Unique Homecoming Planned

Alumni To Attend Classes
Upon Return For Homecoming

Chalmers, Cahall, Powell and Ransom
to Lecture and Lead Forums.

When the Alumni return to the Hill this year for the Homecoming, they will be doing more than just revising old acquaintances and inspecting their various divisions; they will in addition be given the opportunity to attend selected classes. Special classes have been prepared under Messrs. Chalmers, Cahall, Black, Powell and Ransom for their intellectual entertainment.

The inauguration of this idea began at last Friday’s lecture by Professor Robert E. Kenyon, 76, on the origin of the alphabet. Mr. Kenyon is professor of Modern Languages at Denison. His lecture, which consisted of Bob Kenyon, George Stroop, William White, Charles Carstens, and two members of the Alumni College as front men at Bob Kenyon and Mr. White, and from this combination to devise suitable program activities in Kenyon.

Working in conjunction with Bill Doughlin, the program chairman, a complete schedule has been completed.

This Years’ Pledges

President’s Letter
To Alumni

In arranging the Alumni schedule the Council has made every effort to make Kenyon. Many alumni have expressed the desire to hear broadcast ideas in the college. What do we want to have broadcast? Professors, life in action? Also, what kind of material? Contemporary life topics?

We have heard that we are a busy bunch and need more time for ourselves. We are always busy. We do not have any alumni return for Homecoming, and it is not the time of the year that you will arrive a day early for the final exam at the end of the semester!

Gordon Chalmers

Somenich Passes Tests For Air Corps

Robert Somenich, who graduated last June, is now at Love Field, Texas, in the last stages of training for the U.S. Air Force. Mr. Somenich passed the same exams that all freshmen candidates are required to pass. He will be stationed at Fort Worth, Texas, at Love Field, where he will receive his flight training.

In the meantime, he will be attending classes at the University of Texas. Once he has completed his flight training, he will be stationed at Fort Worth, Texas, at Love Field, where he will receive his flight training.

Mr. Eric Alexander Hawke, 70, of Mt. Vernon, Ohio has been appointed as assistant professor of English at Kenyon College. Mr. Hawke has been a member of the Kenyon College faculty for the past two years and has been named to fill the position vacated by Mr. John E. White.

Mr. Hawke is a graduate of the University of Michigan and has taught English at several colleges and universities. He is a member of the National Association of Teachers of English and the Modern Language Association of America.

For the past two summers Mr. Hawke has served as an assistant professor of English at the University of Michigan and has also been a member of the English faculty at the University of California, Berkeley.

Mr. Hawke was born in Mt. Vernon, Ohio in 1910, and attended public schools in that city. He received his B.A. degree from Kenyon College in 1934 and his M.A. degree from the University of Michigan in 1936.

Since coming to Kenyon, Mr. Hawke has been active in the college community, serving as chairman of the English department and as a member of the faculty council. He has also been active in the affairs of the town and has served as a member of the town council.

Mr. Hawke is married and has two children. He resides in Mt. Vernon with his family.

Mr. Hawke is a member of the Phi Beta Kappa Society and has been awarded the Distinguished Service Award by the National Association of Teachers of English.

Pro

Here at Kenyon we you traditionally insisted from the outside world and its events, and to the new things to be had by looking around is nearly deplorable. When are you going to talk to these? But perhaps this is a bad way of putting it, and it is dangerous.

One of the duties of a state college, the need for which is increasingly recognized, is to provide a general education for all students, and this involves not only the study of liberal arts, but also a study of the natural and social sciences. It is not enough to present students with a narrow view of the world, but they must be broad-minded and open to new ideas.

One of the ways in which this is done is through the College's general education program, which includes courses in a wide range of subjects. These courses are designed to provide students with a solid foundation in the humanities, the social sciences, and the natural sciences, and to encourage critical thinking and the ability to think independently.

Chambers, as you might have noticed, is a bit of a rebel at heart. He believes that the "Trivial" is the only true form of expression, and that the rest of us are all just trying to keep up with the Joneses. This is true, but it is also important to remember that there are other forms of expression that are just as valid and important.

One of the most important things that we can learn from Chambers is that we should not be afraid to be ourselves, and that we should not be afraid to express our own ideas and opinions, even if they are controversial. Chambers is a true rebel, and he is not afraid to say what he thinks, even if it is unpopular.

To sum up, the College of Science is a wonderful place to be, and it is important that we all try to make the most of it. We should all try to be open-minded and open to new ideas, and we should all try to be rebels in our own right, and not just follow the crowd.

Con

It's not the things we don't know that get into us the most, it's the things that we think we know, but actually don't. And political and international affairs are a big part of this. We think we know everything about them, but we don't. And we also think we have a good understanding of the world, but we don't. And we think we have a good understanding of the people around us, but we don't.

On the other hand, the College of Science is where we can learn about the world and how it works, and where we can learn about ourselves and our place in it. It is a place where we can learn about the natural world, and where we can learn about the complex interactions between the natural and social sciences.

Chambers, as you might have noticed, is a bit of a rebel at heart. He believes that the "Trivial" is the only true form of expression, and that the rest of us are all just trying to keep up with the Joneses. This is true, but it is also important to remember that there are other forms of expression that are just as valid and important.

Fraternity Visitor Returns in New Style

Boren Exhibits Own Plane At Airport; Tells Tale Of Flying To Land

Bored by a routine weekend, a student at last year's Homecoming flew over the city in a small plane. This year, the student has returned to the airport with a new plane, and is using it to tell tales of flying.

