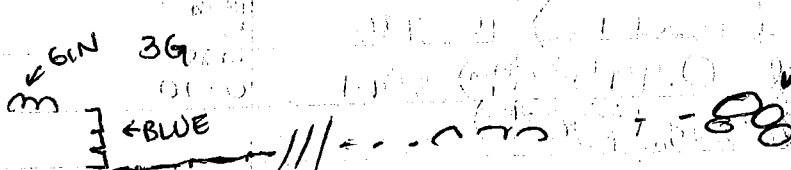

REST (up to 5 courses high) 46-60cm (3 courses / 5 courses)

slope is 52 1/2° on east side
59 1/2° on west side

3F/18 clearing down, not more than 10cm north of REST - to see if the stones emerging have any alignments to them

3E: at eyeballed-level even with top of BANANA, beginning to get cobbles again (instead of dirt)

cleaning for photo of BLUE

} doesn't feel - but perhaps all associated 5-3rd??

P85-7-100

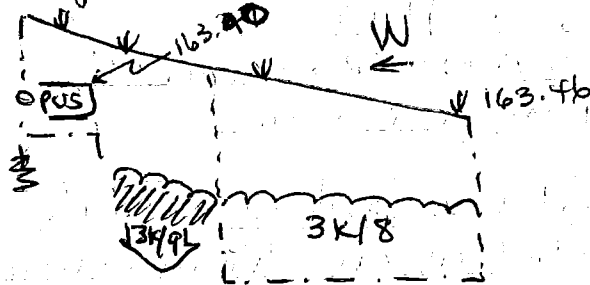

4/16

& below bank

3K: removing fill block (cobbles) immediately east of \odot

OPUS

3K/9: materials from removal of this, from top of cobbles

3L: Pedro & Carlos Enrique cleaning steps here & potentially redefining their positions & alignment (to reiterate: upper 3 or so are clear, but they're progressively more questionable, as now cleared, as one descends)

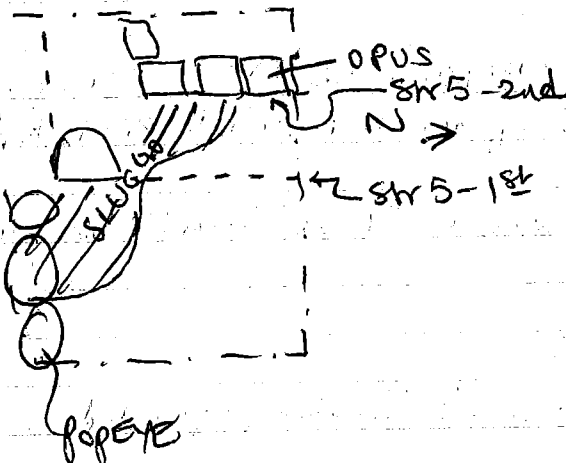

3L/1 reopen this lot

Folly, Sylvia & I went in to do business (bank, send cable to Vito Veliz)

returned by 10³⁰

Foncho said THAT administrator had been here (re: the Lopez house) and he (Foncho) had also pressed the case about the car (to seemingly no avail)

3K: the suggo adobe surface seems to continue back

3E: cutting through BAND/REST bench - no special deposits (nearly all cut)
REST wall slopes down, ^{behind} (was abutted by) the BENCH

