Boyd Lectures on Synthetic Rubber

Mr. James Boyd, Jr., Kenyon '24, lectured on Synthetic Rubber last Monday evening in the gymnasium. This is a second series of five lectures on subjects of national importance at the request of the Visiting Committee of Kenyon's 40 yard line. A collection of five dollars was donated by the people. The program will be from noon to six. The ten tickets are for the benefit of the Visiting Committee. Tickets may be purchased at the office of the Visiting Committee.

Mr. Boyd stated his belief that this is a wonderful invention and will undoubtedly become the next great industry of the world.

Tate; Van Doren Appeal on Radio Program

Allene Tate and Mark Van Doren, both students of Kenyon's pride, the Red Devil, were on the air last Monday evening, discussing and analyzing the current news. They are members of the radio club at Kenyon College, Gambier, Ohio, under the direction of Mr. R. E. D. Van Doren, who is known as the "Red Ticket" and "Red Ticket" is the name of the program.

Professor Adler discusses inadequacies of modern education

Dr. Albert Britt, who was president of the American Bar Association, spoke at the meeting of the Kenyon Bar Association on Monday night. He spoke on the subject of "The Importance of Modern Education," and said that the future of the world depends upon the education of the youth. He said that the only hope for the future is through education. He said that the youth of today are the leaders of tomorrow, and that it is important that they be given the best possible education. He also spoke on the importance of the role of the teacher in the education of the youth.

Abandon Week-end Dance Plans in Face of World Emergency

Due to the current international situation, Kenyon men have decided not to hold dance plans this weekend. They feel that it would be a waste of time and money to hold such events when the world is in such a state of uncertainty. The men have been discussing the situation and have decided that it would be best to cancel the plans. They feel that it is important to focus on the current events and to support the efforts of the government.

POWELL DEFINES STATE OF MODERN SCIENCE

Dr. Wilfred Powell, Kenyon prof., recently returned from Europe, gave the following observations of the cosmic rays, delivered on the Freshman lecture in the second week of the fall term at the Kansas City stock market.

Red Nervo

Three thousand crowd on Kenyon campus for the opening of the 1929 season on Tuesday evening. The crowd, which included alumni, students, and faculty, gathered in the gymnasium to listen to the speech of Dr. Albert Britt, who was president of the American Bar Association. The speech was a powerful one and was well received by the audience.

Slicing of Lives
BACH TALK
The record concert this week has been abandoned in favor of some of the most unique music by some of the most unique composers.

FRIDAY, NOV. 15
Father Daniels also includes "The Choral Art of the University of Wisconsin," which he has compiled and which the chorus has performed in the past few years. Father Daniels also includes a book of music of many and varied composers in the Moravian Society's annual choral celebration which he has been planning for many years.

SUNDAY, NOV. 23
The Ohio University Press contains this "Daffidil: College of education," which Father Daniels has compiled for the fourth year in a row and which could be read by all college students.

The University of Wisconsin also has music by the various choirs which are well worth hearing and which should be studied by all college students.

The Ohio State University includes this "Daffidil: College of education," which Father Daniels has compiled for the fourth year in a row and which could be read by all college students.
Swimmers Make Good Football Captain

Two years ago last September a modest, dark-haired boy from Ravenna, Ohio, entered Kenyon. He came on a scholarship. As the past record of being an excellent scholar and athlete, this week this same boy, unanimously elected to succeed Stevens and Trevezn as Captain of the football team. Standing 5'9 high and weighing 165 lbs, Gabe Paolozzi has not changed in those two years since he first came from Ravenna. Still a hard-working boy both on the field and off, Gabe has found time to earn two letters in football, one in basketball, work in the commons, hold an N.Y.A. job, be active in his fraternity Phi Kappa Epsilon, and to attain a scholarship averaging 4.0. Coach Hadfield summed it up very nicely when he said, "Gabe is an excellent example of a Kenyon leader, socially, scholastically, and in sports." In his past two years Gabe has been playing first string right halfback and occasionally fullback. He is known by his teammates for his dependable ability in making the needed three yards for a touchdown. As one of his fellow players said, "You can always count on Gabe to pull a big man in the game. The spark of his bravery, the will to win, his mental and physical toughness, his stature, and his ability to handle the ball and make good yardage, have brought Gabe to the top of his class and made him the leader of this season's football team."

POWELL

(Canceled from Page 1)
Powell was the statement made by the professor that the newer the science, the more inaccurate are the results of his experiments and the more a matter of guess is which a new science evolves. Psychology, he claimed, is probably the youngest science — science whose experiments are still undeveloped, and whose scientists are still groping blindly as to what they are looking for, and as to what ways and for clues as to what they are to find. The need of research is extreme, the technique is exact. On the other hand, is a much older science, but is viewed in the recent developments, the importance of its knowledge is such that we might classify it as a new one. This science was prohibited directly by the church and was too weak to defy it. The Church prohibited research on the human body, but it is there that the progress of this science was held up for no other reason. The invention of the microscope was merely a potential asset in the 18th century, and it has only been recently that society would permit experimentation on sex and heredity. Its technique was better than that of Physiology, yet is still not so good as that of Chemistry and Physics. In the former, the work in experimentation made advancement easier, but experimentation for a long time merely the mixture of substances and the recording of the reaction. Here experimentation is assisted by the possibility of working with large quantities. Physics, however, is most probably the oldest of the sciences. Our aim is to find the ultimate functions of matter.
KENYON-BLUFFTON

KENYON-BLUFFTON (Continued from page 1) penalty for holding put the Lords back on their own 25. An incomplete pass and then a complete one from Herrick to Paladini netted 40 yards to the Bluffton 30. Two successive first down put the ball on the Bluffton 8 and line barked 5 yards to the Bluffton 3, 2 more on a gain. After a punt the ball was placed on the Kenyon back on their own 13 and a punt from Herrick to Berno is the end zone scored another 6 points. The try for extra points was wide. Bluffton came back strong but could not penetrate deep enough to cause a real scoring threat to the home team and the quarter ended with Kenyon in possession of the ball on their own 22 yard line.

FOURTH QUARTER

The 4th quarter got under way with Herrick getting off a long high spurring quick kick for 75 yards which put Bluffton on their own 3 yard line. Again they were unable to get out of the hole. After a few exchanges of kicks Amano, running well from his left half back position all day, again scored on a single handed excursion around his own right end. The try for extra point was low.

BLUFFTON SCORES

Bluffton determined to punch a touchdown back strong with a barrage of punts finally scoring from the Kenyon 2 yard line. The pass for the extra point was not complete. With a few minutes left to play Kenyon took possession of the ball for the remainder of the game as ball rested on the Bluffton 20 yard line at the game's end. After two decisive defeats in New York State, Robertson and Hobsin of Hobart and Koehne of Bluffton still had a winning football team. The two outstanding guard positions of Robertson and Owen Lay were solid as was the defensive line led by Bert Johnson and blocked well all day. Offie Plass substituting for Johnson in the last quarter showed great promise. The Kibbhill backfield backed by Bert Johnson and blocked well all day. Offie Plass substituting for Johnson in the last quarter showed great promise.

KENYON BASKETBALL SCHEDULE 1940

Dec. 10 — Bluffton
Dec. 12 — Denison
Jan. —
Jan. 10 — Bluffton
Jan. 18 — Heidelberg
Feb. 1 — Oberlin
Feb. 11 — Oberlin
Feb. 25 — Defiance
Feb. 29 — Bluffton
Mar. 1 — Wooster
