BEXLEY WINS INTRA-MURAL BASKETBALL
Tourament Ends: With Close Credit

In the finals of the intra-mural basketball league the contending teams were Bexley and South Leon. Although it was the first time that an intra-mural contest had been held in the school, the interest was much greater than that which attended the first two contests. The reason for this was the formation of a number of strong teams. The final game was decided in a most thrilling manner, with Bexley winning the first place prize by the narrowest of margins, 3 to 2.

SALVEMINI GIVES LARWILL LECTURE
Season Ends With Defeat By

Kenyon was defeated by a narrow margin in our last game of the season, Otterbein, the unskilled leader of the Conference, suffered just that kind of a defeat from an opponent before they were out, 52 to 40. This was the last game of the season, the teams taking part in the fighting hard throughout the period, and during the latter stages of the game showing a greatly increased defense.

The purpose of the game is to enable students and to pep up student activities and Kenyon traditions to take an active interest in the student governing of the rules, and to elect, managers of the various athletic teams. It is also said that alumni, who were graduated from Kenyon, can be admitted to the Cson upon payment of the required admission.

At the first meeting of the new organization, Lindsay was elected president, and Ayres, Krause, and Bascom were vice-presidents. Regular meetings of the organization will be held each week, and it is planned to secure a speaker at each meeting. If possible, one of the prominent coaches of the Pacem Club has been turned over to the Can for the time being. The first meeting of each week will be a "K-Cap," at which time new officers will be elected and installation of new members will be completed. The forming of this new organization is a fine thing, both for the students and for the college, and its influence is sure to be most beneficent.

INTRA-MURAL VOLLEY BALL GETS UNDER WAY

The volleyball season is ready to start, and the teams are getting a little practice before they may play. This is to follow the same plan as the basketball tournament, as it is a part of the inter-class elimination system. Under this plan, a team gets to play only as long as it wins, and the lowest teams are immediately out of the competition. This will shorten the number of games to be played, and allow plenty of time for the enjoyment of the intra-mural basketball, which is the other factor in putting the various teams, Bexley and that will watch all the inter-class division games, and that is the only way they have been seen from the outstanding players. This will be the only method they can have of judging the men, so they have had no opportunity to see any ballad in the new gym, now in college.

Again, the team must meet the new, this time in volleyball, seems to be Bexley, so they have seen their team from last year left to the team which gave the wins. Midland, Leopold, and the supremacy. The defenders of Kenyon, who have never won a game, can be dated from the Wingate government, to be stated by (Continued on Page 6, Column 1).

**ECONOMY**

The recent institution of economies prompted some interesting discussion. Economies were once utilized by other colleges in Ohio, and the information presented was helpful to reconcile me to the reduction in academic standards. We have sent a questionnaire to seven colleges in Ohio, and it was learned that only one college of the seven has resorted to a reduction in pay. This change being made at the end of the last academic year. We do not wish to become a voice of opposition, but in the light of the announcement that "while an institution may refrain from filling certain positions, it is not necessary, to lead to discharges from the academic staff." It is far better to divide the work and the salary budget....

---

**A Lack of Professors?**

If no formal plan of rushing can be agreed upon, then there is no alternative but the old system of manual rushing. Arguments against this can readily be found, but there can also excellent arguments which urge its adoption. In many ways it is undesirable for the freshmen to be placed in meagerly furnished rooms and be denied the companionship of older men who have been in Kenyon for some years. If some freshmen are inclined to shun the college, a bad attitude toward Kenyon is aroused which might remain with them during their entire stay on the Hill, or might be instrumental in their leaving Kenyon. It is very desirable that the first few weeks of a freshman at Kenyon be made as pleasant as possible. In addition, freshmen receive a very poor start in such studies. Without the guidance and advice of men who understand our educational system, the freshmen find it very difficult to adjust themselves. If their advice is received, the idea that students should take a decided second seat in the scheme of things here will be evident. And very important, the return of the old system of cutthroat rushing would probably result in an increased enrollment. As the system now stands, Kenyon men are taking almost no interest whatever in getting boys to attend Kenyon, which presents a great obstacle to their full enrollment. They give no thought to the freshmen class until the year starts, and generally do not return until the opening day of school. We are informed that under the old system many more freshmen enrolled. A great part in persuading men to come to Kenyon and it is a very evident fact that the part they play now amounts to almost nothing.