P85-7-98

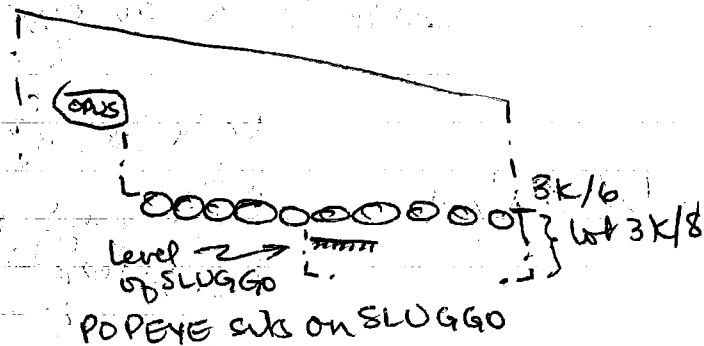

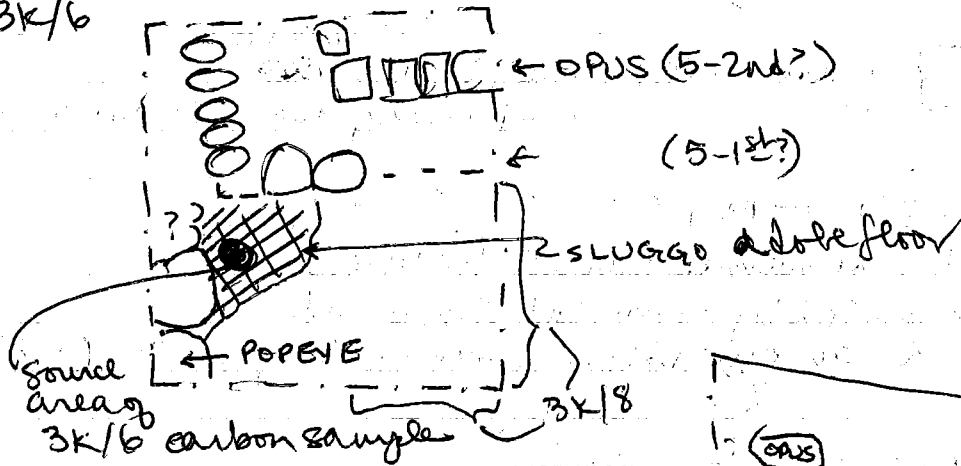

4/15

3G: BLUE wall now at least ^{4 courses} 62 cm high - very blocky wall stones - suggests a chamber (?) more than a room, but if so no cap stones & N/S width still unknown
 am assuming south side is interior face of wall
 orientation of BLUE is $83^\circ/263^\circ$
 (as vs GIN $274^\circ - P85-7-88$)
 $/94^\circ$

3K: still lots of sherds

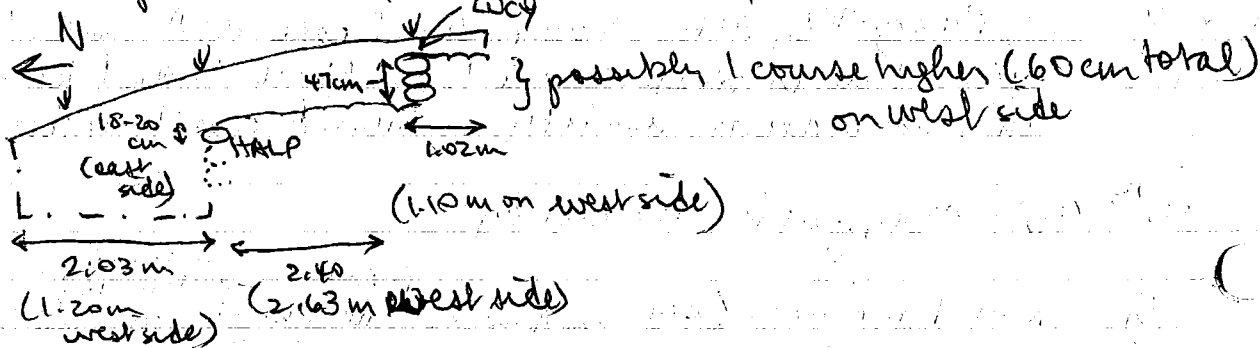

3K/8 0-120 cm south & 0-150 cm west of NE corner } beginning of intact
 80-110 cm down } plaza fill?

