PSB 5A/3-3

Sherd disc - This disc was either made with its curvature or heavy use wore it down to its present shape. The circumference was probably 8 cm. if it was a complete disc at one time. It is possible that the disc was used to scrape the inside of a pot in the process of making it. The edge of the disc is divided in color and appears to have been worn smooth with use. The color of the paste is Russell's 7.5 VR 6/2 pink to gray, while the outer and inner paint are 7.54 R 3/0, very dark gray.
