ALUMNI ASSOCIATION VOTES SALARY RAISE

New Building Is Being Rooded Over Before Winter

Since the opening of college in September, the new Commons building, Peirce Hall, has risen from the first floor level to the third. A great mass of concrete has been erected, and slowly but steadily. At present all activity is being directed toward the structure before cold weather comes, in order that interior work may be done during the next ten months. For this reason only half halls have thus far been erected, and the interior has been left practically unworked.

In the meantime, the students have completed their part of the general construction work. Final excavating and leveling of floors are being rushed, and the floors in the main are ready for concrete surface. None of the room partitions have been installed. All the doors and the only walls now exist are those required to support the superstructure. During the last three weeks and past week, heating and concrete outlets have been installed, and main lines of the heating and ventilation system have been installed.

The south end of the building, which is a complete new room, has been completed.

LAWILL LECTURERS TO ADDRESS COLLEGE

Triennial Program Is Unusually Attractive

The Lawill Lectures, delivered every three years before the college under the stipulation of the Lawill Lecture Foundation, fall due during the current college year. A schedule of the lectures to be delivered has been announced recently.

The first lecture will be given by Mr. John Neil on the eighth of December. Mr. Neil is noted as a member of Mr. Peirce's panel, and what he has to tell the college men will probably be extremely interesting.

Further resolutions that the education of the college be raised, and that provision be made for an adequate number of teaching fellows in the faculty and to report thereon to the Executive Committee.

An appropriation of $500 to provide more adequate compensation for the college faculty for the current academic year was voted by the Alumni Council at its annual meeting on October 15 at the Mount Vernon Country Club. Recognizing this action as a temporary expedient, the council also voted the appointment of a committee of five to consider, in consultation with President Peirce, ways and means of providing proper and adequate additions to the salaries of the faculty in the future.

The meeting was preceded by a dinner at which President Peirce and members of the faculty of the college spoke informally. Thomas J. Coogan, '81, was elected President of the Council for the ensuing year.

The proposal that the Council should appropriate money to augment faculty salaries for the current academic year was brought before the committee which recommended the passage of the resolution which

ADMISSION

KENTON COLLEGE

ALUMNI NOTES

Andrew Williamson, B.S., M.S., dean of the School of Business and Economics at the University of Kentucky, said that he was looking forward to seeing his alma mater's students again.

Dean William J. Byers of Kenton College was on hand to welcome the returning students.

ALUMNI ASSOCIATION

The Alumni Association of Kenton College held its annual meeting on Saturday, the twenty-seventh of October.

DEAN PEIRCE VISTAS THE EAST

President Peirce recently spent a week in Boston, visiting with the General Council of the Alumni Association. Several Trustees of the college were in attendance, and the President was able to see some matters of minor importance relative to the current year's work. He had planned to attend the Kansas City meeting, but found out after he arrived that the date had been changed without his having received a formal notice.

In New York City, Dr. Peirce had some business with Mr. Cummings, Mr. Bartlett, and Mr. Morley, and other members of the Executive Committee of the Alumni Association. He is the new president of the New York Alumni Association.

Don Stowe has some ambitious plans for the annual Alumni banquet, which is set for Sunday evening, February 4, 1908. Mr. Stowe has asked for the model of the new Peirce Hall, which is now on exhibition in the president's office, and he has invited Mr. Orange, the architect, and Mr. Ginn to come to New York for the occasion. Mr. Crosswell, already being there.

KENTON DINNER

AT CONVENTION

A Kenton dinner, attended by members of the Kenton College Alumni Association, was held at the Hotel Frazee on Thursday evening. October 27.

The dinner was attended by a number of distinguished men who enjoyed renewing memories of college days, and renewing old friendships. There were songs, some of them present had furnished in touch with any similar affair, but there are a number of it a matter of deep regret to the assemblage which they were unable to present.

