Lord Kenyon's visit keeps tradition alive

By Bonnie Crocker
Staff Reporter

The Right Honorable Lloyd Tenny Kenyon, Lord Kenyon and third Baron of Geddington, and his wife Lady Sally Kenyon made their first official visit to Gambier this week. The visit came in honor of Founder's Day on the 175th anniversary of Kenyon College.

Lord Kenyon's visit continued a tradition established by Lord Kenyon's grandfather in 1924; the fourth Lord Kenyon took part in the college's centennial celebration of that year and the fifth Lord Kenyon was present at the 150th anniversary in 1974.

College President Robert A. Oden, Jr., identified this continuing relationship between college and family as unique and worthy of careful cultivation. He points out that there are very few American colleges remaining that can boast such a shared history. It is an important link in the eyes of both parties, and the invitation was extended to Lord and Lady Kenyon with this in mind.

Although this is the first time the sixth Lord Kenyon has been officially welcomed to the campus, it is not his first visit to Kenyon.

In the summer of 1969, after graduating from Magdalen College, Cambridge, he spent several months touring the U.S., paying his way by selling ice cream in Detroit.

Breaking Out the Winter Coat

Cold weather in recent days has brought out the gloves, scarves, parkas and fans along Middle Path.

Despite marker debacle, campus theft reportedly down

By Justin Karpios
Staff Reporter

Statistics show that Kenyon College is experiencing a decrease in the number of campus thefts. Between the 1997-98 and 1998-1999 academic years, the number of campus thefts fell from 99 to 74, according to Director of Security and Dan Werner.

Werner acknowledged that some statistics may be misleading, given the somewhat ambiguous nature of the term theft. "Theft, according to the law, 'depriving the rightful owner of the use of a product or material,' he said. "Burglary is defined as breaking in using 'stealth, force or deception.' Robbery involves physical force against a person." When the Department of Security and Safety keeps statistics, it regards cases where possessions are stolen from dormitories as theft, though technically they are burglaries.

Werner, who worked as a police officer for six and a half years before assuming his current position, attributes the decline in theft to a number of causes. Most important is the addition of one more security officer to the force. While Werner concedes that this individual is not personally responsible for the decrease in thefts, the issue of officer visibility is of utmost importance.

"Having this extra officer on the beat means we're out there another 20 hours every week," he said. The Office of Security and Safety currently employs six officers, 10 of which are full-time employees. Three full-time officers are devoted to monitoring the construction sites on South campus.

In increased student responsibility is also a cause of the reduction in theft. "I think the students have been better about locking things up and being smart," noted Werner. "We keep an open campus here, which is nice because we let visitors in freely, but it's also a double-edged sword, because if someone really wanted to, he could just walk in and take a bike or eat dinner at Peirce.

—Director of Security and Safety Daniel Werner

Trustees establish new teaching award

By Lindsay Sabis
Staff Reporter

The Kenyon College Board of Trustees has established a new program of teaching awards, the Trustee Teaching Excellence Awards, which will be awarded each year to one junior, one senior, a faculty member and two student members of the Kenyon community.

Each winner will receive a cash prize of $15,000. This teaching awards program was established after the board reevaluated its old program, established in 1989 and continued until the 1998-1999 school year, which awarded two faculty members each year with $3,000. The board's decision to establish this new award reflects their belief that "first rate teaching ought to get a truly extraordinary prize," said President Robert A. Oden, Jr.

Along with the monetary difference, there are two other main differences between the new award and the previous one. The first is that there is no limit on the number of times a faculty member may win the award.

The Village Weather Report

Sunday: Partly sunny, high in mid 70's, low 40's.
Monday: Partly cloudy, high in low 60's, low in low 50's.
Self-study polls suggest future changes for Kenyon

BY DANIEL CONNOLLY
Assistant B&L Editor
Senior Staff Reporter

Kenyon College's self-study steering committee (SSC) will submit a preliminary report in February, setting up the work that has done since its creation in fall 1998. It will amount to a massive sociological study of the campus. Virtually every aspect of life at the college is under scrutiny.

"It's supposed to be totally comprehensive," said Bruce Genser, professor of economics and the self-study coordinator, who has been granted a reduced teaching load as well as office space to lead the study.

More than 20 administrators, faculty and students subcommittees of the SSC are casting a critical eye on everything from the effectiveness of faculty governance to the quality of dining services. The whole purpose of the exercise is to gain reaccreditation from the North Central Association (NCA) for Kenyon, a process that takes place every 10 years. Kenyon is expected to identify its problems through this test and then take steps to correct them.

In general, this means rendering general impressions into quantifiable data through studies and polls. In the case of general education, it meant administering a standardized test (the ETS Acal- cemic Profile) to the class of 2001 last semesters. Students' average overall score was 468 out of 500, which was surpassed by just one other school. But Genser pointed out that most of the 64 colleges in the comparison group were neither prestigious nor selective.

"It's obvious that we were at the top of the range," said Genser. "But that doesn't necessarily mean that Kenyon is doing the best job for its students, because the value-added factor (differences in scores from year to year) really isn't there. You can get those kinds of scores just by attracting good students."

The largest group of Kenyon students (100) scored in the 460s, which put them somewhere between the 63rd and 78th percentile nationally. Curiously, just 38 percent of Kenyon students reached the top level of proficiency in the writing portion of the multiple-choice test, while 46 percent and 51 percent managed the top levels at math and at reading/critical thinking, respectively. One of the subcommittees is deciding whether to administer the test again in order to compare student data, Genser said.