3K/6

3D: took photos 85-7-M 9/10

Op 3D: HALP & LUCY from north scale 50 cm

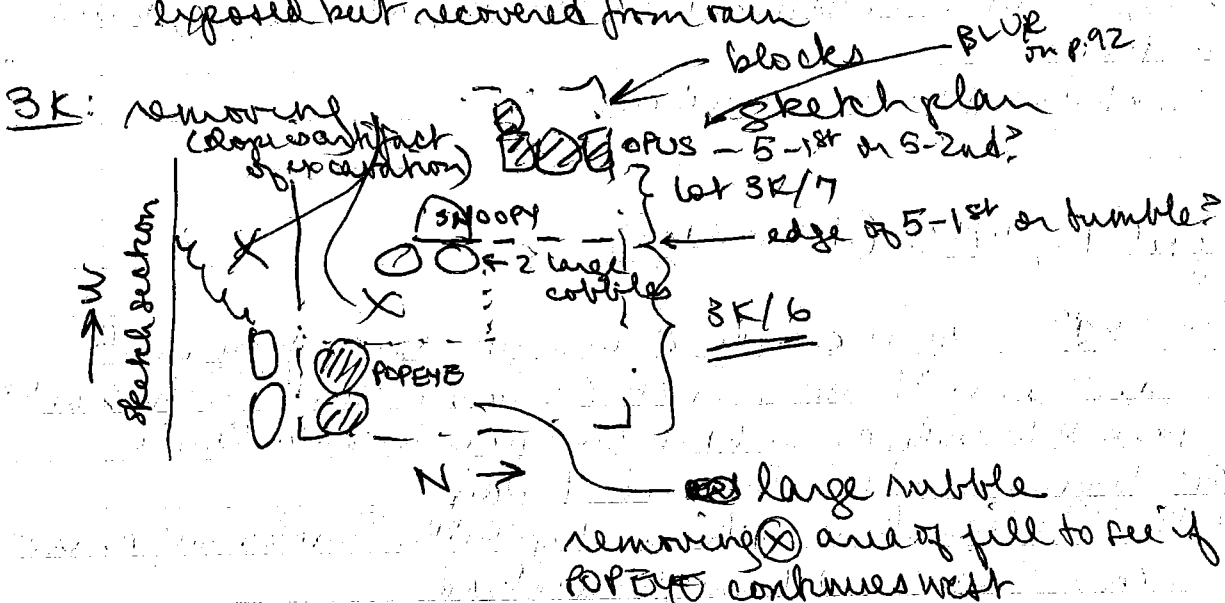

125 89° & overcast still

1.70 m E/W at north end

3F: Sergio & Rene clearing south from previous excavation
 limit to walk back (exterior) of REST wall
3F/15 — ^{laterally} continuous with 3F/14, these materials (from ↗) are
 less related to room interior or its fill & more to wall fill
 & structure collapse

3G: in abeyance

3H: Ulises has his day off today; Efrain working with Carlos
 Enrique + Don Pedro to clean off features previously
 exposed but recovered from rain

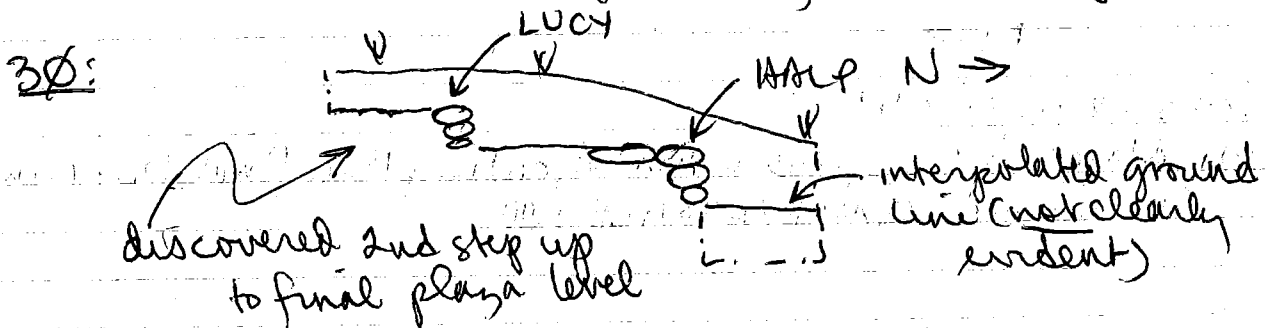

3K/6 still in this lot

3Ø: continuing south & down to find step

3Ø/7 still in this lot

3K: carbon sample

3K/6: 115 cm ~~east~~ west & 60 north from SE corner of excavation
 ca 95 cm below surface along south side of excavation