---

**RUSHING**

With the withdrawal of one of the fraternities from the Pan Hel, it was hoped that the first outward manifestation of the outward usefulness in our present system of rushing and pledging. As action is the test of whether the system is working or not, the effect of the previous Pan Hel rules.

Under the present system of deferred rushing, freshmen are practically isolated from upperclassmen for about two weeks after their arrival at Kenyon, and rushing is supposed to take place after the night agreed upon by the members of the committee. If the system worked perfectly, many points in its favor could not be denied; if the system failed, some modification is absolutely necessary. If anyone should be interested in persuading boys to come to Kenyon, he could do more than an average member of any other college. If freshmen would not only make the scholastic level, but would raise the morale of the college, and would probably be an asset to the reputation of Kenyon.

We suggest the adoption of such a plan of students' scholarship, that they would work to the benefit of the college as a whole. Their work has already been established elsewhere, and it would be a worthy experiment to introduce them to Kenyon.

---

**SCHOLARSHIPS**

A plan which is instituted at Kenyon, would not only aid in our enrollment problem, but would also raise the general scholastic level of the college, which has lately been presented to us. It would raise our scholastic level a great deal, and would probably be an aid in the improvement of the personnel of the student body.

This plan is the institution of free scholarships. As used in other schools, many of them in Ohio, this plan calls for a humane policy.

We do not propose to argue the matter side of this question, for it seems to us that the whole of the situation would lead to a satisfactory conclusion without the chance of a student opinion is not to be taken into consideration, especially the recommendation and consent of such an institution as the Carnegie Foundation cannot be dismissed lightly.

Kenyon Comments
By ROSSIE HALL

Having run completely amuck and gone home to the big city (colors, bright lights, noise, lovely ladies) since our last little tete-a-tete in print, I feel fresh and overhauled, even ready for this. I am set for anything faculty or Gambler may throw my way. But perhaps you are curious. Let this be so, hearties, let's-as "Tall" Walter would say- "turn on the business."

I'm sore bested over the fact that Warner Brothers fine re-vue, "Party-accord Street," may pass up Mt. Vernon along with the other but show-towns, leaving yours truly without an opportunity to gaze on Ruby Keeler for the third time. She's smart, appealing, and full of stepping talent, the perfect partner for a tried collegian; leave a glance, you geewhiz. 

... Then there was the gay dinner party for our little neighbors up the way. Ducky idea!... and yet the girls should be given a hand; they conducted themselves with admirable poise while we acted the boors to perfection, simpering, ogling self-consciously. Oh my! Where are the smoothies, the gentleness of old? Mayhap this rain is but a portent of what may hit the good old U. S. A., when porter and light wine go off the counterlist; so bear up, boys. If "The Score Note" did no more than feed the flames of hatred which burn conservative and liberal alike, it served an effective purpose. Here was provided the rife for long slanging water, the call to arms. 

... If winter comes, can spring be far behind? Goodbye then, until the world is born anew, birds and beasts frolic once again.

INTERMURAL VOLLEYBALL GETS UNDER WAY

(Continued from Page 1, Column 6) will have a hard time filling the gaps left by them—Swanson and McWain. At the same time there are new strong contestants who will battle hard to win this tournament. Well Wing and Young Leonard are both expected to pin good teams on the floor, and any one of the four is liable to come out on top. The time for the whole tournament will be only two weeks, under this old system, so ever-one may be prepared for some stiff battles.

IIlUSION:
The Oriental girl reveals in a sheet of plane glass supported by two slates. The magician then函 the sheet in frame of the pretty maiden... pronounces a few magic words... and the girl has disappeared in thin air.

EXPLANATION:
"Disappearing" acts are among the most popular and popular of the magician. Horses, girls, whole combs disappear—whisked like magic, dropped through trapdoors, hidden by mirrors. But this "disappearance" is a bit different. One of the slates is a colored dummy. When the magician holds up the sheet the little lady disappears completely—from the convenient figure of the dummy.

