

Bratislava, 2.12. 1943

Dear Friend,

Thank you very much for your letter from 15.11 this year. I know you and the other friends will do anything to get a letter from Lici as soon as possible. You can imagine my mental state, how much I worry and can only relax until I get good news thanks to your mediation. With the contents of the other daughter's letter, I am very happy.

After the hard days that are quickly consumed, I was very relaxed to meet you friends (Chawerim) because I was convinced that you will take care of the children, there are no words of thanks for that! Not only did you contribute a lot to me through your friendship and sincere connection, which I found my mental balance once again, but also in addition you made a rich contribution so that I can believe in true humanity and real solidarity. By doing so you have given me a lot, because we live in an atmosphere where the belief in a high ideal in humanity is undermined.

I guess you want to know something about Naomi's health. I do not know how up to date you are, but I can report to you one thing, that Naomi has already given up all hope of seeing Judith again. Suddenly she became very ill and the doctors stood hopelessly by a cell bed and did not know what to do. At first it seems urgent that Professor Sam visits her, alternatively, if there can be no cure, she visits her as soon as possible Dr. Artzi. , But to enter the hospital's treatment here. The diagnosis made by Dr. Zorer was such that it did not even have an analogy in the local medical journals and that's why the cure was also so hopeless. But now Naomi's desire to live as well as the good treatment of the doctors has contributed to the fact that her condition is now such that she can expect an improvement in her condition, even if not fully. However, there is still air infiltration, so deterioration can be expected. For this reason, the family decided to do everything on behalf of the patient so that she (the patient) would indeed come to Dr. Artzi for this. Therefore, her brother Michael, like the other brothers, are of the opinion that the prescription from Dr. Berl to Michael should be sent both in her name and for Naomi.

The case was also made tragic by the fact that due to the illness of Naomi her mother

Her brother Michael and others who were in her vicinity became infected and also needed treatment at the hospital.

But thank God they have all recovered in the meantime. More information could be of use to you, that Naomi's squad is dated to an earlier cold, which she abducted in honor of a conversation with Gordon at Gwina. A letter to that effect confirms this hypothesis. As is the case with serious illnesses, additional complications have occurred.

By the way how is Gordon? I hope he is more in control of his impulsive temperament and he is careful in choosing his friends and social interaction. Please give him heartfelt greetings. I have nothing to do with him, nor with Uncle Sally. It would be very nice of you if you could pass me news from both of them. I think quite a bit about the two and miss them.

2022.1.21

Now dear Vanya, I hope to hear from you very soon. News from you and your friends (Chawerim) always means a holiday for me.

(I) congratulate you as well as Mendel in the friendliest way and (I) appreciate you,

Gizi