P85-7-94

4/12

worked on sketching in file in 3F/D85-7-5

10⁰⁰ 88⁰

took photos 85-7-M1/2

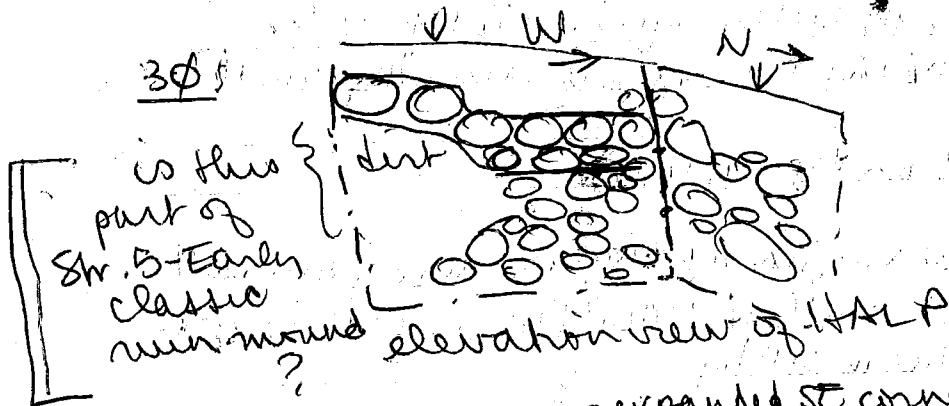

Op 3N, Folly drawing (east) section

worked on D85-7-3 (Op 3G) - above & N/around level of JAE

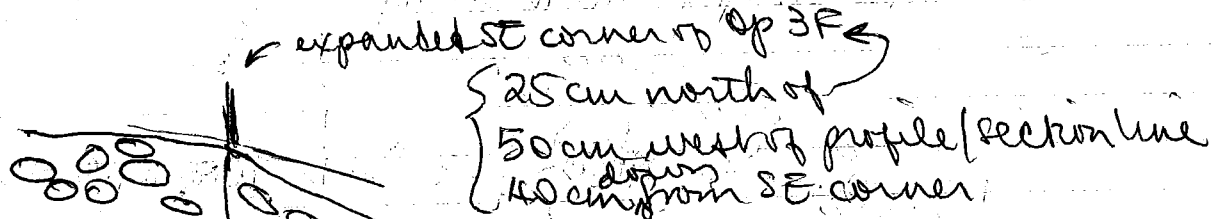

took photos 85-7-M3/4

Op 3H, Raigos 10 & 11 with 2 & 3 from North

scale 50cm

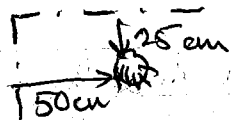

3F
3F/14

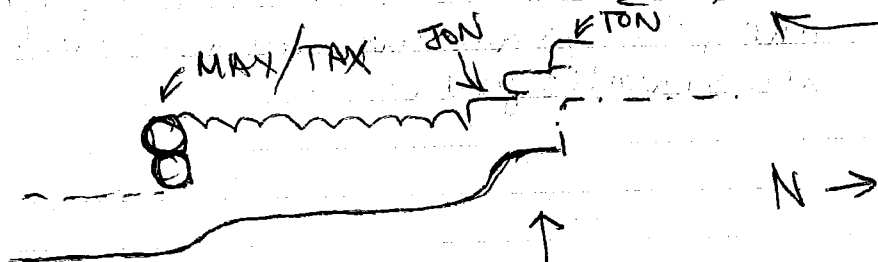

1 pair small spondyliid closed set, somewhat eroded apparently just in fill (loose) or fallen with collapse - uncertain

found at J and X more or less like this

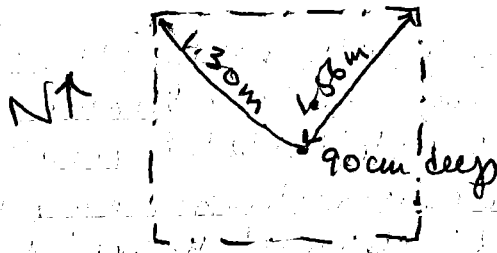

3E
3E/23

the soft white material of TEND rises to the north - eroded terracing??