It's fun to be fooled
... it's more fun to know

There is also a trick of cigarette advertising, whereby a few magic words are used to create the illusion of "Coolness." EXPLANATION: Coolness is determined by the speed of burning. Fresh cigarettes, retaining their full moisture, burn more slowly... smoke cooler. Parched, dry cigarettes burn fast. They taste hot. This makes the method of wrapping very important.

Improperly wrapped cigarettes begin to dry out as soon as packed. Camels are cooler because they come in the famous Humidor Pack of welded, three-ply, MOISTURE-PROOF cellulose... and because they contain better tobaccos.

A cigarette that is fresh, full of natural moisture, and bleached from choice, ripe tobaccos tastes cooler than one that is harsh and acrid. For coolness, choose a fresh cigarette, made from costlier tobaccos.

It is a fact, well known by leaf tobacco experts, that Camels are made from finer, MORE EXPENSIVE tobaccos than any other popular brand.

Try Camels... give your taste a chance to sense the difference. You'll appreciate it!

NO TRICKS
... JUST COSTLIER TOBACCOS
IN A MATCHLESS BLEND
When Stephen M. Young, of Cleveland, a member of the class of 1838, headed the House of Representatives at Washington, early in March, that fact brought to the minds of those in and near Miami, the only son of the late Hon. James C. Young, the greater significance attaches to the fact that he is the TWENTY-FOURTH man from the college to do so.

Every matriculate knows, soon after he enrolls, about the greatest of those statesmen whose names adorns the alumni roster of the past century, but how many ever saw the complete list?

Do you know, for instance, that Henry Clay thought enough of Kenyon to send his son to Gambier, and that the son followed his father’s footsteps and served Kentuckians in the House?

Do you know that one fourth of Kenyon’s two dozen members of Congress have been Senators, representing five states?

Or that two sons of Kenyon men are among the rank of private and emerged with the stars of Major Generals?

With these facts and many others can be found in the Biographical Congressional Directory covering the whole period from 1789 (First Continental Congress) to 1927, when the volume was published by R. W. Bryan, 14, has been doing research work lately, and has found the big book a source of many interesting facts concerning the men of note whom Kenyon has contributed to the nation.

At the risk of calling a little material which will not be new to most of its readers, The Collegian presents the list.

This area starts with one of the first students Kenyon ever had, even before Bishop Chase moved his institution from Wethersfield to Gambier. This man is recorded in history as the only American ever attaining the rank of Senator in all three departments of the government. In the executive branch, he sat in Lincoln’s Cabinet; as a legislator, he served in the United States Senate; and he headed the nation’s judiciary as Chief Justice of the Supreme Court. That man was Salmon P. Chase.

The roster includes a President of the United States, six Senators and two Governors of Ohio, not to mention three Major Generals of the Civil War. Six Presidents of Kenyon College in Ohio, only two now in existence have listed Presidents of the nation on their alumni rolls—Kenyon, whose Hayes was graduated in 1857, and Miami, where the younger Harrison finished a decade later. In the number of alumni sent to Congress, Miami is Kenyon’s only superior in the state, and the Oxford institution is ten times the size that at Gambier. Miami also is fifteen years older.

Kenyon College can boast of just half of these seven men composing “Ohio’s Jewels”—at the corner of the State House in Columbus is a statue group marked in the words of the mother of the Grecians, “These Are My Jewels.” The group of seven great Ohioans includes three Presidents, a Chief Justice, five Generals of the Civil War and the Secretary through whom Lincoln gave the soldiers their orders. Kenyon’s share of the group consists of Hayes, Chase, and Edwin M. Stanton, who as Secretary of War sat in Lincoln’s Cabinet along with Chase. Hayes and Chase were Governors of Ohio.

Hayes was one of two Kenyon men who joined the Union Army as Privates and emerged with the twin stars of Major Generals. The other was Henry B. Banning of Mount Vernon, class of ’74. A third Major General in that war who studied at Kenyon was Ralph B. Buckland, 38, of Fremont, who entered the Union forces as a Colonel.