Dr. Peirce has been associated with the Rev. George Davenin of Los Angeles as a tenor bassist. The after dinner speech of the Rev. George Davenin of Los Angeles was given an interesting

Dr. Peirce Peakes

A little over a week ago, the cession of the tenth anniversary of the Kenton College Fellowship at the conclusion of the World War. On the occasion of this anniversary, a special address was made to the Kenton College charter members, and to those of whom Dr. Peirce had been a part of the occasion.

On that same day in Washington, D.C., President Roosevelt visited the principal address at the thanksgiving services held before the President at the White House. Mr. Roosevelt was also also Special Postmaster at the White House. He said:

James J. W. Wells

James J. W. Wells, of 1865, was on hand at the Kenton College reunion, and said:

I was three Times President of New York State, and was probably the oldest man in his profession at the time of his death. For over forty years he has been involved in the work in which he resided, and was rightly called the "father of the 'Bronx" by every one of the real estate deals in connection with that organization. Those twenty

A Jennings

A Jennings was one of the leaders of the movement to establish the Kenton College Alumni Association. He is the president of Kenton College and has been in charge of the alumni association since its establishment.

Dr. Peirce's Column

Continued from page one

America, the student council's ideal of a "typical college man" is realized at the Kenton campus.

A few days before the Harvard commencement, an administrative officer of one of the best denominational colleges in the west spent a week at Kenton College. The second purpose of his visit to Cambria was, with the same aim, to gain support in principles that we know to be right but have not far the courage of the constitution fully to adopt.

His college has a student body of about five hundred men, with a smaller number of women, while the demand that practical teaching and learning should be encouraged for the Bachelor's degree is immediate.

If only they could organize the women into a separate college! After this great step had been taken, it would then be possible to limit the number of the men and thereby to extend from invasion; the integrity of the true college course. My visitors left the Kenton College at the Washington Cathedral and were received with good reason. My visitors left the Kenton College at the Washington Cathedral and were received with good reason. My visitors left the Kenton College at the Washington Cathedral and were received with good reason.
ALUMNI VOTE SALARY RAISE
Continued from page one

is printed in full in the preceding column. The resolution provides for a appropriation of $1000 from the Alumni Council for 1929. This sum to be distributed next June in proportion to the number of members of the Board of Trustees, with due regard for those members, among the number of members. It is provided further for the appointment of a committee to consider the above-mentioned means of raising about $9000 for work in connection with the college affairs.

Both provisions were considered by a meeting of the Council before definite action was taken.

Unanimous Action Taken

The reason which led to the proposal of the resolution was stated to be the retiring of Rev. L. C. Marlowe, 92, who had served as president of this institution, The Council then unanimously voted in favor of the proposal. The provisions will accordingly go into effect next June. While the method of distributing the added compensation is still to be determined, it is anticipated that a proportionate increase of salaries, with due regard for those members, among the number of members, in general, will be made to those members.

It was generally recognized by the members of the Council that in voting this resolution they had taken their stand on a matter which was not made because they were carrying out the avowed purpose of the campaign "to advance the interests of the college."

Campaign Report Shows Progress

Clare Hammond, 94, chairman of the Finance Committee, reported that to date Kenyon alumni had subscribed in the four membership campaigns $3756 to the Council fund and $1580 had actually been paid. The remaining $2176 almost wholly represented subscriptions. It is expected that the $3756 will be added to the fund, when Mr. Hammond urged the various districts to renew their solicitation in promoting the campaign after the Thanksgiving holiday.

Support of Collegian Continued

Council support of the Kenyon Collegian for 1928-29 was assured, when, at the recommendation of the Committee on Publications, it was voted that the collegian's plan of covering certain members of the staff upon the expiration of three years' service be carried out. The Committee on Publications also strongly urged the need of increasing the number of the local alumni subscribers to the paper.

