Verbal Description:

Nesting Knot Headdress

Fragment of a hollow figurine with a substantial portion of a triangular flange (incised) with a Nesting Knot assemblage above it. The Nesting Knots are composed of two horizontally incised rectangular protrusions (one groove divides each into two sections). It is as if a band has been wrapped about the head and tied into bows. The protrusions center on a rectangular field. There is a punctated sphere earflare tucked beneath the incised triangular flange. The entire headdress slopes/curves about the head almost as if it is drooping. Convex back, traces of orange slip on front. Central eye core. Very smooth.