Conducting polls has been another trademark of the SSC's work so far. Though Genser wasn't ready to release the results of these surveys in their entirety, he did release specific pieces of information.

A poll conducted in the spring of 1999 revealed that Kenyon's alumni from the class of 1994 were generally happier with their undergraduate education (76 percent described themselves as satisfied with their undergraduate experience, for example) than were the alumni of five similar colleges, Genser said. Yet the alumni also reported that their experience at Kenyon had not energized them to influence decisions to advance their fields.

CONTINUED FROM PAGE 1
Nominations for the awards will be solicited from Kenyon students and faculty before Dec. 1. As under the old program, the president, the provost and the two associate provosts will consider nominees and narrow the pool to three finalists in each of the two categories. These names will be submitted to the Curriculum and Faculty Committee of the Board of Trustees, which will recommend winners to be approved by the full board.

Award winners can earn the $15,000 for any purpose. According to Provost Ron Sharp, this award is simply a "recognition of choosing wise and creative teaching with no strings attached."

The award is made possible by donations from the trustees, not including Robert J. Tomich, chairman of the Kenyon Board of Trustees from 1992 to 1995. Tomich said, "As passed from active trusteeship to an emeritus role, I felt the board needed to do more to encourage and recognize excellence in the faculty."

Provost Sharp agreed, saying, "This award is a reaffirmation of the centrality of teaching to Kenyon. Teaching has always been central to our mission, and I hope the trustees will want to acknowledge that in a significant way.

Teaching: career performance

The Village Record
October 20-26
Oct. 20, 8:18 p.m.—Medical call regarding a student with a cut on their head. The student was transported to the Health and Counseling Center to be treated by the College physician.

Director of counseling expected by November

BY EDDY ECKART
Photo Editor

The Kenyon College Health and Counseling Center is nearing the end of a five-month search for a new director, following the retirement of Dr. Carl Case in July. Nicole Keller, a counselor at the center and chair of the search committee, confirmed yes- terday that the committee has select- ed a candidate, but has not yet made the official announcement.

"We are looking for someone with a good clinical base and someone who has a vision for a place like Kenyon," said Keller. "We are looking for someone with a good clinical base and someone who has a vision for a place like Kenyon." Keller said.

According to Keller, this vision included a "proactive approach," or an active involvement of the center, rather than a simple pres- ence at the Health Center. Allison Hines, the student representa- tive on the search committee, said that the center "needs someone who has good leadership skills to be a good clinician."

The search, which began in July, is not yet complete, Keller said. "We have been in the psychology profession long enough," said Carney, who has an extensive background in counseling and gender studies. "We need to remain in Gambier and will continue to frequent plays and events at Kenyon." Keller.

A "personal level," Keller said. "I have never heard about Gambier, he had a nature about him, he was kind, sensitive, and witty." Keller.

With the pending approval of Oden and Omahan, the position director will likely be filled by early November.

Kentucky: environmental message

CONTINUED FROM PAGE 1

The college was not in session and the campus empty, he remembered receiving a warm informal welcome. According to Lord Kenyon, that hospitality has not vanished. On his return he was again struck by the Kenyon community's continued interest in its connections to his family.

In a candid conversation with the Collegian, Lord Kenyon em- phasized the strangeness of growing up knowing that somewhere across the Atlantic Ocean, there was in fact a college named for him. He remembers a visit to the Kenyon choir paid to his family in England in the 70's with great clar- ity because all the students were wearing blazers with the Kenyon crest. He describes the crest as something intensely personal; there is rather an odd feeling that accompanies the knowledge that a whole group of non-family mem- bers use the crest and feel some sense of loyalty to the name. Not to mention the fact that a whole portion of his family history is con- tained in the college archives.

However, bizarre though it may sometimes be, Lord Kenyon says he is also very proud of the connection. It is particularly im- portant to him now, as the role of his family tradition is under such intense scrutiny at home in the controversy over the House of Lords.

When asked to share impres- sions of the college that bears his family name, Lord Kenyon in par- ticular responded with observa- tions about the natural beauty of Kenyon's campus, and its spa- ciousness. "You don't realize how lucky you are," he said, "to have so much space! It is, in my opin- ion, one of the college's defining characteristics, an idea that Kenyon has touched upon repeatedly in efforts to define Kenyon's distinct sense of place."

Certainly, that sense of place was present in Bishop Philander Chase's vision as he founded the college 175 years ago, with the support of the second Lord Kenyon and other English benefactors like Lord Gambier, Lady Rose and Mr. Marriott. It is pre- cisely that founding vision, and the people who hold it, that are cele- brated in the annual Founder's Day Convocation.

In their public lives the present Lord and Lady Kenyon support a similar vision and set of values, among which Oden iden- tifies integrity, the preservation of natural habitats, and a devotion to public service and education as the future for the speaking to an audience assembled Tuesday in Rosse Hall, Lord Kenyon touched upon several of these common themes.

He emphasized without hesi- tation the way in which the educa- tional "targets" established for Kenyon by Chase and his support- ers have been "exceeded countless times." Speaking directly to the class of 2003, Lord Kenyon urged students to question the idea of progress, particularly as it affects the environment. If he had a mes- sage for Kenyon students, it was that they should work towards closing the door on pressing envi- ronmental concerns before it was too late, and not "after the horse has already bolted," as previous generations have done.

"Kenyon College," said Oden, "almost certainly would not exist without the support offered to Bishop Chase by the Second Lord Kenyon. Hence, and impor- tantly, our chief reason for invit- ing the Sixth Lord Kenyon and Lady Kenyon was to say, once again, "Thank you; we have not forgotten, we will not forget, our debt of gratitude to the family."