Local Associations Recognized

The Council formally recognized the following local alumni associations as entitled to representation in the Council pursuant to the provisions of the Constitution: (a) Akron; (b) Canton; (c) Central Ohio; (d) Cincinnati; (e) Columbus; (f) Cleveland; (g) Columbus and vicinity; (h) Detroit; (i) El Paso; (j) Kansas City; (k) Knox County; (l) Mahoning Valley; (m) Northern Ohio; (n) Northwestern Ohio; (o) Ohio Valley; (p) Pittsburgh; (q) Washington, D.C. It will be noted that this list includes the Mahoning Valley association which was organized last spring.

Officers Elected

By unanimous vote the secretary was instructed to cast a ballot for the following officers for the year: President, Thomas J. Goddard, '03; Vice-President, Don C. Willsie, 92; Treasurer and Secretary, Henry W. Philbrick, '97, members of the Executive Committee to serve for three years, W. L. Cummings, 92, Clark Hammond, 94, members of the Council to serve for one year (to succeed themselves), R. J. Better, 94, Ralph C. Wingwal, 94, P. B. Stonestreet, 94, and C. C. Wright, 96.

Retiring President thanked

Matthew M. Faury, 94, retiring President of the Council, was thanked in the following resolution, unanimously passed:

"Resolved, that upon the retirement of Mr. M. M. Faury as President of the Alumni Council of this institution, all our congratulations be tendered to him and that his years of devoted and unceasing service be recognized in the Arborian for the remainder of the year."

TO THE ALUMNI

Through the courtesy of the executive committee of the Alumni Council, a copy of this issue of the Collegian will be sent to every alumni and alumna of the College, as his or her name is known for the alumni secretariat. It has been the custom of the Council to do this occasionally over since the organization of the Alumni Association. The Council hopes by this action to increase the stimulating subscriptions for the Collegian, and to remind those alumni who have not as yet allied themselves with the Alumni Association of the services of the Council. As the board of the Council has chosen this form of the Collegian to send to all the alumni of the college because it contains news which should interest all those who care anything about the welfare of Kenyon College.

And, of course, it is hoped that many of the alumni receiving this issue of the Collegian will realize that there is no other publication to which they should subscribe regularly to the Collegian, as the monthly Collegian is the only periodical in which such news occur. And if any of the alumni fail to receive the Collegian, the secretariat is to be notified, so that the news may be corrected.

ANOTHER ELECTION MYSTERY

The election is over and past matters

enter the memory of the day. There is no doubt as to who the nation's choice for the presidency is and there is no doubt about the number of men who will vote for each candidate. But it is extremely interesting to note certain facts about the results that have been given the political portion of the voting population of the country left to vote. But among the outstanding characteristics of that smaller portion we are certainly safe in saying that the men of business, men and public officials. It is between these two groups that a marked difference of opinion became noticeable during the campaign preceding the presidential election.

There is no doubt as to what is commonly referred to as "the business people" of this country, or "the country," who have not been, and who will not be, able to make up their minds on the issue of the country's choice. There are those who are extremely anxious to see the business portion of the country have a chance to try out the men who have not been able to make up their minds on the issue of the country's choice. They are a large number of citizens who believe that the country should not be governed by the men who cannot make up their minds on the issue of the country's choice.

It is certain that there is a great deal of interest in the country's choice, but there is also a great deal of interest in the country's choice. It is certain that there is a great deal of interest in the country's choice, but there is also a great deal of interest in the country's choice.

walls of commons

Continued from page one.

kitchen and pantry is built up to the roof level, with the exception of the south gable. Electrical work and the building proper is the largest chimney are completed; practically all that remains here before weather work may be begun is to erect the roof and install the win-

dows.

The walls of the main dining hall have reached the third floor level. In the windows, the high vaulted roof is now in place. The brick work is about one-third finished. At the north end of the hall the stairway and gallery is in place. In this room, the elevators of the roof and glazing of the open-
ing along this line remains before interior work can be begun. Handsome and deli-
cately curved stone lintels are being created. The doors are to be as rapidly as possible. The large bay window facing the park and the two smaller bays facing the valley have the greater part of their interior work already in pro-

gress. Except for these slight de-

tails, the bare brick walls have been left unfinished.