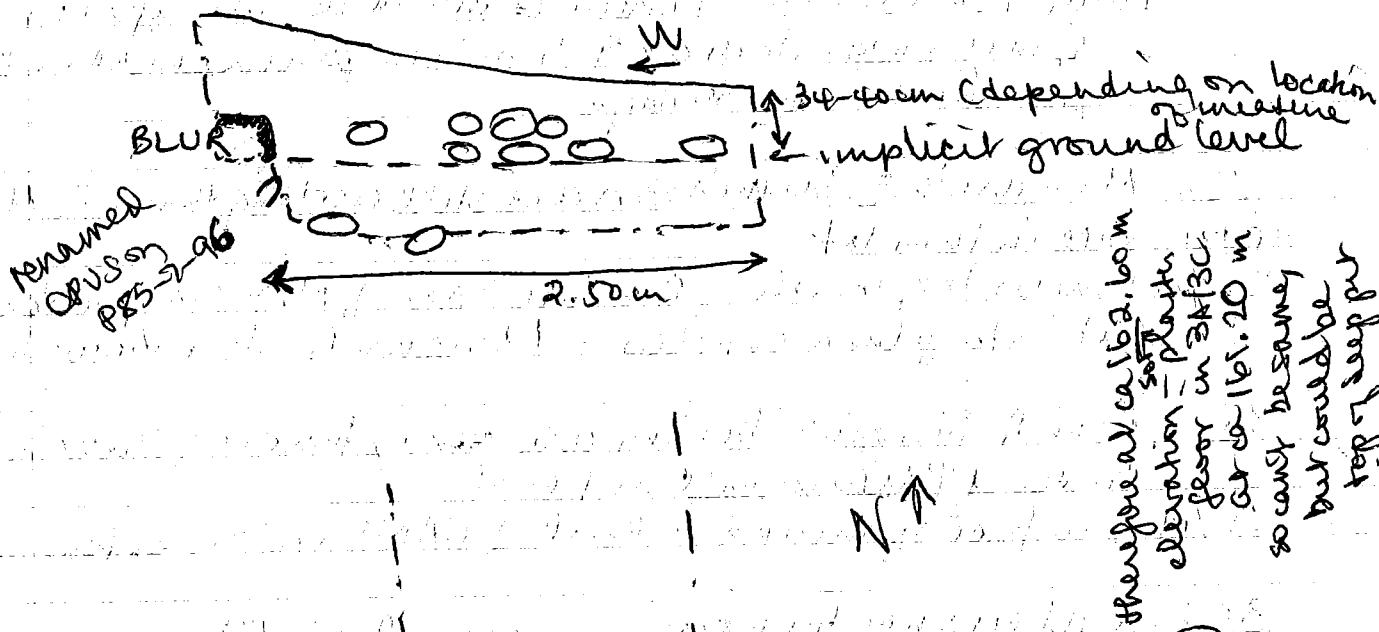

P85-7-92
4/12

3K Foncho gave me measurements he took yesterday
(3E/16) on some pieces of bone (small vertebra & long-bone
s/b 3K/7 fragments) from the midden

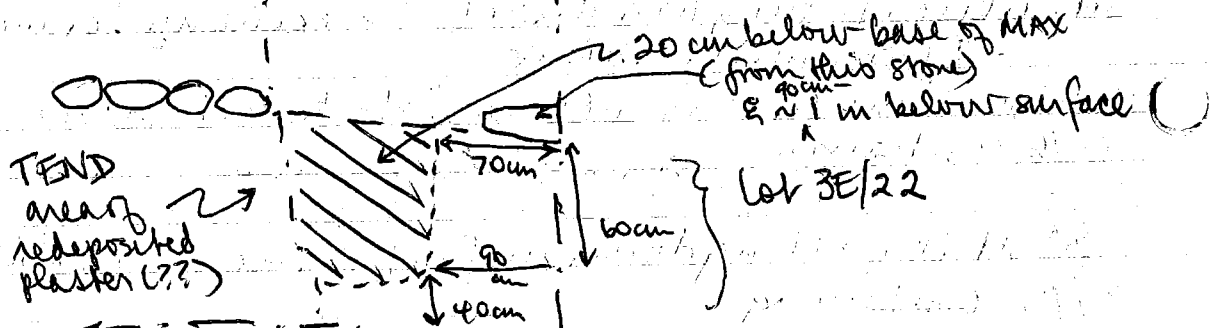

3E in cut in front (S_{side}) of MAX, have hit what looks like redeposited plaster - but at less than 20 cm below MAX/~~base~~ base?!
VERY STRANGE

3K: has hit pair of masonry (!?) wall stones that may mark alignment of east wall

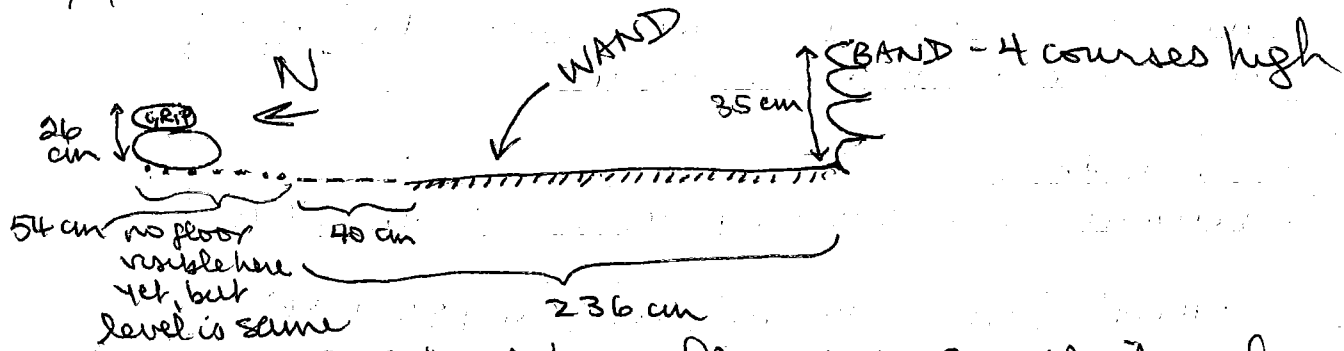

note, this area is approximately axial

P85-79

4/11

WAND is hard bare floor 1.5-1.9 cm thick - a few stone disturbances but continuous 196 cm south from BAND (to which it does seem to run up) & then can be seen in section 40 cm farther south