With the exception of Stanton, all these men were in Congress. Chase served only a short time in the Senate, however, between his tenure as Secretary of the Treasury and his elevation to the post of Chief Justice. The other sons of Kenyon who sat in the Senate have been David Davis, 1832, Illinois, who sat with Chase on the Supreme Court bench; Stanley Matthews, ’50, of Ohio, also an Associate Justice at Washington; Daniel S. Norton, ’46, of Minnesota; David Turpie, ’48, of Indiana, Senator at two periods, and the late Guy D. Deff, ’35, of West Virginia.

The Kenyon alumni elected to the House of Representatives are topped by Henry Winder Davis, 31 of Maryland, who received votes for the Speakership a few days after taking his seat. He was a cousin of Senator Davis of Illinois. With Davis as an undergraduate was James B. Clay, son of Henry Clay, and the son, by the "great pacificator," served in Congress from Kentucky.

Other sons of Kenyon who sat in the House were Guy M. Bryan of Texas, a classmate of President Hayes in 1842; General Pendleton, ’38; John L. Cable, ’90, of Lima, who left office March 4; John Cradlebaugh, ’39, delegate from Nebraska; Robert Cresser, ’97, of Cleveland, recently Ohio’s center for the Speakership of the present House; Albert Douglas, ’72, Chillicothe; Frank H. Hurl, ’88, Mt. Vernon; the Rev. John G. Jones, 1832, Penn Yan; Joseph W. McCardle, ’39, Pittsburg; Charles D. Martin, ’50, Mount Vernon; Orestes F. Phillips, ’85, Medina; Lazarus D. Shaiberger, ’39, Pennsylvania; Rowland E. Trowbridge, ’41, Michigan; and in the present Congress along with the Representative at large from Young County.

ORCHESTRA TO GIVE CONCERT

(Continued from Page 1, Column 1)

The concert will be given in the great dining hall of Peirce Hall, which was the scene of an excellent concert given by the Cleveland String Quartet last spring.

Kenyon’s opportunity for hearing good music are altogether too few, and leaving the Kenyon symphony to attend something to look forward to.

SCIENCE CLUB HOLDS MEETING; READS PAPER

(Continued from Page 1, Column 2)

Dr. Walton on a Kenyon student about 20 years ago. An announcement was made of the lecture to be given April 21st, under the auspices of the Science Club, by Dr. G. J. Mason of Case School of Applied Science. The subject will be "Some Recent Discoveries." Everyone is invited to attend.

Anouncement has been made of the revision of the entrance requirements of the science club. In the past six months of the Science Club have consisted mostly of Juniors and seniors, this giving them, at most, only two years of active interest in the organization. Lately there has been a movement among the active members to admit sophomores, the idea being that it will stimulate interest to have members for a longer period of time. At the meeting held February 19th, provision was made to admit sophomores as associate members.

BASKETBALL SEASON ENDS

The basketball season of 1932-1933 having ended, we can now look back and take a closer look at the games. It is interesting to note that they were played, but with only a superficial summary. Since all analyses of the games have been done by the Kenyon College Lane, we cannot say that the season this past year has been any different. However, there has been a decided improvement seen as the season has progressed, and there has been a very decided development of material which will form a good nucleus for next year's team.

We started the season by playing Capital, losing the game by a score of 30 to 15. The first half was played at a high level by the teams, and it was evident that Capital put a much better team on the floor than was expected to lose. Although they were defeated, one can only admire Capital's fine work.

The next game was against Otterbein, which was won by a score of 40 to 21. Lindsay was high point man for Kenyon with 15 points, followed by Swanson and Grocers with 10 points each.

The basketball team of Muskingum proved too strong for us, and we lost their court when we played there January 14th. Muskingum stepped to the fore in the opening minutes, gaining a 10 point lead. However, Lindsay and Swanson never turned the tide, but were defeated by Kenyon throughout the entire encounter. The game was fast and thrilling, but for the fact that it was too fast for much excitement. The game was marked by very few, committed early and carried to the end by both teams. Muskingum made ten, while we scored fifteen times during the course of the game. Lindsay played a fine game at forward and was high man on our team, scoring more than twice as many points as any other player. Lindsay was greatly out-faced by the men in Muskingum, showing a lack of confidence, although at times we played as fine as our opponents. The score was 36 to 45.