The double-arched Gothic loggia opening from the east side of the main hall is completed, but construction of the large stone terrace is to be delayed until spring. This loggia lies almost directly behind the Chase Memorial Tower; its
terrace will extend nearly halfway across the east side of the dining hall, extending about twenty feet in width.

The north end of the building has reached its third floor level, and structural work for the remaining story is now in place. When the fourth floor level is reached, this portion of the building will be ready for its roof. The north entry with its carved stone lintel and the brick work about the fireplace in the lounge room are the only completed parts in this end. The north entry basement stairs have not yet been begun.

Much activity at present is being directed toward erecting the Phil-
lander Chase Memorial Tower in the level of the north and dining hall roofs. Stone work here has reached the level of the first group of windows. The floor of the lower floor off its handsome, curved inscription. "Pierce Hall." is already in place. Below the name on the right side is the seal of Dexter Hall on the left, that of Kenyon College. Inside the tower, above the lower, the large lintel over the door lead-
ing into the main dining hall names the Philander Chase Mem-
orial Tower. Just to the right of the tower is the curved stone stairway which will ultimately lead to the upper floors of the tower, under the vaulted vestibule. At present the stairway has reached its first landing, directly above the outside entrance to the tower. The inner wall of the tower is con-

structed of stone work curved to fit the contours of the stairway. This inner vestibule wall is practically the only interior masonry which is complete.

The windows for the tower stair landings will be illustrative of the life of Bishop Chase. In addition to these stained glass windows, many of the openings in the main hall will be filled with further decora-
tive windows. All of these are being created and executed by Charles J. Connick of Boston, the superior-
ity of whose stained glass is un questioned in America. Many of the openings will have to be tem-
porarily filled with plain glass. It is hoped that all of Mr. Connick's windows may be installed by Com-
munication Week next June.

All about the rising building is a numerous piece of decorative stone, carved cut, and numbered to fit in various places. There are large blocks for corners of the building, delicately carved pieces for the windows in the lower, and smaller blocks to compose the interior and exterior of the main dining hall. The very interesting set of pieces consists of two parts of a mantel piece for one of the fire places. On the two sides of this are carved fig-
ures of various birds and animals from the hunt.

The great beams which will sup-
port the roof of the main dining hall are being shaped and cut, but it will be some time before all four of them are ready for erection. These massive beams must be framed outside the building, after which they will be dismantled and

MORGAN SMITH RECOVERING FROM SERIOUS ACCIDENT

Some time ago word was received at Gambier that Morgan Smith, of last year's graduating class, had been seriously injured in a traffic accident. Naturally enough, his illness has been greatly concerned, and so many have worked to secure full medical consultation, the unfailing sympathy and the condition of the patient.

A recent telephone call from Smith expresses that the accident was caused by a truck, but further particulars are being withheld.

About ten days after he was admitted to the hospital, Smith was able to read a letter which his chapter had sent him from Gambier. He has been returned to his home in Iowa, and the result of the accident has been rapid since that time.

No explanation has resulted from his accident and there is every reason to believe that he will soon be completely recovered.

The accident was near the historic Gambier home, the result of which was to be very serious.

DOCTOR RIGG COMPOSES HOOVER CAMPAIGN SONG

Faculty Band Strums His

Dr. Merlin Rigg gave a truly original turn to the presidential cam-
paign. While the nation was busy voting, he formed a band of platitude, Dr. Rigg burst forth in music and expressed his political cor-
lections, his choice for president, and gave a few of his reasons for this choice in terms of the musical medium of verse. In short, Dr. Rigg has not only offered his sentiments to the nation but to Dr. Rigg. It is impossible to reproduce the music here, but the words follow:

"WHO? WHO? HOOVER!"