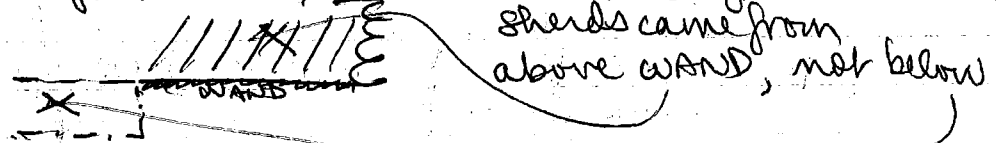

took photos 85-7-L11/12

op 3F BAND & WAND from NW, scale 50 cm

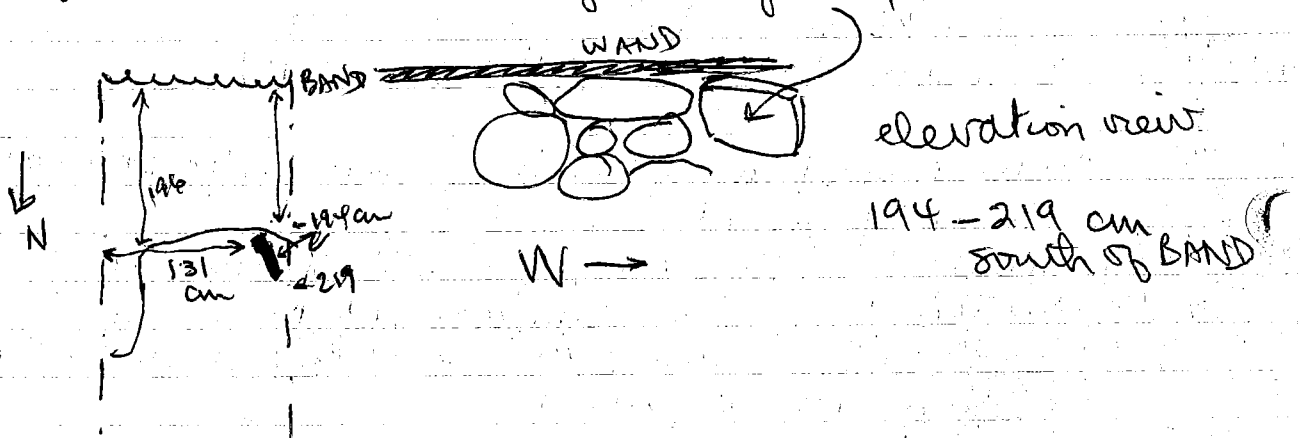

3F/5 cutting down from 2nd course down south of HALP to next step/surface
 3F/6 concentration of polychromes in NE corner of original exc area at level of top of HALP (dimensions of concentration vague - probably meaningless contextually, but helps to keep possible joins together)

3F/13 some of this unfortunately is from below

WAND & some from above, but Rene & Sergio say all

metate fragment on end in fill below WAND, west side of trench - would thus be near axial line of structure but I don't think it's a special deposit & it's broken

