Reused pottery piece possibly used as a pot scraper. 5 sherd<sup>s</sup> joined together to form this artifact. They form a rounded edge that seems to have been ground down to smoothness. There is a roundish scar on the top of the piece that looks to me like ~~it was attached~~ <sup>it was at one time</sup> a handle ~~attached~~ here. The paste is medium rough and has both small white and small shiny (mica?) inclusions. Near one edge of the top of the sherd there is a darkened area that is probably burned.

Colors: inner and outer surfaces; red 2.5YR 4/8 inner paste; yellowish brown 10YR 5/6