Bill Turner, Kenyon '38, who has been on the college staff since January 1, has been the focal point of attention for Kenyon's student flying organization. His plane, a Borens B-2B, is capable of reaching a top speed of 130 miles per hour, and has a range of 150 miles.

The plane is owned by the student flying organization, and is used for training and practice. It is also used for pleasure flying, and for some of the students it is their only way to get around.

Chicago Alumni: Fete Entering Student

On Friday, September 8th, at 8:00 p.m., the College of Science will hold a formal reception for the new entering students. This will be the beginning of a period of international events that will take place throughout the year, and will be an opportunity for the students to meet and get to know each other.

Stables Open With Marked Reduction of Horses

Captain Ebele Expected to Return To Kenyon

The Kenyon School of Equestrianometry formally opened Friday, September 22, with a meeting of students and faculty to discuss the coming year. Dismounted by the death of Skylo, one of the original stable horses, the school faced a significant challenge: how to replace the lost horse with a suitable replacement. Following the ceremony, the students and faculty discussed their plans for the upcoming academic year and the future of the school.

The school is expected to reopen with a reduced number of horses. The decision to reduce the number of horses was made due to the financial constraints faced by the school. The cost of maintaining the horses was becoming unsustainable, and the school had to make difficult choices to ensure its financial stability. The reduction in the number of horses will also allow for a more focused training program, with the remaining horses receiving more attention and care.

The school has already received applications from several new students, including some experienced riders who are eager to participate in the program. The students are looking forward to the new academic year and are excited about the opportunity to learn and grow as equestrians.

The school will continue to prioritize the well-being of the remaining horses, ensuring that they receive proper care and attention. The students and faculty are committed to providing the best possible education and experience for the students who choose to participate in the program.

Kenyon Students Always Welcome

Every FRIDAY COLLEGE NIGHT NEW BAND EVERY WEEK

True Kenyon Color

Early Petunias

Kenneal Workers are careful regarding the time of the initial bloom of the petunia flowers. The first bloom is expected to occur on October 2, 1970, according to the Kenyon College website.

The petunias at Kenyon College are a popular attraction, drawing visitors and students alike. The flowers are grown in the college's gardens, and their vibrant colors provide a beautiful contrast to the college's greenery.

Chicago Alumni Vote To Continue Luncheon

The Chicago Alumni Association has voted to continue the tradition of the annual luncheon, which was first held last spring. The luncheon, held at the Chicago Hotel, was a great success, and the alumni have decided to make it a regular event.

The luncheon provides an opportunity for alumni to gather and renew old friendships, as well as to meet new colleagues and make valuable connections. The events are typically held at the Chicag Simone Hotel, and they offer a chance for alumni to enjoy a delicious meal and engage in meaningful conversations.

Notable attendees have included prominent figures from the academic world, politics, and business, among others. The luncheon is a chance for alumni to network, share ideas, and contribute to the college's continued success.

Are You Open-minded?

The John F. Kennedy campus community has given almost unanimous support to the proposed changes, which will be introduced in the fall. This strong support reflects the college's commitment to fostering an open and inclusive environment.

The college's open-mindedness is exemplified in its commitment to providing a diverse range of courses and programs. The college's goal is to ensure that all students have access to a broad and stimulating curriculum that challenges them to think critically and creatively.

The college's open-mindedness also extends to its approach to student life. The college is committed to creating a community that is welcoming and supportive of all students, regardless of their backgrounds or perspectives.

The college's open-mindedness is evident in its support of a wide range of social and cultural events and activities. The college hosts a variety of events, such as lectures, performances, and workshops, that provide opportunities for students to explore different ideas and perspectives.

The college's open-mindedness is also reflected in its commitment to promoting diversity and inclusion. The college has implemented a range of initiatives to promote diversity, equity, and inclusion, including diversity training for staff and faculty, and the establishment of a diversity office.

The college's open-mindedness is a key component of its identity, and it is one of the reasons why Kenyon College is such a special place. The college's open-mindedness is a reflection of its commitment to excellence, innovation, and social responsibility.
 McKinley Visits Lord Kenyon's Heir (Continued from Page 1)
been associated with the Pilgrims since the founding of Kenyon in 1840. Lord Kenyon is the heir of Lord Kenyon of England, and the heir of Lord Kenyon of England is the heir of Lord Kenyon of England, and the heir of Lord Kenyon of England is the heir of Lord Kenyon of England. Thus, there is a great many stories about Bob and his family, and the building of Old Kenyon. Bob poses as such a victim of the story, and the story is told with many amusing and picturesque scenes and places of Garbo and Kenyon in the years of their non-

Lord Kenyon is a follower of the arts and a lover of the historical and the picturesque. He is a book and manuscript collector, and the McKinley collection is outstanding. McKinley traveled in England the week before the war was declared, and was shown many records and the like. The latter story refers to Garbo's return to England, for it comes in Lord Kenyon's hands for the duration of the present war.

That time, Lord Kenyon was an officer in the Territorial Army, which he later joined in the ranks of the regular army. Lord Kenyon was the son of a college assembly member for his family. The heir, the late Lord Kenyon was in Garbo in 1915 for theimonial celebration of his 60th birthday. McKinley also spent ten days on the island of Skye in the Scottish Channel. Miss Isabel Nash of Rome de Jekyll, located at the island, threw a birthday party for the heir, the last timely events to relate.