Theft: outsider crime may increase

CONTINUED FROM PAGE 1

many people are coming from larger cities, so it's going to be more of an issue."

Last weekend two stereo sys- tems were stolen from an aerobics room in Ernst when the door was opened from the inside after a win- dow was smashed with a five-pound weight from the Ernst weight room. Werner has consid- ered methods to avoid future occurrences of such events, but he noted that he "would rather be pro- active than reactive."

The decrease in thefts has trickled down to some other crimes as well, though generally the effect has not been as pronounced. Ac- cording to the 1999-2000 Kenyon Student Handbook, the number of drug violations on campus fell from 29 to 27, while the number of con- duct violations by either individuals or organizations fell from 57 to 41. In contrast, the number of viola- tions related to alcoholic beverages on campus increased from 175 to 179.
State of the student leader

Student leaders at Kenyon have the dual responsibilities to implement change and engage students.

What exactly does it take to be a student leader at Kenyon? Running an organization? Planning your own event? Having name recognition? It may be any number of these things and more, but as long as it focuses on effort and not success, we will have student leaders.

That isn’t to say that leaders here aren’t successful. Occasionally we are. But, more often than not, our events are poorly attended and our messages are not received. There are many organizations here that are constantly attempting to rock the boat. The Voice, organizations that are dealing with the sexual assault and harrassment policies, multi-cultural organizations and many others. From trying to change the social structure of the campus to attempting to produce a night of theater, student organizations increasingly come up against the same brick wall.

For a student leader, this wall means planning an event that you know is worthwhile and finding that even some of your closest friends would rather go out drinking than attend. This wall means shooing and then wondering if anyone is actually listening. This wall even prevents the Collegian from having a full staff of writers. It is this wall which prohibits our very tolerant campus from achieving an attitude of acceptance and for many students of under-represented groups, it is the difference between simply existing and feeling comfortable at Kenyon.

Unfortunately, those who aren’t student leaders are seldom privy to this deepening silence. There is a common Kenyon opinion that things are okay as they are. Or at least aren’t worth the effort needed to speak up. Being a student leader at Kenyon goes beyond just rocking the boat. It means convincing the campus that the boat needs to be rocked.

As student leaders, we want to make the effort. We take these positions because we care about the issues they represent. We would just like to know if anyone else out there cares, too.

OPINION

Flag precedent can’t be set

MOLLY WILLOW
Staff Columnist

I believe our administration wants to create a climate where all students feel accepted and valued. I probably wish they could save the environment, the dolphins, the whales and their fishing spaces. I believe they are against drunk driving, date rape, racism, sexism, classism, terrorism, plagiarism and fascism. And homophobia. But I do not need a flag to tell me these things. I believe this is implicit in the kind of institution we attend, one that supports its students and the things that are dear to them, and does its best to foster a sense of security.

There has been a lot of talk lately, mostly one-sided, which has centered around gay rights and how gay and lesbian students feel on campus. I believe that certain students have had unfortunate encounters with people who are probably not Kenyon’s most shining examples of free-thinking individuals. I have had my fair share of encounters with these people as well, albeit for a different reason, and I can honestly tell you it sucks. In my case it was because of things I’d written, but the pointed and loud whispering doesn’t feel any better. I don’t think this is the kind of environment our administration would be proud to know existed. But do I believe they are trying to help change it.

Still, the idea of trying to show support with a gay pride flag on the flagpole troubles me. I do not in any way object to what it stands for, but I don’t believe it is a precedent an administration can afford to set. Allowing any flag but one that represents the whole student body to be flown opens the door to abuses that would belittle the serious statement that the gay and lesbian community would be trying to make.

While I agree it would be ideal if everyone could just be who they are without fear of repercussion, it is not yet where our world, or our campus, is today.

If we let one group fly their flag, we would have no basis to deny other groups their day on the pole. And who would we be to say the symbol they might choose is inappropriate? If the fraternities wanted to fly their boxers shorts for a day, because they represent their collective male-ness, we would have to let them. I do not think whatsoever is the best way to represent our school, but they could call the administration anti-male and up the pole the those Hanes would go. The Cougar Center could come back and spike the pole with max-paddis. Then the football team might feel offended and hang their jockstraps. As soon as we make a flagpole a place for politics there is no longer a basis on which to deny people their right to express their view.

If gay and lesbian students are prepared to claim that its “the thought that counts” (from Nora Jenkin’s column last week), then they should focus more on trying to change attitudes instead of trying to draw attention to a symbol that will most likely only provoke further problems. There is also a vast difference between removing a flag and adding one. As Jenkins stated, the NAACP wants to remove the Confederate flag in South Carolina because they feel it does not represent them. So would a straight student be remedy to feel the gay pride flag does not represent them? There is no mean segregate the population this boils. If it is this thought that counts, then we can all show out and do the same thing, welcoming everyone. We do not know if possible it is worthwhile. If gay and lesbian students looking for a show of support are only seeking to be proven by the drama department later. It had strong homophobic and same sex kissing, and we formed for parents we’re trying to prove that by accepting here, then taking. Said Dad a production that guys kiss is pretty strong and we didn’t support our gay uni- bian students, why wouldn’t we have drawn attention to the list.

Turning our school flag into a sort of bally pulpy we’re probably only polarizing support I sure the administration has for its gay and lesbian students is implicit in the fact there is a charter for a gay lesbian organization. I am not wrong with trying to gather support for a cause, but homophobia is not a cause, although issues surrounding it may be.

As student leaders, we want to make the effort. We take these positions because we care about the issues they represent. We would just like to know if anyone else out there cares, too.