In eighteen hundred and seventy-four, there was born in Gambier A band who in the world's affairs a mighty part would play. It was a small band who first went within the schools of nature's out-of-doors; He worked upon his uncle's farm and always his church. Chorus: Who is this man so competent in the arts of war? They say he is a man of peace and war, and we agree, don't you. That we could trust the government to this man, a son learned and true? What? Who? Hoover? Who? What? Because he will.

And when the time arrived for him to choose his own career, He went to school and studied hard and became an engineer. He did his work so very well and worked with such a man. When China wanted railroad built why they just hired him for. Chorus: As years went on his fame increased; at last the people knew The man that they could call upon when things were hard to do. He led the starving Belgians, and then when peace was made We sent him on to Germany to give their children aid. Chorus: And now the time comes round again, November, back to the day When we must choose another hand to guide the ship of state. But when election day has come and we hear the people's voice, I think I know for certain just who will be their choice. Chorus:

PHILOMATHEAN OR- 
GANIZES FOR THE YEAR

The initial meeting of Philomath-
ian Society was held in West Wing parlor on Sunday evening, October twenty-second. Five new men were welcomed to associate membership. They are: Marvin Vesper, William Williams, John Vlachos, Professor Packard. Mr. Converse, president for the year, made a brief address, naming the history of Phi Society. He recalled its formation at Worthington; its organization; its work in placing it as the oldest literary society in the country in point of un-
territorial growth. He told of the prominence it enjoyed in the early days of the college, and a list of a few members of the organization among whom were Theodore R. Hayes, a Bostonian who lived during the latter part of the seventeenth century and the early years of the eighteenth, and recorded many interesting incidents which took place during that turbulent period. After this the meeting was turned over to an informal dis-
cussion.

The newly elected members of the Phi Kappa are: Marvin Vesper, William J. Brown, Chamberlain, Stowe, Stackhouse, Lyman, Bible. Leader, Rose, A. W. Price, G. W. Updagraff and McMannus.

FRESHMEN TEAM SHOWS UP WELL

The Kenyon collegian for November 1

For the first time in many years, Kenyon has an exceptionally good freshman football team. Every member of the team is in top form and seems to be improving all the time. The freshman team has made very creditable showings at several games. They include Dale, who has been one of the few conditioned for end, Allmah, who is a fine half back; C. H. H. Knapp, Melvin, Meredith, Papanek, Snyder, Thompson, Winows, Wolfe, Young, and Mansfield. 

KENYON LOSES TO HOBART

The Kenyon football team played the Hobart team at the Hobart field on Saturday, October 29. It was a game of the highest type. Both teams played like professionals, and everybody has reason to be interested in football, or they wouldn't try to cut us out. But not as this year. Consistentely throughout the season, there has been a goodly number on each afternoon and a great deal of valiant playing. For about three weeks this year has been uncovered. It is hardly fair to say "young men" for the football team, for these men have had a great deal of high school experience and will be real assets to Kenyon's eleven next fall. The school is justly proud of a freshman team which has shown a spirit of fighting and a spirit of winning against the varsity on several occasions. The first freshman game was played on the line and 110 pounds, and it is evident that the team was just getting into the swing of things. Kenyon was playing for their first time at Kenyon, and not for their first game. Even so, it has been holding down the endurance driving, through the entire season. It is from Washington, D.C., and played with the American college against a team from Chicago. Both teams are well established, and both will be expected to do well. The margin of the line was the majority of the line of the team from the line of the team. Harry is from Lancashire, England, and was from the University of Liverpool. The line of 119 pounds has been a constant terror of the college. Kenyon has shown it working up well at the end of each game. With the exception of Verno, has been showing up well at end and the Beary of Saskatchewen. The running back is also in the same. With some college. Usually college experience and not much, but with Captains with Captains, everywhere. The game was played at the quarter back against the entire team, and as for the final game, it was played by they team, who had been playing hard, and the team were feeling assuredly under the weather when the game was opened. The team, however, enjoyed the overnight trip immemorial. The team decided to disband and the teams departed and once again got into the bus, which had accompanied them, and made their way back from Buffalo to Geneva before the game was played.