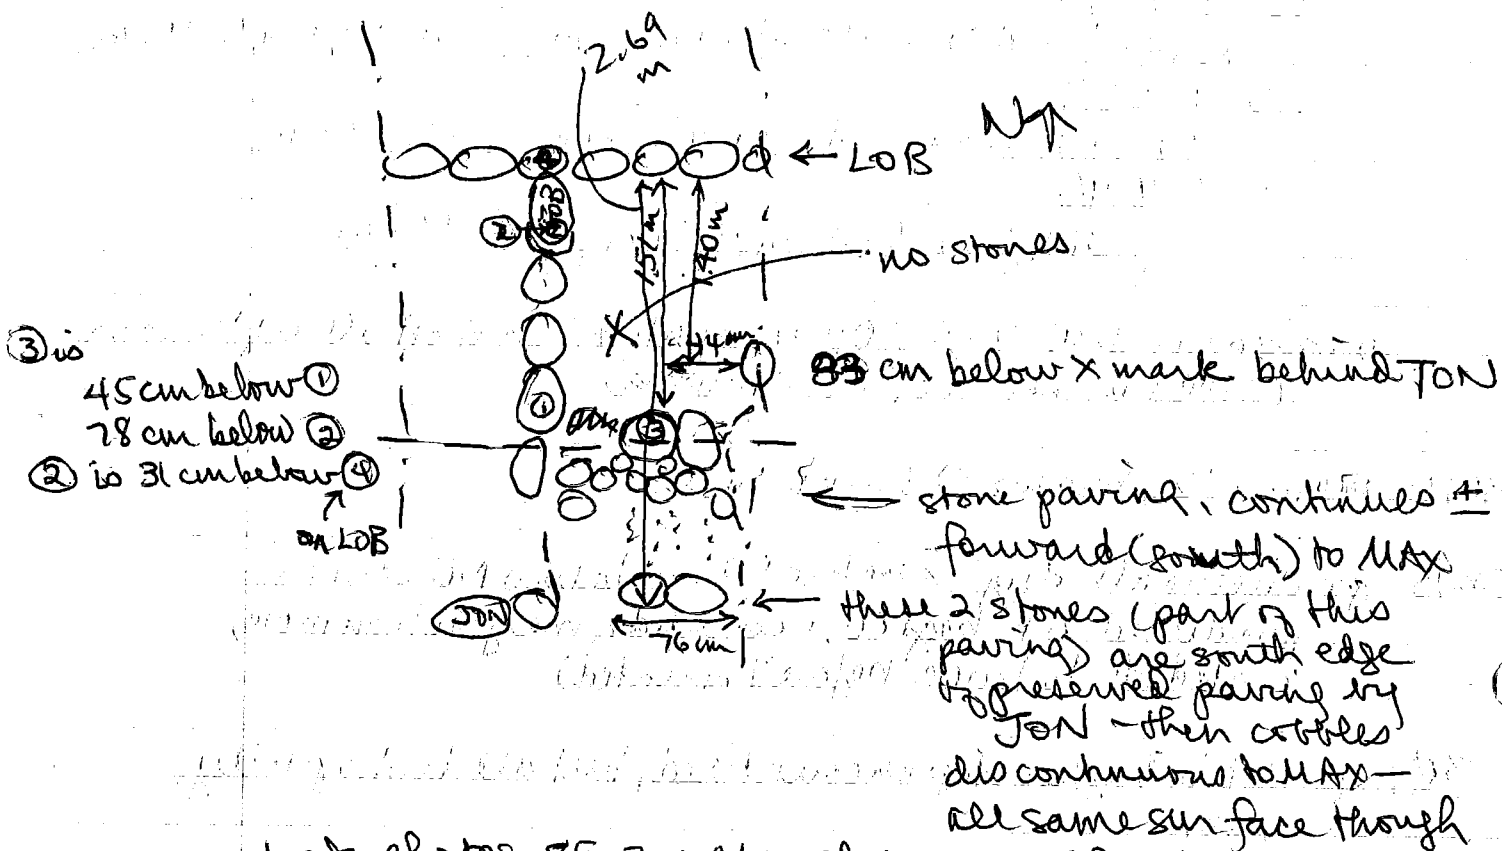

P85-7-88

4/11

at site: Foncho here, Folly ill

3E: cleaning cobbles south of

took photos 85-7-L9/10 closeup of LOB wall
scale 50 cm vert, 35 cm horizontal

3E/20 still in this lot - cutting now through the pavement described above - therefore fill of MAX

3F: Sergio & Rene cutting down ^{through} behind GRIP, to level of GARP and south as far as BAND

3G: in the dirt matrix there now appears a long band of stones crossing the trench at an angle, dit continues on north side - cleaning E will measure - covers a special deposit perhaps? wall line perhaps? 274° azimuth

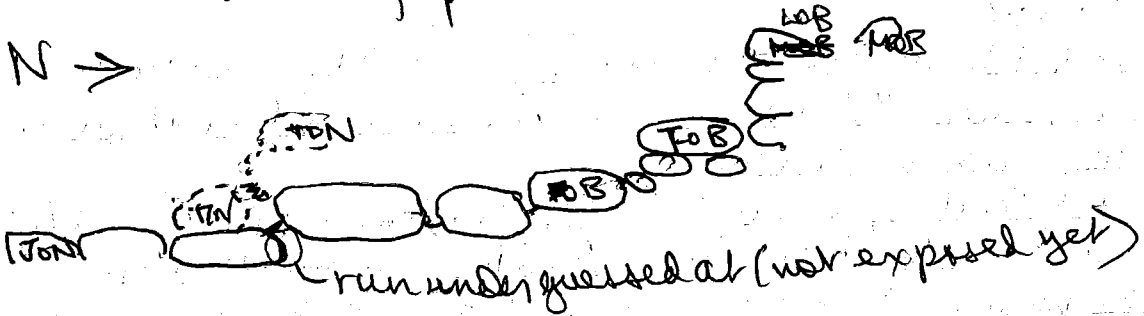

3G/30 still in this lot

3E drew in ^{MOB/} LOB/FOB on D85-7-3

P85-7-86
4/10

took photos 85-7-K7/8
op 3E MOB/LOB/FOB from SSW
scale 50cm

showing problematic relation to JON/TEN/TON

D85-7-6 did quick plan of these (1:20 by mistake
8/6 1:10)

30 continuing
3G finished 29, lot 30 began
3G/29-30 matrix mostly dirt, few stones little or no ash
top sherds in 30 are few but almost all
polychromes

3E removing part of FOB to expose full
vertical area of LOB - seems to continue
down - at least 6 courses reconstructable
in composite

3K creeping thru midden
3G Rene & Sergio moved to lower terrace to
base cut behind PULL

3H: deer scapula (fossa) 63cm N of Rango #2 (X)
3H/8 and 67cm down, 23 cm west of section line