Students begin to think of life after Kenyon

The Career Development Center offers its annual ‘Career Day’

BY CARY SNYDER
Staff Writer

Have you begun to think about what you are going to do after your time on the hill ends? Don’t worry, you put this week-end for not having a set plan for your future.

The Career Development Center’s upcoming “Career and Graduate/Professional School Day” can help by providing information about postgraduate schools or initiating contact between you and a prospective employer.

Next Thursday, from 11 a.m. to 2 p.m., over 50 graduate and professional schools, in addition to postgraduate placement agencies, will set up booths in Peirce Hall to answer questions, provide information, or in the case of some schools, accept resumes for potential employment. This event will be the largest accumulation of graduate schools and employers on campus at one time during the entire academic year.

One of the main purposes of the event, according to Associate Director of the CDC Chris Higgins is to simply “get students thinking about careers and life after Kenyon.” The majority of the post-graduate programs that will be in attendance are law schools or schools relating to medical professions; however, there are multitudes of other programs which students may examine.

Schools of education, business, social work, communication and architecture are some of the other fields that will be represented.

While it may seem that Career Day is intended for upperclassmen, Higgins attests that this event can benefit all Kenyon students, saying, “If a first year student is interested in attending law school, this is the perfect opportunity for him or her to talk to representatives and see what they are looking for in a potential candidate for admission.”

—Associate Director of the CDC Chris Higgins

human effects on ecosystem

Fennessy will speak of humanity’s impact on the environment

BY DAN GUSTASON
Division Editor

Concern for the state of the environment has grown significantly over the past few decades. This growing concern for ecological health has made the scientific community aware that modern society can often have detrimental effects on nature. The division of ecology which has emerged to study and remedy ecological damage caused by humanity has been termed restoration ecology.

On Tuesday, Assistant Professor of Biology Siobhan Fennessy will discuss her research in restoration ecology in a talk entitled “Managing Ecosystem Health: The Response of wetlands to landscape alterations.” Part of the National Science Foundation’s colloquium series, the lecture will be held during common hour in Highy Auditorium.

Although people may not be familiar with the term restoration ecology, the concept is a very recognizable one. “We’ve spent the last 20 years working with sources of trouble like factories,” said Fennessy. “Once we had identified the problem, there was more recognition of the subtle impacts that we have on the environment.”

These more subtle impacts are not as pronounced as factories belching out toxic waste, but they still have a significant effect on the environment. “We’ve done things inadvertently that we now recognize can cause problems,” said Fennessy. “We’re now trying to remedy those problems.”

The lecture will focus mainly on these inadvertent problems and their effects in Fennessy’s area of study, the wetlands.

Disruptions in the health of a particular ecosystem can be measured through the use of biological indicators, and this is the type of field study that Fennessy has been using in her research.

In the field of restoration ecology, these biological indicators are employed “in an effort to quantify how much stress an ecosystem is under and develop techniques to restore it,” said Fennessy. “Organisms will often integrate different changes that show the disturbance.”

Disruptions in an ecosystem can cause changes in the inhabiting species. Ecologists typically look for characteristic patterns of change in a given area, measure that pattern, and eventually find something that will remedy the original disturbance.

Along with her own research, Fennessy is involved in the activities of the U.S. Environmental Protection Agency. This agency is a national technical workshop devoted to the development of useful biological indicators, and Fennessy has been working with the agency for three years.

Over the past ten years, this ecological issue has exploded, and the workshop has developed a program to observe and study the environmental conditions and species of an ecosystem. The Environmental Monitoring Assessment Program (EMAP) was formed because people wanted to observe the changes in an ecosystem in depth. By observing these changes, EMAP can recognize if certain areas are getting into trouble.

The upcoming colloquium, unlike some of the ones in the past, is definitely more general in regards to the issues being discussed. Previous lectures have been targeted specifically at students who are heavily involved in specific areas of biology or chemistry, but Fennessy is sure that this is the case in this instance. According to Fennessy, anyone who is interested or concerned with the detrimental effect humanity has upon the environment and what is being done to remedy it should attend the lecture.

“Enjoy sharing what I’ve done with students and people in other departments,” said Fennessy. “The colloquium is a way to learn about what the faculty members are doing with their research.”

For all students Thursday in Peirce Hall

Representatives from many professional fields including sales, marketing, insurance, transportation, printing, publishing, banking and other financial services will be in attendance to accept resumes, which interested students are encouraged to have with them. The prospective employers run the gamut from Anderson Consulting and the Peace Corp to the YMCA Summer Camps. Some of the organizations, particularly the YMCA camps, will be seeking students for summer employment.

In order to help students prepare for Career and Graduate/Professional School Day, the CDC will be holding special walk-in hours where career counselors will critique a student’s resume or answer questions regarding how to best introduce yourself to an employer or the proper questions to ask. These hours are Friday from 3 to 5 p.m., Monday from 9 a.m. to noon and Tuesday from 1 to 4 p.m. The representatives can be found from graduate and professional schools vary according to each school’s philosophy on recruiting, but typically range from admission officers to Kenyon alumni that are currently graduate students.

Unfortunately, the CDC was somewhat limited in the schools and employers that it could recruit for Career Day because it is one-day event and Gambler is not readily accessible for many employers. However, Kenyon students are also invited to contact Denison University’s Career and Graduate/Professional School Day on Friday from 11 a.m. to 3 p.m. in Slayer Hall.

Fennessy also encourages students to contact the CDC for help in contacting other postgraduate schools or employers that are not at Career Day.