Otterbein gave us a bad defeat in the fourth game by a score of 50 to 22. Although the game was played at half 10 to 12, Otterbein swept us off our feet in the second half and rolled up a total of twenty-eight points in this period. Lindsay was again high man for Kenyon, although he scored only six points. This game was not as rough as the preceding one, only one being put out on penalties, and our men played a much slower game, but having enough drive to win.

Kenyon got her first win of the season on January 27th by defeating Kent State with a score of 46 to 36. The game was close, although neither team was playing to its ability. The baskets, and when a shot failed once the attacks were broken. The ball was rarely followed in and many points were lost in this manner. The game was won largely on free throws, Kent making two more field goals than did Kenyon.

The next game, however, was a defeat at the hands of Wooster. The game was played at a score of 45 to 15. The Wooster men were too strong for Kenyon, and defeated us easily after a slow start. During the first half, Kenyon held them even, with the period ending 21 to 20 in Wooster's favor. In the second half, however, Wooster scored 24 points, while Kenyon scored none, thus giving Wooster a big lead in the game, each getting a total of 14 points.

Kent State turned the tables and won our second encounter with her by a score of 40 to 30. The game was sloppy but not rough, and the ball handling was very poor. As usual Kenyon made a good showing in the first half, having a 1 point lead at the end of the period, but fell to the fore immediately after the intermission.

In this game Swanson was the only one of Kenyon's team to score against the Buckeyes. The game was played by a good team, but we played against the first team of the season.

Kenyon lost her second game to Ashland, losing by a score of 50 to 33. Both teams gained only temporary leads until the Ashland man started connecting with the basket just before the finish. This game was won by full effort, Ashland getting 10 points in this manner, while we gained only four. The game ended with a score of 40 to 30.

We took our second victory from Capital on February 11th, when the Kenyon team showed that it could put forward a good game. This was a good game, and we played against the best that they could. The score was 42 to 45.

The best game of the year was played against Otterbein. Although we were defeated, we played against the best team in the state. The game was fast and thrilling, and we played against the best that they could. The score was 42 to 45.

Our show of development was due to the change in the style of play. We could never have won with a man to man defense. Lindsay, Swanson, and Hillier, being too slow on the manner of play, thus handling themselves on defense. The zone defense used later in the season proved worthwhile.

KENYON LOSES CLOSE GAME WITH OTTERBEIN

Comment from Page 1, column 4, may or may not carry on, although it is evident that our men carried out more brilliantly. They had no difficulty in maintaining their early lead in the previous game, but were in a state of fright in the latter.

Holland of Otterbein was the top scorer for both teams, making 15 points. Swanson came next with 14, and was followed closely by Ludden, Lindsay, and Andrews, who made eleven apiece. Andrews made seven free throws good, out of nine attempts. The free thrower was the same for both teams, and the game finished 45 to 21.

Lindsay was high point man for the season, averaging more than 10 points per game. He was at his best in the first half, making 24 points of the total. Although he was a rath-er liberal forward, his uncanny shooting kept him sure of his position.

Hillier, in his second year, developed a great deal, and improved noticeably with each game. The prospects are that he will make an excellent center for the team in the next year. It is interesting to note that he had never played basketball before last year, and such fast development is very unusual.

Swanson, always looked on as a defensive man, showed good offensive skill as center in the third game. He came through as second high point man, averaging more than nine points per game for the season. He played superior ball all season.

Page played an excellent game at defense, his four arms stopping shot after shot. His game developed greatly during the year, and he will probably be better off at defense next year.

Duly gave us just about what we needed as a defensive man in a forward position. His defense was excellent, and he also in a coming offensive man.

Hillier, back in his old shape, looked better than Sutton at first, but Sutton's rapid development proved to be a man of place and center. Hillier, however, was used as relief both at center and guard. Together, Honeywell, Hillier, Grocers, and Macon served as substitutes, and together Honeywell and Macon served in this year.

Compliments of
Kelsey-Dowds Co.
Wholesale Grocers
Mt. Vernon, Ohio

Mason and Renn are coming along in fine shape to help out on next year's team.

Our show of development was due to a change in the style of play. We could never have won with a man to man defense. Lindsay, Swanson, and Hillier, being too slow on the manner of play, thus handling themselves on defense. The zone defense used later in the season proved worthwhile.