1250 90°

very strong wind about 11:30
and breeze is ceaseless

took photos 85-7-K9/10 LOB/FOB/stones ~~80~~ - closeup
from SE, scale 50cm
85-7-K11/12 from farther south, to include
JON - scale 50cm
both show full vertical extent of LOB

P85-7-84

4/9-

4/10

changed mid morning

3E: René, JJ & Sergio's replacement (having cleared YAY westward & removed loose rocks & fallen earth in 3F plaza end) put to cutting into MAX, to level of current low point of excavation, 2m out from section

3E/20: Shards etc from fill of MAX (ca 85 cm from surface)

Comparison of elevations

	P85-7-75/76 ^{at 7:21 and 8:11}	P85-7-80	Δ
3G NE	160.812 (-6°2')	160.705	(-1.09-.11)
3G High pt	166.326	(rock gone)	
" " " (dug versus P80)	()	166.353	
3E High pt	165.869	165.853	-0.016
3E 3E	163.288 (-4°15')	163.217	-0.071
PD2	165.152	163.145	-2.007
Iron stake	160.000	159.9997	-0.0003
Ballcourt datum	160.324 (-6°2')	160.300 (-5°2')	-0.024

LPD 1 = Backlight datum

all done w/ downslope 7.5

Other

3K-SE cnr	163.356
NE cnr	163.478
Srr 5 SE cnr	163.233
SW cnr	163.229

These are not ball court elevations but presumed then to sit on MAX equivalent surface

MAX: 162.793 to 9.25 (drawing)

April 10, 1985 (Wednesday)

7:50 7:80

no rain, but cool at night cloudy but bright

Folly & Foncho with me, but Folly sent back to return Sylvia's lunch (not removed at lab house because Sylvia'd had to get out & fetch Galera's keys someone else had left in SB - chain reaction)

BUT TODAY MUST BE BETTER THAN MON/TUES

- 3E Margarito & Jaime's son clearing MOB/FOB/LOB still
- 3E/19 still in this lot
- René & Sergio still cutting through MAX to JON
- 3E/20 still in this lot - FEW Shards

P85-7-82

4/9

3φ: Lupe & Teracino
reached a "level" 102 cm below SE corner
51 cm below NW corner
(the 2 layers were at [tops at] about this level)
no features apparent, so cutting more

3φβ: shere etc from this level of fill
contextually continuous with 3φ/2 but
less fear of downward filtration/contamination

3A: 14.25m N/S. taped
13.45m NE corner to SE corner 3N

transit work - Folly on rod (as this morning) bad wind

845 84° still a good many clouds

3G levelled out & travelling - no further floor frags yet ash in only one small patch

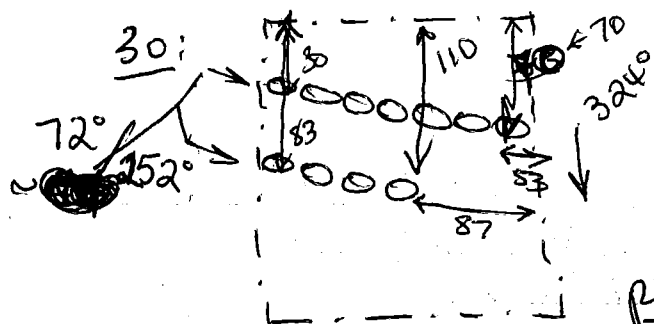

3φ: piece of adobe w/ pole in stone impression in lot 3φ2 overlying large lajas in middle of exc

removing/levelling remaining high points of exc (NW & Southern portions) - perhaps more lajas?

sketch plan 3G summit

P85-7-78
4/8

sketch plan

NOT TO SCALE!

possible step lines - will photograph but verify at best

3N: getting a layer of small stone (6-10 cm across) down ca 20-30 cm

3G: removed VIM removing fill in southernmost unit - by lunch seem to be reaching top of ashy stratum (slopes up greatly here)

~~X~~ 3I: backfilled

3E Rene & Jose Jorge put here with huzite, to straighten section face

Fabian is not here today - Ulises has evidently opted to take his day off this Friday (he & Rufino's son worked last Monday so are "owed" day off each; Rufino's son + Margarito + Sergio (who both worked Fri 3/29 when the others had off) are all taking their day off today) - therefore should be 9 men but there are 8 because of Fabian - would be all right but for imbalance on tools (lack of a pick for the 3E pair)

30 took photos 85-7-K3/4

view from NW, scale 50cm

showing putative alignments sketched above

39:

39/28

39/29

4/1 exc limits at top, to 84 cm below BRM ref (2.90 m N/S)

starting at 84 cm below BRM ref (3.40 m N/S)

ash may begin as high as 109 cm from surface at BRM ref

39/28 includes 2 pcs of floor (?) - above