**New concepts of Genesis at the millennium**

**BY CHRISTY KUBERT**

This week the Kenyon community will be treated to its second noontime Lecturers series as Elain Pagels, Harrington Starr Professor of Religion at Stanford University, will speak Thursday at 7:30 p.m. in Highley Auditorium.

Pagels will speak on *Millenarian Reflections on the Book of Eve,* a topic tied to her most recent book, *The Origin of Good and Evil.* She wrote the book after the death of her husband, which was a curiosity of how people of different faiths cope with grief and, as well as how different religions "give shape to the invisible evil," and how our imaginative constructions of what is invisible due to the ways we respond to people around us, to events and the natural world.

"She is a very good speaker, heavily many people have seen in before -- discussing Genesis at the nature of evil on PBS," assistant professor of Religion Royal Hodr, who was able to meet with her when he was a graduate student.

"I think one of Pagels' real jobs has been to bridge serious, thought from the large public," assistant professor of Religion Royal Hodr, who was able to meet with her when he was a graduate student. "I think one of Pagels' real jobs has been to bridge serious, thought from the large public." She writes in an accessible way and she's become a very public figure, being on TV and in print and television and newspaper..." Pagels is very articulate and has a very wide variety of people.

"All you have to do is turn on the TV and read the newspaper to read aboutmillenarian research..." Pagels is very articulate and has a very wide variety of people.

Elaine Pagels, author of *The Gnostic Gospels,* is the most recent speaker. "Her message is that she's going to try to show that these are not new kinds of questions." Pagels may also touch on theodicy, why bad things happen to good people. "She may help to put some Y2K apocalyptic fervor of the new millennium to rest, or maybe the opposite," said Pagels.

**Gnostic Catholicism, on which Pagels has concentrated much of her academic effort, was an early form of Christianity that boasted a special knowledge of the teachings of Jesus. Gnosticism, not deemed heretical, includes ideas of God as both Father and Mother, a symbolic rather than factual study of the Resurrection and the importance of self-knowledge to discovering God.** Pagels has also confronted issues of gender and religion. "She looked at the story of Genesis..." which was reformed by Augustine, a story about original freedom to [one] of original sin. Augustine's interpretation of the story intimately connected to the way he thought about women and sexuality," said Fagan.

Pagels completed her undergraduate work in history and graduate work in classical studies at Stanford University, and in 1970 received her doctorate from Harvard. She has been awarded a Rockefeller Fellowship (1975) and a Guggenheim Fellowship (1979), as well as the MacArthur Fellow (1981), nicknamed the "genius award." She has taught at Princes University since 1983. Originally slated to speak on Oct. 7, Pagels was rescheduled to replace playwright Wendy Wasserstein, who had to cancel her visit. Pagels was scheduled as the third Faculty Lecturers series speaker but will be the second of two visitors this semester, as biologist author E. O. Wilson was forced to cancel his visit because of a death in the family.

"People in English literature, history, art will be really fascinated by what she has to say and the implications on their own disciplines," said Rhodes. "She's a world class scholar with an international reputation who's been a pioneer in religious study, to talk about basic questions of good and evil, I don't know. For the general question, it gets any better than that."
Kenton days, Moscow nights

BY SARAH HART
A& E Editor

Tuesday night the Kenton community will have the chance to support an orphanage through Russian folk music. At 7 p.m. in Rose Hall a group of men will perform "Moscow Nights," a concert accepting donations for the orphanage fund.

The Russian performers have joined with a group of Christians from mid and eastern Ohio to form a people to people relief offering for the children of the Belica Orphanage in Kursk.

Pastor of Epworth United Methodist Church Donald Newland, who helped to organize the event, said, "Many of these children are Chernobyl victims that are now growing up." The concert itself is free, though attendees are welcome to contribute. The performance is sponsored by Department of Music, Board of Campus Ministries and Multicultural Council.

A variety of music will be performed, including not only a lot of Russian folk music, but also classical music and some easily recognizable American tunes. One of the tricks of the performers is to begin with some Russian folk song, then transform it into something more akin to Russian folk music.

"You don't recognize a song, then all of a sudden it becomes something you don't recognize at all," said Newland.

The group leader, Vitaliy Bezrodnov, speaks English and is married to woman in Cleveland, which provides the group "the chance to go to Ohio. It's fun—a fun performance," said Newland. "Vitaliy has a very dry wit. They do a lot with audience participation."
Storer Hall dedication culminates in concert

BY ANN HERBERT
Staff Writer

Storer Hall’s dedication culminates Saturday evening with a free concert by the Orion String Quartet. The concert, which begins at 8:30 p.m., will be performed in Rossie Hall.

The four men who make up the quartet are currently serving as the Quartet-in-Residence at the Chamber Music Society of New York City’s Lincoln Center. The quartet, now in its 12th season, was made up of Daniel and Todd Phillips, brothers who both play the violin, Steven Tenenbaum on the viola and Timothy Eddy on the cello. The group’s reputation has grown in recent years, both in the United States and abroad. It was this reputation that sparked the interest of Visiting Assistant Professor of Music Theodore Buehrer, who organized the event.

The quartet has also agreed to lead a master class Saturday afternoon for Kenyon’s string students.

“Working with students is a real benefit,” said Buehrer. The members of the quartet will listen to the students play, and then offer “constructive criticism and advice,” he explained.

The concert itself will consist of three pieces: two by Ludwig van Beethoven and one by 20th-century American composer Samuel Barber. The two pieces by Beethoven, Op. 18 No. 6 and Op. 59 No. 3, are from different parts of the composer’s life and exhibit several aspects of his ability. The first, Op. 18 No. 6, is from his early works. Buehrer categorized this piece as “imitating his contemporaries.”

