PSB 54/3-2

possible modeled censor fragment - this piece made of a  
coarse paste, appears to have been modeled. By looking  
at the under side, one can notice the original curvature  
as the pot and the added piece of ceramic forming the  
outer flare. This flange is likely formed in base of  
this censor. It was probably a hollow censor, placed directly  
on the ground. The approximate inner circumference is  
80 cm. The paste color corresponds to informally 5R 6/10,  
reddish yellow.
