PHOTO/DWG NUMBER

7H/3-1

Fragment of censer strap handle and the joining support. Handle itself smooth, plain. Support is sloppy as though lumps of clay were stepped together and fitted in between both sides of strap.

Paste is fine orange, tiny inclusions that appear through surfaces more than on a fracture of paste. No firing core.

Surface opposite support side is smooth as are adjacent sides support side of strap is rough from clay applications around the support - Really a sloppy looking job. There's a darkened scar where support attached to other part of strap.

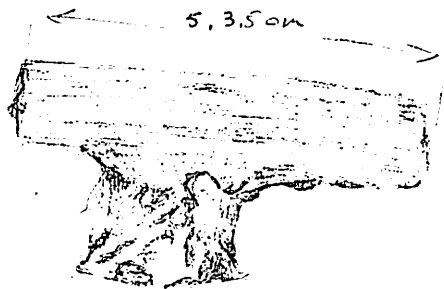

Note: this cat # has been given twice will have to fix