Contrasting Beethoven’s new approaches are recognizable in the second piece, which was written after he began to experience some symptoms of deafness. “You can hear the anguish, more agony,” said Buehrer.

Although Samuel Barber’s Quartet, Op. 11 may not be recognizable by name alone for those not well-versed in American composers, the avid moviegoer will find the music very familiar. The piece, although not often performed, has been used frequently in movies such as Platoon. According to Buehrer, the Orion Quartet’s version of the piece will not be as familiar as the large orchestra version, because it has been replaced by the “original, intimate setting” of a quartet.

The concert, which is part of the Gund Concert Series and is co-sponsored by the Department of Music, is an amazing opportunity for lovers of classical music.

The repertory of these men promises a truly astounding evening.

Femmes to stage political Wasserstein reading

BY SARAH HART
A&E Editor

Playwright Wendy Wasserstein was originally scheduled to speak at an event at Mayo Hall. Due to the birth of her daughter, she has canceled her visit. So that the Kenyon community might still experience the renowned playwright’s work, the members of Stage Femmes planned a reading of her most recent play.

A reading of An American Duchess

BY JAMES SHERIDAN
Film Critic

Dangerous Liaisons
Wednesday 10:15 p.m.
Highly Auditorium

Stephen Frears’ 1988 film Dangerous Liaisons is the tumultuous, Oscar-winning adaptation of Christopher Hampton’s play Les Liaisons Dangereuses. Set in pre-revolutionary France, Glenn Close stars as the scheming Madame De Merteuil who entices the help of a former lover, Vicomte De Valmont (John Malkovich) to destroy the relationships around her. Initially, she challenges Valmont to deflower the virginal blonde (Uma Thurman) of a former lover (Keanu Reeves). Valmont finds the task easily suited to his tastes, but also decides to pursue the chaste Madame De Tourvel (Michelle Pfeiffer), making her fall in love with him and betray all that she stands for in the process. Through forged letters, vicious lies and seduction, the film showcases the decadence of the Marquise and Valmont as they destroy the lives of those around them. A languorous and richly photographed film, Dangerous Liaisons is a spellbinding web of love, betrayal and intrigue. Close’s performance is considered one of the best of her career. The film garnered three Academy Awards for Best Screenplay, Best Art Direction and Best Costume Design.

Bands battle to play Winter Send Off

BY BECCA KENT
Staff Writer

Ten bands will fight it out tomorrow at 8 p.m. in Philander’s Pub for the right to be Kenyon’s favorite band.

The winner of the contest will play at this year’s Winter Send Off, a new event planned by Social Board. Similar to the annual Summer Send Off, Winter Send Off will feature a well-known visiting band performing with Kenyon bands.

Competing bands cover a wide variety of music. Some of these bands include Aches of the Other, Cellulir, Colonel Catastrophe and his Loaded Gun, Corton Doggie and the Speed Unit, Howes Wagner, The JHC, Mow Mix, reading from scripts using only minimal props and no costumes.

The cast of readers was chosen from students involved in Stage Femmes productions from the past two years. These include seniors Kris Armstrong and Ken Schultz, juniors Gill Reyes and Katlin Smith and sophomores Lauren Hines and Brant Russell.

“One of the best parts about this project is to work with all of this talent together,” said Plank. “Stage Femmes has been really lucky in the high quality actors trying out for its show, and they are going to be fabulous.”

Following the reading will be an optional discussion with refreshments.

sector 7-G, Waiting for Molly and Yo.

Chris Meyers ’02, lead singer and guitarist for Waiting for Molly, acknowledges the difficulty of judging such different bands in one contest. “I’m not a huge fan of contests because they force people to say that one band is better than another band. When you have so many different styles competing, you simply can’t do that.” However, Meyers believes the social board goes about this decision making process in “the best possible way.”
**OFF THE HILL**

World Series in need of a serious shake-up?

By JEREMY UHR
Senior Staff Columnist

As I was watching the World Series the other night, an interesting thought struck me: what's the big deal? Why is it that after a grueling 162-game regular season, a simple seven-game series decides everything and crowns this year's champion? Although the Yankees beat the Braves in the World Series, no team will top the Braves in terms of total games won this year. While the Yankees will walk away with a World Series title, the Braves will walk away having won more games than anybody else but with nothing to show for their sustained excellence.

Something seems amiss here. (But if I go any farther, let this much be clear: this isn't the grumbling of a disgruntled Braves fan, I hate the Braves. Very much so, in fact. This is a purely speculative inquiry.) A playoff system rewards a very limited kind of excellence, and that the Yankees beat the Braves in a seven-game series in October, when the Braves had outperformed them over one isolated period in the season.

Although the other two major American sports, basketball and football, also use a playoff system, it's interesting to note that a number of other sports, from the PGA Tour, to NASCAR and Formula One racing, to Tennis and European Soccer Leagues, use more cumulative, season-long methods to determine the year's best. A playoff system often reduces the regular season to a sort of pennant status, as any fan of the NBA in recent years could attest. During the Jordan era, fans could more or less tune out during the regular season, perhaps looking at the standings now and then to check if the Bulls were on course for the playoffs, and need only watch in earnest once postseason began. But this can't be the case with baseball, or any sport that involves an obviously finite number of games.

CONTINUED FROM PAGE 12

Controversy continues among sports fans who believe the system is not equitable and has resulted in a number of closely contested games. In particular, fans have expressed concern about the World Series, which has been criticized for producing close, high-stakes games that lack the excitement of a seven-game playoff series.

