PHOTO/DWG NUMBER

7C/8-2

This pierced censer fragment is of medium paste with a few visible inclusions. Paste color is strong brown (7.5YR5/6). The surface is smooth but is eroded and pockmarked with tiny grooves and indentations. The bottom corner is angled inward as if it were bending toward the base. There are two holes

1/2-hole, 1/4 hole both on the edges away from the bend inward.