In the World Series, the first team to win four games out of seven wins the championship. This system has come under scrutiny in recent years, as it has resulted in some extremely close and controversial conclusions.

**SPORTS**

**Football slammed by Grove City**

By JOSIE DONALDSON
Staff Writer

Scores can be deceiving, and the 45-26 final of the Kenyon College—Grove City football game is just that. While the Lords lost and dropped to 1-4, they were within a touchdown of defeating Grove City with just over seven minutes left in the game. Desperation drove Grove City to an 85-yard drive to take the lead back.

In contrast to Lords games during the beginning of the season, the Grove City game was controlled by both teams' offenses and not their defenses. Nobody knew how the Lords would come out after their 49-point outpouring of offense against Oberlin, but it was apparent from the first drive the Lords' offense was prepared to put some points on the board. Led by a balanced attack of Tony Miga '02 passes and Anthony Togliatti '00 rushes, the Lords tied 10 minutes of clock and en route to a 7-6 lead.

"I think the combination of several weeks of solid offensive practice and increased confidence in our offensive capabilities have helped us move the ball better," said Miga. "We passed more this week because we knew we could and because we can't rely on Togliatti to do everything for us. Togliatti ended the day with a very productive 130 yards, and although the Lords planned to lighten Togliatti's load, he finished with 240 yards on 37 rushing attempts.

However, it only took Grove City one play from scrimmage to match the Lords touchdown as their running back R.J. Bowser scammed for a 73-yard touchdown. Grove City's 2-42 pound workhorse carried the load against the Lords defense.

**Lords: earn tie with Wittenberg**

**CONTINUED FROM PAGE 12**

The team did not worry about what others were doing. They maintained their high-scoring style throughout the game, leading the Wittenberg backfield to keep Grove City back onto equal terms. From that point on, Kenyon continued to dominate play, with Julian Quasha '03 rushing 41 times for 305 yard. Grove City did not try to fool the Lords; they only threw the ball twice—one was an interception and the other was a spike to stop the clock. Kenyon's smaller defensive line simply had trouble stopping Bowser early in his run, and although the Lords often got penetration into the backfield they had a hard time wrapping up the big back.

"Our defense played awful," said a defeated Ben Mellino '02. "I'll give R.J. Bowser his due because he is a great back, but as a unit we know we can do better. It usually was a shame because our offense was in a position to win, and we let it slip through our hands." Kenyon's usually stellar defense probably ran into a little too much strength as Grove City's line and running backs were down by the fourth quarter. Bowser was constantly wrapped up by defensive backs, which shows how often he was bashed through the Kenyon Defensive line. Cornerbacks Chris Dorsey '00 and Adam Exline '01 and middle linebacker Kris Cherry were able to mount anything more than occasional forays forward, with the majority of the action taking place in midfield as both sides' defensive backlines held firm.

Kenyon next takes the field against Ohio Wesleyan University, who are undefeated in conference play, Saturday at 2 p.m. at McCrake Field. The Lords then close out their season at home Wednesday against Urbana University.

**Ladies: solid play to end season**

**CONTINUED FROM PAGE 12**

Ladies' hockey kickoff was made to show a previously close ending to the weather. A win today would move Kenyon past Wooster for possession of sixth place in the conference. The season concludes Saturday against undefeated Ohio Wesleyan University.

"Of the season's closure, coach Macaulay Collins '03 feels, "complete knowing that we have played our hearts out and were in contention throughout. It's times like the Dennison game [a 2-1 loss] that made us realize how close we were to being a top-notch team. We just need to figure out how to win close games."

Macaroy added, "We want to ""be able to look back and know we played our best in our last few games. We don't have key regrets. I'm sure we'll be able to succeed in that if we approach our remaining games with the desire to win and the confidence that we have the ability to do so."
BY CHRISTIE CLOSE
Staff Writer

This weekend, in the 24th Annual intrasquad meet, the varsity (Lords beat the first-year squad 111-92, while the varsity ladies beat the first-year swimmers 120-55. If the intrasquad meet is any indication of this team's potential, we have a lot to look forward to come Nationals.

Captian Colby Gemich '00 said, "The [first-year] versus varsity meet went better than planned.

The [first-year] swimmers were very impressive with a combination of both speed, strength and stamina. I don't remember swimming on a deeper team.

We have all the events covered and now we can look forward to swimming as a team against some of the best competition in the country.'"

The Lords' first-year swimmers opened by impressively winning the 400 yard medley relay in a time of 3:45.75, which is a new meet record. The record previously held for this event was set in 1999 by a team consisting of Sarah Thoresen, Ann Foley, Nikki Philipsborn and Mandy Carroll. The team's time was 3:52.25.

In addition, another two meet records were broken for the Lords: Sarah Thoresen broke the 200 yard breaststroke with a time of 2:02.68, and the 200 yard butterfly with a 2:02.28. Kiefer, not far behind, finished the 200 yard breaststroke in second place with a 2:03.82.

The Lady Lords opened their meet with a time of 3:53.35, while white second place went to the first-year "B" team in 4:01.58 with the varsity "A" team in third with a 4:01.73.

Melissa Hoits '03 won the 200 yard freestyle with four seconds with a 2:03.24, with Nikki Watson '01 trailing in second place with a time of 2:07.03. Emily Hatcher '03 won the 200 yard individual medley by three seconds in a time of 2:11.24, while Abby Behrenfrother '02 followed with a time of 2:11.24.

Besty Garratt '03 won the 200 yard breaststroke with a time of 2:13.44, while Waton came in second place with a time of 2:14.82. Neala Kendall '01 took both the 100 yard and 500 yard freestyle events, with a 1:10.05 and a 5:26.52, respectively.

In the 50 yard freestyle, Sarah Leone '01 took first with a 26.26 and Erica Carroll '01 placed second in 26.3. Leone also claimed first in the 100 yard freestyle with a time of 57.77 while Katherine Churchill '03 finished a close second in 57.77.

The first-year Ladies won both the freestyle and the medley relays. They won the 400 yard medley relay with their 4:16.12. The varisty trailed behind in 4:21.84. Even more impressive, in the 400 yard freestyle relay both the "A" and "B" first-year teams beat the varisty "A" team.

The first-year "A" team won with a time of 3:53.35, while white second place went to the first-year "B" team in 4:01.58 with the varsity "A" team in third with a 4:01.73.

The first-year Ladies won both the freestyle and the medley relays. They won the 400 yard medley relay with their 4:16.12. The varisty trailed behind in 4:21.84. Even more impressive, in the 400 yard freestyle relay both the "A" and "B" first-year teams beat the varisty "A" team.

The first-year "A" team won with a time of 3:53.35, while white second place went to the first-year "B" team in 4:01.58 with the varsity "A" team in third with a 4:01.73.

The first-year "A" team won with a time of 3:53.35, while white second place went to the first-year "B" team in 4:01.58 with the varsity "A" team in third with a 4:01.73.

Ladies' rugby triumphs

BY AMANDA LURCK
Staff Writer

Despite two canceled games within the last month, a vicious scrummage against Oberlin that sent some players to the hospital and a referee who just forgot to appear, the Kenyon women's rugby club played like true Amazons Saturday, beating Wittenberg 5-0.

The weather was awful, but "everyone played with more aggression than usual. I've never seen a 20 degree sleet," said Chrisy Bush '00. The win heralded a late start to the women's season, but a start full of promise.

After Wittenberg's coach volunteered to ref the first 25-minute half, the game began slowly but picked up pace as soon as the women began to warm up. With a large crowd full of concerned parents cheering them on, the game remained a draw until the second half, when the women "seemed to be playing with a fever that would not cool," according to Meghan Foley '01, who helped to referee the second half with team president Martha McKee '00. "The backs and scrums worked really well together and that Mandy Arrick '01 was a force to be reckoned with," she continued.

The crowd screamed in delight as Mandi and the rest of the backs made runs run after run toward the in-goal; after rookie back Liz Fuet '03 made a superspeedy breakaway, to within 20 yards of the in-goal her fellow female ruggers chanted her name as a choir.

Tension continued until Ant Palocico '01 finally whirled and charged past the scrum to make a try and move the score to 5-0. Though the kick after the try was unsuccessful, the women could not be daunted and continued to control the game.

The scrum stayed tight and Megan Dietrich '00 was loaded for her play. Wendy Littlepage '01 injured her knee in one of the many chaotic scrummers that dotted the game, but managed to walk off the field with her parents. Despite that injury, and despite the rain and cold, the Ladies scored a try and managed to win their first game of the season.

The Women's rugby club will attempt to defend its 1-0 record Saturday at 11 a.m. at home against Denison's Big Red.

**Lords’ and Ladies’ Soccer enjoys successful streak**

**By Keith Peterson**

Song Writer

The Kenyon College Ladies soccer team defeated Oberlin College last night by a score of 1-0. Shannon Maroney ’01 scored the lone goal. Although the Ladies are in the middle of an eight-day span in which they have five games against conference opponents, they have yet to lose their characteristic mental toughness and physical play. It was an impressive victory for the Ladies as they were finally able to pull all aspects of their game together.

Kenyon dominated Oberlin throughout the match. The win improved their record to 2-4 in the conference and 8-10 overall.

The Ladies blanked Hiram College 1-0 on Monday. Kari Vandenburgh ’03 scored off a free kick in the first half of the game.

Coach Thirke said, “Against Hiram we played flat. The saying goes, ‘If you are playing poorly and still win you are a good team.’ That is only partially true as you may just be playing a weak team. Both were true about the Hiram game.”

“Sure, this game was another

**Field hockey dismisses Earlham**

Regular season finishes on a positive note; playoffs ahead

**By Jeremy Suhr Staff Writer**

The Lords field hockey team hosted Earlham College Saturday, winning 1-0. It was a great day, a day to honor the season, have parents at the games and to put the last touches on another fine season of competition.

Kenyon was determined to start of strong, but saw Earlham take seven quick shots on goal during the first half. Thanks to some excellent work in the goal by captain Ericka Prabl ’00 the Ladies were able to keep their opponents scoreless in the first half. On the other side of the field, Mary Hill ’02 scored her first goal of the season with 14:09 remaining in the first half. The assist was credited to Whitney Riepe ’03, who finishes the regular season as Kenyon’s scoring leader.

It was a marginal lead that turned out to be insurmountable. The Ladies tightened up their defense and did not let Earlham take one shot on goal for the duration of the second half.

Emily Colman ’02 said, “It was a great day to end the regular season.” Kenyon was able to keep their opponents out of their circle the second half, and made their afternoon a lot easier. Prabl finished with five saves, to set her season total at 253, which ranks fifth among single-season saves in Kenyon history. She also recorded her 12th career shutout, ranking her second among Kenyon’s all-time leaders.

The regular season is finished, but there is still more competition left for Kenyon. The Ladies will play Saturday, Oct. 30, and Sunday, Oct. 31, at Oberlin College in the Midwest Field Hockey Coaches Association Regional tournament.
